Subject: HB 153

I am in favor of the HB 153 renewable energy bill. It's purpose is to expand our electricity mix and reduce long-term costs while creating new opportunities. It applies to the Railbelt grid, which powers over 75% of Alaskans, from Fairbanks to Homer.

Even though we will be reliant on natural gas for a long time to come, this bill will develop our substantial, local energy resources and reduce our need for expensive imported gas by committing to local, stably-priced energy.

I urge you to pass HB 153. Thank you.

With gratitude,

Constance Markis

Anchorage, Alaska
