## Alaska SB 127

Testimony in favor of repealing SB91.

SB 91 appeared to be a thoughtful Bill that could potentially save the State a significant amount of money. However, with 20/20 hindsight, it would appear there have been unintended consequences.

Anchorage is not a safe City

Anchorage is now making National headlines for having one of the highest per capita crime rates in the Nation. We have a serious drug problem which is further compounding the increase in property crime. Other non-violent and violent crimes are also on the increase.

Bank robberies, Vehicles stolen off car lots, Armed Car jackings, Armed robberies at coffee stands, Murders, and Rapes. Criminals routinely break into vehicles and homes. The hidden cost is being paid by business and taxpayers in the form of higher property insurance and alarm systems. Tourists are also victims of our escalating crime.

It is time to admit that SB91 isn't working as originally intended. Please repeal SB91 and help to restore law and order to Alaska.

Sincerely

Tom Oiye

Anchorage, AK
