Agency:

Division of Administrative Services, DCCED

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2018 LEGISLATIVE SESSION

BILL NO. HB 384

Analysis

House Bill 384 would expand the definition of 'public utility" in AS 42.05.990(6) to include an entity furnishing broadband Internet access service. The bill would also include a general definition of "broadband Internet access" in AS 42.05.990 that is distinguished from traditional dial-up Internet access service.

The Regulatory Commission of Alaska (RCA) would be required to certificate or implement through regulation a registration process for Internet service providers operating in Alaska. The RCA could also decide to implement a periodic network data reporting requirement and may need to open a proceeding to define the necessary information to be filed. Additional state oversight of broadband Internet access service is limited by a recent Federal Communications Commission decision that is under appeal.

The Regulatory Commission of Alaska does not anticipate fiscal impact from this legislation.
