

North Slope Production Outlook

Joint Senate and House Resources Committee
September 10, 2018

Scott Jepsen

VP, External Affairs and Transportation
CONOCOPHILLIPS ALASKA

Cautionary Statement

The following presentation includes forward-looking statements. These statements relate to future events, such as anticipated revenues, earnings, business strategies, competitive position or other aspects of our operations, operating results or the industries or markets in which we operate or participate in general. Actual outcomes and results may differ materially from what is expressed or forecast in such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that may prove to be incorrect and are difficult to predict such as operational hazards and drilling risks; potential failure to achieve, and potential delays in achieving expected reserves or production levels from existing and future oil and gas development projects; unsuccessful exploratory activities; difficulties in developing new products and manufacturing processes; unexpected cost increases or technical difficulties in constructing, maintaining or modifying company facilities; international monetary conditions and exchange rate fluctuations; our ability to complete the sale of our announced dispositions on the timeline currently anticipated, if at all; the possibility that regulatory approvals for our announced dispositions will not be received on a timely basis, if at all, or that such approvals may require modification to the terms of our announced dispositions or our remaining business; business disruptions during or following our announced dispositions, including the diversion of management time and attention; our ability to liquidate the common stock issued to us by Cenovus Energy at prices we deem acceptable, or at all; the ability to deploy net proceeds from our announced dispositions in the manner and timeframe we currently anticipate, if at all; potential liability for remedial actions under existing or future environmental regulations or from pending or future litigation; limited access to capital or significantly higher cost of capital related to illiquidity or uncertainty in the domestic or international financial markets; general domestic and international economic and political conditions, and changes in tax, environmental and other laws applicable to ConocoPhillips' business; the stability and competitiveness of our fiscal framework; and other economic, business, competitive and/or regulatory factors affecting ConocoPhillips' business generally as set forth in ConocoPhillips' filings with the Securities and Exchange Commission (SEC). We caution you not to place undue reliance on our forward-looking statements, which are only as of the date of this presentation or as otherwise indicated, and we expressly disclaim any responsibility for updating such information.

Use of non-GAAP financial information – This presentation may include non-GAAP financial measures, which help facilitate comparison of company operating performance across periods and with peer companies. Any non-GAAP measures included herein will be accompanied by a reconciliation to the nearest corresponding GAAP measure either within the presentation or on our website at www.conocophillips.com/nongAAP.

Cautionary Note to U.S. Investors – The SEC permits oil and gas companies, in their filings with the SEC, to disclose only proved, probable and possible reserves. We use the term "resource" in this presentation that the SEC's guidelines prohibit us from including in filings with the SEC. U.S. investors are urged to consider closely the oil and gas disclosures in our Form 10-K and other reports and filings with the SEC. Copies are available from the SEC and from the ConocoPhillips website.

North Slope State and Federal Units

2013 Alaska Outlook: Facing Headwinds

ConocoPhillips' Alaska Outlook 2013

2013 Outlook for Asset

- Uncompetitive tax structure
- High cost of supply
- Declining production profile
- Limited investment
- Focus on Lower 48 unconventional

Current Outlook: Spurred by Tax Change, Technology & Cost of Supply Focus

ConocoPhillips' Alaska Outlook¹

2013 vs. Current (including 2018 acquisitions)

Drivers of Transformation

- Senate Bill 21 improved fiscal framework
- Technological advancements and innovations target new and bypassed resources
- Comprehensive effort to capture value from core fields and infrastructure
- Focus on lowering cost of supply has made Alaska competitive within the portfolio
- Renewed focus on exploration has yielded early success

STRENGTHENED OUTLOOK

supported by recent strategic transactions

¹Assumes a stable and competitive fiscal framework, includes impact of 2018 acquisitions at working interests of: Western North Slope = 100% / Kuparuk = ~95%, and excludes Alaska North Slope gas sales.

Breaking Down the Production Profile

ConocoPhillips' Alaska Outlook¹

¹Assumes a stable and competitive fiscal framework, includes impact of 2018 acquisitions at working interests of: Western North Slope = 100% / Kuparuk = ~95%, and excludes Alaska North Slope gas sales.

Pipeline of Projects on the Western North Slope

GMT1

- ~ 25,000-30,000 BOPD*
- First oil planned late 2018
- ~700 construction jobs
- ~\$1 billion gross

GMT2

- 25,000-30,000 BOPD*
- First oil planned late 2021
- ~700 construction jobs
- ~\$1.5 billion gross

Fiord West

- 20,000 BOPD*
- First oil planned Aug 2020

Willow Discovery

- 100,000 BOPD*
- First oil 2024-2025
- Multi-billion dollar investment
- Potential for hundreds of direct jobs, thousands of construction jobs

*Nominal peak gross production.

2018 Exploration – Three-Rig Program

ConocoPhillips NPRA acreage

- 594,972 gross acres acquired in late 2016
- 79,998 gross acres acquired in late 2017
- 1,000,000+ gross acres in NPRA

Willow appraisal and exploration

- 4 wells: T7, T8, T9 and West Willow 1 (WW1)
- 3 well tests (T6, T7, T8)
- 37+ miles of ice road and 5 ice pads
- Drilling rig - Doyon 141

Stony Hill (SH1) exploration

- 1 vertical well
- 1 well test
- 17+ miles of ice road and 1 ice pad
- Drilling rig - Arctic Fox

Putu (P2) exploration (ASRC/State subsurface and Kuukpik surface)

- 1 well: 1 slant + 1 vertical
- 1 well test
- 1 mile of ice road and 1 ice pad
- Drilling rig - Kuukpik 5

250 sq. mi. seismic program

Largest Exploration Program Since 2002

Narwhal Trend: Promising Discoveries with Access to Infrastructure

Narwhal Trend

Putu Seismic Amplitude

100 – 350 MMBOE¹

current discovered resource

- Putu and Stony Hill wells were drilled, cored and flow tested on the Narwhal trend in 2018
- Prospects originally identified through seismic amplitude mapping
- Additional appraisal required for both discoveries
- Multiple development options possible
- Ability to leverage legacy infrastructure makes these commercially attractive opportunities

- ▲ Projects
- Discoveries
- Central Processing Facility
- 2018 Exploration Bottom Hole Locations
- 2018 Well Tests

2018 Exploration Program Confirms Stand-Alone Hub at Willow

Greater Willow Area

● 2018 Well ○ 2018 Well Test

Preliminary Discovered Resource Range Increased

400 – 750 MMBOE¹

current discovered resource

- 2018 Willow appraisal activities and analysis:
 - Confirmed oil-filled reservoir with 3 new appraisal wells and 3 flow tests
 - API viscosity range: 41° to 44°
 - Facility-limited vertical test rate ~1,000 BOPD
- Appraisal results combined with CSI data indicate more potential on-trend resource to north and south
- Additional oil discovery at West Willow creates possibility for tie-back to Willow hub
- 2019 Greater Willow Area appraisal season needed to optimize development plan

Willow Preliminary Development Concept

- **Willow Location:** Approx. 30 air miles from Nuiqsut, >36 mile road route from Nuiqsut.
- **Willow Scope:** Central Processing Facility with up to 5 drillsites, separate camp and shops pad. Pipelines linking to existing Alpine infrastructure/corridors.
- **Module Transportation:** Considering temporary island near Atiguru Point. 2018 summer field work to support logistics studies. Geotechnical field work anticipated for winter 2019.
- **Seawater Source:** Kuparuk STP. New pipeline from Willow to CPF2 along existing and proposed corridors.
- **Gravel Mine:** Potential mine site near the Tinmiaqsuiquvik (Ublutuoch) drainage area, 7 miles west of Nuiqsut, on existing CPAI leases. Anticipate continued exploration and delineation work in winter 2019.

Willow Development: Optimize Based on Cost of Supply

- Entering pre-FEED to size development concept
- Horizontal MWAG development from inception
- \$2-3B of capital over 4-5 years required to achieve 1st oil
- Additional \$2 -3B for multi-year development drilling post-1st oil

PLANNING FOR FID IN 2021

1st oil 2024-2025

Large Module Offload Location

Innovative Approach to Lower Cost & Risk

Facility & Drill Site Design

Optimize Facility Sizing & Installation

Gravel Sourcing

Locating New Construction Materials

Subsurface Characterization

Appraisal Wells & Technical Evaluation

Permitting / EIS Process

Commencing Federal Permitting Process

Transportation Infrastructure

Utilizing Existing Pipeline Network

Source Water for Injection

Leveraging Kuparuk for Willow EOR

Schedule

- August 7: Notice of Intent published
- August 7 – September 6: Scoping Period and Scoping Meetings*
- March 2019: Draft EIS issued (45-day public comment period)
- July 2019: Final EIS issued
- August 2019: Record of Decision

*Scoping period extended 20 days

Portfolio & Strategy: Upcoming E&A

Late 2018 - 2019 Plan

6-8 WELLS

Late 2018 targets Cairn & Narwhal

8-9 TESTS

2019 winter targets Greater Willow Area

2 RIGS

Final well/test count depends on results/timing

2020+ Program Focused on Remaining Potential

Test Full Prospect Inventory

North Slope Renaissance

Robust Outlook with Challenges

ConocoPhillips' Alaska Outlook¹

- ConocoPhillips production outlook shows ~100,000 BOED increase over next ten years ¹
- ConocoPhillips has discovered 500 MMBOE to 1.1 BBOE since 2016 – 75% of portfolio still untested
- Transformation driven by competitive fiscal framework, technology and exploration successes
- New developments pending across the North Slope leading to significant new production, new revenues and job growth
- Maintaining Alaska's competitiveness is critical
 - Current fiscal framework helps keep Alaska in the game – L48 competition
 - Fish habitat ballot measure threatens North Slope oil and gas development
