Hi,

My name is Vernon Adams Jr, I live in NorthWest Alaska in Noatak, AK 99761. I am supporting the bill SB61 because a lot of electronics end up in the landfill and some are still in the trash bags or boxes that the locals may throw away without fully knowing the damages electronics components create. This would allow every village to backhaul electronics out of the village's landfill and the land it's on and for the EPA worker does not have to use fundings not in their federal budgets
