

Letters of Support

SB 1

ALASKA SMOKE-FREE WORKPLACES

EVERYONE HAS THE RIGHT TO BREATHE SMOKE-FREE AIR.

Resolutions of Support for a Statewide Smoke-Free Workplace Law

This is a list of over 860 Alaska businesses and organizations who have signed a resolution in support of a statewide smoke-free indoor workplace law.

They come from businesses and organizations large and small, representing nearly every industry in Alaska. They cross all community and cultural lines. Broken out regionally, you will find they are also representative of every corner of The Great Land. From north to south, east to west, it's time for Alaska to have smoke-free workplaces!

DEPARTMENT OF HEALTH & HUMAN SERVICES

Public Health Service

Centers for Disease Control
and Prevention (CDC)
Atlanta GA 30341-3724

**TESTIMONY ON THE SCIENTIFIC EVIDENCE ON THE PUBLIC HEALTH EFFECTS OF
SECONDHAND SMOKE AND ELECTRONIC NICOTINE DELIVERY SYSTEMS AEROSOL**

**BRIAN KING, PHD, MPH
DEPUTY DIRECTOR FOR RESEARCH TRANSLATION (ACTING)
OFFICE ON SMOKING AND HEALTH
NATIONAL CENTER FOR CHRONIC DISEASE PREVENTION AND HEALTH PROMOTION
U.S. CENTERS FOR DISEASE CONTROL AND PREVENTION**

**ALASKA STATE LEGISLATURE
JUNEAU, ALASKA**

February 12, 2015

Thank you for the opportunity to submit testimony today about the health impact of secondhand smoke exposure and aerosol from electronic nicotine delivery systems, including e-cigarettes. I am Dr. Brian King with the Office on Smoking and Health, Centers for Disease Control and Prevention (CDC), the lead Federal agency for comprehensive tobacco prevention and control. I am the author of over 50 peer-reviewed scientific articles on tobacco prevention and control. I am also a contributing author to the 50th anniversary Surgeon General's report, *The Health Consequences of Smoking—50 Years of Progress*, as well as the lead author of CDC's 2014 evidence-based state guide, *Best Practices for Comprehensive Tobacco Control Programs*. I am an international subject matter expert on the issue of secondhand smoke, and have worked for nearly a decade to provide sound scientific evidence to inform tobacco control policy and practice, as well as to effectively communicate this information to key stakeholders at the national, state, and local levels. I am also an international subject matter expert on electronic nicotine delivery systems and have authored multiple peer-reviewed publications on the issues of electronic nicotine delivery system use among adults and youth, susceptibility among youth, and public health policy related to these products.

For the record, I am submitting expert written testimony today at the request of Alison Kulas, Program Manager of the state of Alaska's Tobacco Prevention and Control Program, to discuss the scientific evidence for eliminating exposure to secondhand smoke, as well as the public health effects of electronic nicotine delivery systems, including exposure to the aerosol emitted from these products.

Also for the record, this testimony is not for or against any specific legislative proposal.

The Health Effects of Secondhand Smoke Exposure

I will begin by discussing the harms of secondhand smoke exposure, which has a robust scientific evidence base reflecting decades of research.

Secondhand smoke from burning tobacco products is deadly. In adults, secondhand smoke exposure causes stroke, lung cancer, and coronary heart disease, as well as nasal irritation and reproductive effects in women, such as low birth weight.¹ Children who are exposed to secondhand smoke are at an increased risk for sudden infant death syndrome (SIDS), acute respiratory infections such as pneumonia and bronchitis, middle ear disease, more severe asthma, respiratory symptoms, and slowed lung growth.¹

The scientific evidence on the harmful effects of secondhand smoke exposure is well-documented. The Surgeon General first concluded that secondhand smoke causes lung cancer in 1986.² In 2006, the Surgeon General's Report on *The Health Consequences of Involuntary Exposure to Tobacco Smoke* concluded that there is no risk-free level of secondhand smoke exposure.³ Separating smokers and nonsmokers, using designated smoking areas, cleaning or filtering the air, and using separately ventilated areas do not work.³

In 2010, the Surgeon General's Report on *How Tobacco Smoke Causes Disease* reaffirmed the conclusion that there is no risk-free level of exposure to tobacco smoke.⁴ The report and subsequent findings also documented how the complex mix of chemicals in tobacco smoke causes disease, including finding that cigarette smoke contains 7,000 chemicals, 250 of which are toxic and nearly 70 of which cause cancer.^{1,4}

In 2014, the 50th Anniversary Surgeon General's Report on *The Health Consequences of Smoking* further affirmed these findings.¹ The report estimates that secondhand smoke exposure increases the risk of stroke by 20 to 30%.¹

The effects of secondhand smoke exposure on the body are immediate.³ A 2011 study reported that secondhand smoke exposure can produce adverse inflammatory and respiratory effects within 60 minutes of exposure and that these effects persist for at least three hours after the exposure.⁵ These findings are significant; the concern is not just secondhand smoke exposure for guests during a meal at a restaurant, but also the compounded health effects for an employee working an eight-hour shift in a smoke-filled restaurant or bar.³

The Burden of Secondhand Smoke Exposure

Secondhand smoke exposure costs nonsmokers—especially vulnerable populations, such as children—their health and wellbeing. These costs are born not just by individuals, but by society: exposure to secondhand smoke costs the United States billions of dollars in lost productivity and medical expenses every year.¹

As a result of the considerable body of evidence documenting the adverse effects of secondhand smoke, substantial progress has been made toward eliminating nonsmokers' exposure to this preventable health hazard over the last 50 years.¹ Recent assessments of cotinine, a metabolite of nicotine and biomarker of recent secondhand smoke exposure, indicates that about 1 in 4 Americans continue to be exposed to secondhand smoke.⁶

In the past 50 years, secondhand smoke exposure is estimated to have caused nearly 2.5 million deaths in nonsmoking Americans.¹ Each year, an estimated 7,330 lung cancer deaths and 33,950 coronary heart disease deaths are attributable to secondhand smoke exposure.¹ The smoking-attributable economic costs in the United States also include about \$5.6 billion in lost productivity every year due to secondhand smoke exposure.¹ Many of these deaths and this lost productivity could be prevented if comprehensive smokefree laws prohibiting smoking in all indoor areas of worksites, restaurants, and bars were implemented nationwide.¹

Preventing Secondhand Smoke Exposure

We know what works to prevent these harms. In 2006, the Surgeon General concluded that eliminating smoking in indoor spaces is the only way to fully protect nonsmokers from secondhand smoke exposure.³ In 2009, the World Health Organization's International Agency for Research on Cancer reiterated these findings, concluding that smokefree policies lead to substantial declines in secondhand smoke exposure, citing air quality improvements of up to 90% in high-risk settings, such as bars.⁷

The latest Surgeon General's report delved deeper into the science behind the success of smokefree laws in protecting people's health. Specifically, the report concluded that smokefree laws directly cause reductions in coronary events (especially heart attacks), making comprehensive smokefree laws one of the most effective and cost-effective approaches for reducing heart disease—the leading cause of death—in the country.¹

Finally, beyond reducing exposure to secondhand smoke, smokefree laws also lower smoking rates as a whole, especially among vulnerable youth and young adults.¹ Both the Surgeon General and the U.S. Guide to Community Preventive Services conclude that smokefree laws in workplaces and communities help smokers quit and reduce tobacco use.^{1,8} In addition, smokefree workplaces and communities make youth and young adults less likely to start smoking due to a number of factors, including lower visibility of people who smoke, fewer opportunities to smoke alone or with others, and reduced social acceptability for smoking.¹ The implementation of smokefree laws also increase the adoption of voluntary smokefree rules in homes, which can further protect nonsmokers—especially the most vulnerable that are exposed to secondhand smoke in the home, such as children.¹

CDC defines a comprehensive smokefree law as one that prohibits smoking at all times, in all indoor areas of all workplaces and public places, including restaurants and bars. If a law allows exemptions for designated or ventilated smoking areas in workplaces, restaurants or bars, the state or community is not considered to have a comprehensive smokefree law. As of January 2015, CDC has determined that 26 states, Puerto Rico, the District of Columbia, and over 697 other communities in the United States have comprehensive smokefree laws in effect.^{9,10}

Smokefree policies in hospitality venues such as restaurants, bars, and casinos protect employees and patrons from the health effects of secondhand smoke. These policies are associated with improved indoor air quality and with reduced secondhand smoke exposure, reduced sensory and respiratory symptoms, and improved lung function in nonsmoking employees, which translates into improved productivity.² Comprehensive smokefree laws

are also associated with rapid reductions in hospitalizations due to heart attacks and strokes.¹¹ These improvements occur within months after implementation.^{12,13} For instance, in Colorado, following the implementation of a comprehensive smokefree law in 2006, the state saw a 23 percent drop in ambulance calls from these venues.¹⁴ However, there was no change in ambulance calls from casinos until the law was expanded in 2008 to include casinos—after which, ambulance calls from casinos dropped nearly 20 percent.¹⁴ Again, this illustrates that these health improvements are lifesaving and nearly immediate.

The Business Case for Smokefree Laws

The evidence concerning the economic impact of smokefree laws is also well-documented. In 2006, the Surgeon General concluded that “evidence from peer-reviewed studies shows that smokefree policies and regulations do not have an adverse economic impact on the hospitality industry.”³

These findings have been replicated numerous times at the international, state, and local levels.^{1,3,7} In 2009, the International Agency for Research on Cancer conducted a comprehensive review of 97 studies from eight countries on the economic impact of smokefree policies and found that studies consistently conclude that smokefree policies do not harm business.⁷

At the state and local level, studies consistently reiterate these conclusions. The largest analysis of the impact of local smokefree ordinances, which examined nine states (Alabama, Indiana, Kentucky, Mississippi, Missouri, South Carolina, Texas, and West Virginia), found that smokefree laws do not have a negative impact on either employment or sales in restaurants and bars.¹⁵ A study of El Paso, Texas’s smokefree policy found that the law had no effect on restaurant and bar revenue.¹⁶ Furthermore, a 2007 study on the economic impact of a smokefree law in Lexington-Fayette County, Kentucky found that “no important economic harm stemmed from the smoke-free legislation...despite the fact that Lexington is located in a tobacco-producing state with higher-than-average smoking rates.”¹⁷

Further reviews of the literature have also found that, in some cases, a smokefree policy produces positive effects for local businesses.^{18,19,20} A number of cities and localities have experienced these positive effects. For instance, an in-depth analysis of tax revenue data in California after the state implemented their smokefree restaurant law (in 1995) and bar law (in 1998) found that the smokefree restaurant law was associated with an increase in restaurant revenues, and the smokefree bar law was associated with an increase in bar revenues.²¹ Additionally, just one year after implementation of the New York City smokefree law, an evaluation found that restaurant and bar revenues in New York City increased by 8.7% from April 2003 through January 2004.²²

These economic impact studies highlight one of the key benefits to implementing a comprehensive smokefree law, rather than relying on voluntary policies: an equal playing field for businesses. Businesses can compete fully on their merits, while protecting the health of their workers and patrons and promoting healthy communities.

Electronic Nicotine Delivery Systems

I will now summarize the current market and regulation of electronic nicotine delivery systems, or ENDS, as well as the current scientific literature on these products, including the effect of ENDS aerosol on nonusers.

The Current Regulation of Electronic Nicotine Delivery Systems

E-cigarettes are part of a class of products often referred to as electronic nicotine delivery systems (ENDS), which are battery-powered devices that provide doses of nicotine and other additives to the user in an aerosol.²³ There are currently multiple types of ENDS on the U.S. market, including e-cigarettes, e-hookahs, hookah pens, vape pens, e-cigars, and others. Some of these products are disposable varieties, while others can be refilled or recharged for repeated use.

ENDS, including e-cigarettes, are currently not regulated by the U.S. Food and Drug Administration (FDA) under the Family Smoking Prevention and Tobacco Control Act (FSPTCA), although FDA issued a proposed rule in April 2014 to regulate them under its tobacco product authorities.²⁴ FDA's authority, however, does not extend to certain key policy interventions related to ENDS, such as use in public places.²⁴

Absent federal regulation, the current landscape of ENDS—including product design and availability, sales, marketing, use, and related legislation—is one of rapid change and high variability. Furthermore, given that ENDS have only recently entered the U.S. market, significant questions remain regarding ENDS' safety.

Scientific Evidence of the Health Effects of Electronic Nicotine Delivery Systems

We have very little information about the ingredients of ENDS liquids, or the exposure to harmful and potentially harmful constituents when using electronic cigarettes over the short-term or long-term. To date, manufacturers are not required to publish what chemicals are in the ENDS solution, or to perform or reveal results from systematic testing. Studies have demonstrated wide variability in design, operation, and contents and emissions of carcinogens, other toxicants, and nicotine from ENDS.¹ Depending on the brand, ENDS cartridges typically contain nicotine, a component to produce the aerosol (e.g., propylene glycol or glycerol), and flavorings (e.g., fruit, mint, or chocolate).²⁵ Harmful or potentially harmful constituents have also been documented in some ENDS, including tobacco-specific nitrosamines, aldehydes, metals, volatile organic compounds, phenolic compounds, polycyclic aromatic hydrocarbons, and tobacco alkaloids, but at lower levels than in conventional cigarettes.²⁶ However, because there are hundreds of manufacturers and no manufacturing standards, there is no way to ensure that all ENDS have acceptably low levels of toxicants.

Smokefree Laws and ENDS

ENDS aerosol is not “water vapor.” It contains nicotine and can contain additional toxins, and thus, it is not as safe as clean air.²⁷

Although nicotine exposure in the absence of combustion is less hazardous than exposure to combusted conventional tobacco products, nicotine itself is not without risk.^{1,28} Nicotine is addictive.¹ Pregnant women can transfer nicotine to their developing fetus, which can be toxic.¹ The evidence is also suggestive that nicotine exposure during adolescence may have lasting adverse consequences for brain development.¹ And for non-smokers, nicotine is an acute irritant, potentially causing headache, nausea, and discomfort; for former smokers, nicotine exposure can trigger cravings jeopardizing their abstinence.^{29,30}

Furthermore, beyond the concerns of nonuser exposure to nicotine, there are also reports in the news media about the potential for e-cigarettes to be altered to deliver other psychoactive substances such as THC, the active ingredient in marijuana.^{31,32} Like nicotine, in an aerosolized form, THC is largely odorless, making it very difficult for the public to discern if they have been exposed.

Air containing ENDS aerosol is less safe than clean air, and ENDS use has the potential to involuntarily expose children and adolescents, pregnant women, and non-users to aerosolized nicotine and, if the products are altered, to other psychoactive substances. In fact, research has documented the presence of secondhand nicotine exposure using environmental monitoring and the measurement of biomarkers among exposed nonusers.³³ Therefore, clean air—free of both smoke and ENDS aerosol—remains the standard to protect health.

As of November 2014, three states and over 200 localities nationwide have incorporated ENDS into their smokefree laws.³⁴ In fact, North Dakota, the most recent state to pass a comprehensive statewide smokefree law, included the prohibition of ENDS use in indoor public places, including restaurants and bars.³⁴

Conclusion

ENDS have a range of potential impacts on individual and population health, and significant questions remain regarding their safety. However, given that these products emit nicotine—a psychoactive drug that can harm those involuntarily exposed—and other toxins, ENDS use should be prohibited in all places where smoking is prohibited in order to: protect children and adolescents, pregnant women, and non-smokers from involuntary exposure to aerosolized nicotine and potentially to other psychoactive substances, support enforcement of clean indoor air policies, and prevent renormalization of tobacco use.^{1,34}

While we continue to learn more about the specific health effects of ENDS, the evidence shows that secondhand smoke causes considerable death and disease, costing the United States billions every year in direct health care costs and lost productivity. And unlike many other health hazards, these harms are completely preventable.

Thank you.

To: Sen. Peter Micciche
Subject: Our Support for SB 1

Dear Senator Micciche:

As health care providers we, Fairbanks Memorial Hospital and Denali Center, witness the health repercussions of secondhand smoke regularly. As a community owned hospital, and the only hospital in the Interior, we feel a deep sense of obligation to do what we can to keep our community, and those we serve, as healthy as possible. It's for these reasons that we express our support for SB 1, which would prohibit smoking in businesses and public places.

Secondhand smoke is much more than a nuisance. It causes cancer and it can cause heart disease and stroke. It makes children more susceptible to serious infections, worsened asthma and slow lung growth. Pregnant women who breathe secondhand smoke are more likely to miscarry or have a baby with a low birth weight.

The Centers for Disease Control and Prevention states that no level of exposure to secondhand smoke is safe and that ventilation is not enough to protect people. The World Health Organization agrees that establishing a smoke-free workplace is the only way to protect workers.

In 2007, Fairbanks Memorial Hospital/Denali Center became a smoke-free facility. To achieve this, we started with a year-long campaign promoting the upcoming change, and followed up with practical support to employees who smoked, providing nicotine patches, a smoking-cessation counselor and extensive education.

Employees and members of our community both expressed support for our decision to go smoke-free. In fact, almost nine in 10 adults in Alaska believe people should be protected from secondhand smoke, according to Alaska Tobacco Facts, 2014 Update. That includes eight in 10 smokers.

As you know, the health ramifications of smoking and secondhand smoke are expensive for the state. "In 2012, tobacco use cost Alaska an estimated \$370 million in direct medical expenditures and an additional \$231 million in lost productivity due to tobacco-related deaths," according to the Alaska Tobacco Facts report.

The main argument raised against SB 1 seems to be that e-cigarettes are included in the ban. E-cigarettes have been studied less than cigarettes, so we don't know as much about their dangers, yet. However, the World Health Organization advises that they be included in such bans, stating that they do release toxic substances. In addition, children have been poisoned from drinking the liquid in e-cigarettes.

At Fairbanks Memorial Hospital/Denali Center we enthusiastically applaud the Senate for taking on such a polarizing, but extremely important subject. We look forward to the day when we no longer see individuals - adults and children alike - being treated in our hospital because of a toxin in the air that they had no way to avoid.

Sincerely,

Mike Powers

Adopted on: 02/19/2015

**KODIAK ISLAND BOROUGH
RESOLUTION NO. FY2015-17**

**A RESOLUTION OF THE ASSEMBLY OF THE KODIAK ISLAND BOROUGH
SUPPORTING A LAW IN ALASKA TO MAKE ALL WORKPLACES 100%
SMOKE FREE TO PROTECT THE HEALTH AND SAFETY OF ALL WORKERS
AND VISITORS FROM THE DANGERS OF SECONDHAND SMOKE**

WHEREAS, secondhand smoke contains more than 7,000 chemicals, including at least 69 of which are known to cause cancer, including formaldehyde, benzene, vinyl chloride, arsenic, ammonia and hydrogen cyanide, and people who are exposed to secondhand smoke are inhaling many of the same cancer-causing substances and poisons as smokers; and

WHEREAS, numerous studies have found that tobacco smoke is a major contributor to indoor air pollution and that breathing secondhand smoke is a cause of disease in healthy nonsmokers, including heart disease, stroke, respiratory disease and lung cancer; and

WHEREAS, the 2006 U.S. Surgeon General's Report, *"The Health Consequences of Involuntary Exposure to Tobacco Smoke,"* concluded that there is no risk-free level of exposure to secondhand smoke; ventilation and other air cleaning technologies cannot eliminate exposure of nonsmokers to secondhand smoke; and smokefree workplace policies are the only effective way to eliminate secondhand smoke exposure in the workplace; and

WHEREAS, the 2010 U.S. Surgeon General's Report, *"How Tobacco Smoke Causes Disease,"* determined that even occasional exposure to secondhand smoke is harmful; and

WHEREAS, there are serious questions about the safety of inhaling the substances in some e-cigarette aerosol, and ecigarettes have not been subject to thorough, independent testing, making it difficult for users to be sure of what they are actually inhaling. Some studies have shown that some e-cigarettes can cause short-term lung changes and irritations and the long-term health effects, are unknown; and

WHEREAS, for every nine smokers who die, one nonsmoker dies from exposure to secondhand smoke; and

WHEREAS, approximately half of Alaska's population is not protected by a smokefree workplace law; and

WHEREAS, among those who work primarily indoors, young adults aged 18 to 29 are significantly less likely to be protected by a smokefree indoor workplace policy than other Alaska adults; and

WHEREAS, research in communities where smokefree laws have been adopted has consistently shown neutral or positive economic effects to the hospitality industry following a smokefree workplace requirement; and

CITY OF SOLDOTNA
RESOLUTION 2015-014

A RESOLUTION SUPPORTING SENATE BILL 1, REGULATION OF SMOKING

WHEREAS, tobacco use is the leading preventable cause of disease and death in Alaska; and

WHEREAS, SB 1 prohibits smoking in public spaces, in certain enclosed areas, including workplaces, child and adult care facilities, and in certain outdoor spaces; and

WHEREAS, the intent of this bill is to reduce tobacco use overall, reduce health care costs and to reduce the exposure of second hand smoke;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SOLDOTNA, ALASKA:

Section 1. The Soldotna City Council urges the 29th Alaska State Legislature to enact SB 1 "An Act prohibiting smoking in certain places; relating to education on the smoking prohibition; and providing for an effective date."

Section 2. That a copy of this resolution will be sent to Senate sponsor Peter A. Micciche and to Health & Social Services Committee Chair, Senator Bert Stedman.

Section 3. This resolution shall become effective immediately upon its adoption.

ADOPTED BY THE CITY COUNCIL THIS 25TH DAY OF FEBRUARY, 2015.

Subject: Support SB 1- Realize Bad Interior Air Pollution is also as hazardous as 2nd hand cigarette smoke.

Senators,

I am in support of SB 1. I have a son who has congenital heart problems and even going in and out of airports for travel to health care is sometimes clouded with entryway smokers. Taking it outdoors is important, but I hope SB 1 will also include setbacks for public places like airports.

Please note that hundreds of current, reputable research articles clearly state that wood smoke is even more toxic than second hand smoke and should be considered every bit as dangerous. My son misses school on a regular basis because of the poor air quality in Fairbanks and the risk it poses to him. When he must stay home, I miss work.

I am concerned that even some members of our Interior Delegation are not taking this problem seriously enough. We need to clean up our air now. The way to reduce air pollution is to reduce burning.

The FNSB should alter its stove change out program to only include propane stoves from now on. More wood stoves can only mean more burning. What gain has been made in efficiencies has been lost mostly due to increased number of wood burners. Despite what you may hear, our air quality is worse everywhere in the borough, except the Down Town SLAMS monitor where regulations are in place by the city of Fairbanks to regulate burning. The rest of the borough has no regulation at this time. Propane stoves will be magnitudes cleaner and move us in the direction of natural gas and can be converted from propane to natural gas with an inexpensive (\$10.00-\$12.00) conversion plate. Please fund money to convert "Essential Burners" (those with only wood or coal to burn) and others qualified, to propane for the coming season.

Consider the following excerpt:

From the 2014 article-

<http://www.adn.com/article/20140912/protect-your-lungs-treat-wood-smoke-cigarette-smoke>

The Author, Dr. Brian Moench, is a respected, nationally recognized anesthesiologist in Utah and is a leader with the Utah Physicians for Social Responsibility. He has reported widely in most mainstream media.

'Wood smoke is uniquely toxic among all sources of urban air pollution. For example, the EPA estimates that the lifetime cancer risk from wood stove smoke is 12 times greater than that from an equal volume of secondhand tobacco smoke. Particles in wood smoke are extraordinarily small, behaving essentially like gases, making them easy to inhale but less likely to be exhaled. They are then distributed by the blood throughout the body, causing inflammation and biologic disruption wherever they go. Attached to these tiny particles are at least 200 of the most toxic compounds known -- dioxins, furans, formaldehyde, heavy metals and polycyclic aromatic hydrocarbons. One fireplace burning 10 pounds of wood in an hour will generate nearly as many polycyclic aromatic hydrocarbons as 3,000 packs of cigarettes. No one in their right mind, even a smoker, would think lighting up 3,000 packs of cigarettes every hour during a cozy winter evening would be a good idea.

The free-radical chemicals in wood smoke are active 40 times as long as those from cigarette smoke, resulting in a greatly prolonged opportunity to seriously damage cells. Studies show that even the chromosomes in those cells can be impaired literally within minutes of exposure.'

A check of the obituaries in the Fairbanks Daily Newsminer in recent months should raise concerns as the number of people dying of cancer, unexplained cardiac events and those in the 49-62 year old range is alarming.

Two schools, Weller Elementary and Tanana Middle School were smoked out by residential wood smoke in Jan. 2015. The construction debris from the Klondike Hotel was burned during an air quality alert over several days, triggering community outrage and many complaints. The ADEC is presently dealing with this. The Weller incident was report by staff to the school district and the Tanana incident, which resulted in fire alarms going off and the complete evacuation of the school was well investigated by the fire department and reported to the ADEC. NO School children should be exposed in this manner.

The Fairbanks Memorial Hospital has started a new study to correlate ER/Admission visits with poor air quality. As stated at a recent Town Hall Meeting, hosted by the Borough Assembly, the correlation, even in its early stages is positive.

The Alaska State Constitution Article VII includes the important provision to "provide for the promotion and protection of public health" and "provide for public welfare". I urge you to keep that responsibility in mind as you move forward to pass SB 1 and take decisive, supportive measures to clean up the air in the Fairbanks North Star Borough. Please consider a resolution in support of a local solution to our problem, or a bill directing the state to promote/openly support an Air Quality State Implementation Program that is complete, adequate, and protective, or better yet, provide for the ADEC and Troopers with citation and enforcement authority for the laws that currently exist.

We are often in a sea of 2nd hand smoke, even when there is no inversion and the temperature is unseasonably warm. Please see attached photo. The power plant smoke stack showing its plume heading strait up indicates there is no inversion present. The temperature was 4 degrees F, warm for February.

This is a health and safety issue. Please set politics aside.

Very Sincerely,

Patrice Lee

Subject: smoke free workplaces

Dear Senators,

I am writing to you in favor of the smoke free workplace ordinance for Alaska currently being evaluated. Speaking as a physician this is clearly the correct choice from a health standpoint. The health effects of second hand smoke were first described a number of decades ago and the data is mounting re its negative effects. Second hand smoke contains more than 4,000 chemicals at least 250 of them are known to cause cancer. It is now estimated to cause 3,400 death from lung cancer. More startling is the estimated 22,700-69,600 deaths per year from heart disease. A person inhales second hand smoke and a heart attack results. This can happen to people with known heart disease but also to those without known heart disease. In addition it can aggravate asthma in some patients. Second hand smoke has been shown to cause chronic rhinosinusitis in exposed persons.

Looking at banning workplace second hand smoke also makes sense from an economic standpoint. Second hand smoke can affect productivity by contributing to more illness and work absence.

The typical worker exposed to second hand smoke is a blue collar lower income worker. They often times do not have much power in their work environment. They are reluctant to confront management for fear of losing their jobs.

I urge you to support a smoke free workplace for all of Alaskan workers.

Sincerely,

Beth A. Baker, M.D., ACCP, ACP,

Chuck Kopp

FW: I Support SB1

Mar 3, 2015

**Senator Peter Micciche
State Capitol, Room 514
120 Fourth Street
Juneau, AK 99801-1182**

Dear Senator Micciche,

Twenty-five years ago, today, all domestic airline flights were made smokefree, for the protection of flight crews' lungs. Smokefree flights protect millions of people from the health risks of secondhand smoke in the air, but currently in Alaska, thousands of workers face the same health hazards from secondhand smoke exposure that flight attendants did a quarter century ago. Now is the time to pass legislation to protect all Alaskans from the hazards of secondhand smoke. Senate Bill 1 provides for the protection of all Alaskans from the dangers of secondhand smoke and e-cig aerosol, by asking those who do smoke or vape to take it outside.

According to the U.S. Surgeon General, there is no risk-free level of exposure to secondhand smoke, and the only effective protection is to completely eliminate indoor smoking. Even brief exposure can be harmful to health. Secondhand smoke contains more than 7,000 chemicals, including 11 cancer-causing poisons and 250 known toxins. Health risks from secondhand exposure include lung cancer, heart disease and stroke and, among children, SIDS, childhood asthma and chronic ear infections.

The U.S. Centers for Disease Control and Prevention reports secondhand smoke exposure results in more than 30,000 heart disease deaths and more than 7,000 lung disease deaths in non-smokers each year.

All Alaskans deserve the right to breathe clean air at work. It's about health, and it's about time.

Thanks to Senator Micciche for sponsoring this bill!!

I ask for your support in moving Senate Bill 1 out of committee, and ultimately to pass it, to protect all workers and visitors in Alaska from indoor secondhand smoke exposure.

Sincerely,

**Ms. Kathy East
1610 Silver Pines Rd
Kenai, AK 99611-9008**

Dear Senator Micciche,

I'm writing to you today as your constituent to urge you to vote YES on Senate Bill 1, Smoke-Free Workplaces. Everyone has the right to breathe smoke-free air. In a day and age where common sense is anything but common, its one simple truth you can take to the bank.

Everyone is free to make their own choices. But, when it comes to secondhand smoke (and e-cigarette aerosol, for that matter) they are free to keep it to themselves and TAKE IT OUTSIDE! If they are willing to pay the consequences for their choices, so be it. But no one else should have to bear the consequences alongside them.

That's why I support SB 1 to get the smoke out of all Alaska workplaces. Thanks for your help in protecting everyone's right to breathe smoke-free air.

Sincerely,

Ms. Cassandra Winslow

CITY OF SOLDOTNA
RESOLUTION 2015-014

A RESOLUTION SUPPORTING SENATE BILL 1, REGULATION OF SMOKING

WHEREAS, tobacco use is the leading preventable cause of disease and death in Alaska; and

WHEREAS, SB 1 prohibits smoking in public spaces, in certain enclosed areas, including workplaces, child and adult care facilities, and in certain outdoor spaces; and

WHEREAS, the intent of this bill is to reduce tobacco use overall, reduce health care costs and to reduce the exposure of second hand smoke;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SOLDOTNA, ALASKA:

Section 1. The Soldotna City Council urges the 29th Alaska State Legislature to enact SB 1 "An Act prohibiting smoking in certain places; relating to education on the smoking prohibition; and providing for an effective date."

Section 2. That a copy of this resolution will be sent to Senate sponsor Peter A. Micciche and to Health & Social Services Committee Chair, Senator Bert Stedman.

Section 3. This resolution shall become effective immediately upon its adoption.

ADOPTED BY THE CITY COUNCIL THIS 25TH DAY OF FEBRUARY, 2015.

Mar 3, 2015

Senator Peter Micciche
State Capitol, Room 514
120 Fourth Street
Juneau, AK 99801-1182

Dear Senator Micciche,

Twenty-five years ago, today, all domestic airline flights were made smokefree, for the protection of flight crews' lungs. Smokefree flights protect millions of people from the health risks of secondhand smoke in the air, but currently in Alaska, thousands of workers face the same health hazards from secondhand smoke exposure that flight attendants did a quarter century ago. Now is the time to pass legislation to protect all Alaskans from the hazards of secondhand smoke. Senate Bill 1 provides for the protection of all Alaskans from the dangers of secondhand smoke and e-cig aerosol, by asking those who do smoke or vape to take it outside.

According to the U.S. Surgeon General, there is no risk-free level of exposure to secondhand smoke, and the only effective protection is to completely eliminate indoor smoking. Even brief exposure can be harmful to health. Secondhand smoke contains more than 7,000 chemicals, including 11 cancer-causing poisons and 250 known toxins. Health risks from secondhand exposure include lung cancer, heart disease and stroke and, among children, SIDS, childhood asthma and chronic ear infections.

The U.S. Centers for Disease Control and Prevention reports secondhand smoke exposure results in more than 30,000 heart disease deaths and more than 7,000 lung disease deaths in non-smokers each year.

All Alaskans deserve the right to breathe clean air at work. It's about health, and it's about time.

Thanks to Senator Micciche for sponsoring this bill!!

I ask for your support in moving Senate Bill 1 out of committee, and ultimately to pass it, to protect all workers and visitors in Alaska from indoor secondhand smoke exposure.

Sincerely,

Ms. Kathy East

No. 3641 P. 2/2

Comments From Doug Osborne - Sitka.

Received PED

FEB 11 2015

I support this policy and this bill

Protecting people's right to breath clean air is the right thing to do and its time that Alaska finally has a comprehensive clean air policy that will protect everyone in our state.

This bill does not prohibit smoking it just requires that people can work and get in and out of buildings without breathing fumes that kill people. Secondhand smoke kills and there are no safe levels of exposure.

This bill has widespread support because it makes sense and will ultimately be beneficial to non-smokers and smokers alike.

If this bill passes the total number of cigarette ~~smokers~~ smokers will fall. This will help some special people who are struggling with a tough addiction. ~~many people who are struggling with a tough addiction.~~

Comprehensive Clean air policies are an important part of reasonable approach to addressing a public health issue that hurts our economy and our quality of life.

Please support this bill and please make sure that entry walls are protected for brothers. Thank you.

BILL # or SUBJECT: SB1
COMMITTEE: SH & SS DATE: 2-11-15

My name is Pamela Howard and I live in Soldotna, AK. I have been a school nurse for 28 years and would like to thank you for considering SB1 as I have concerns for my student's health who are exposed to second hand smoke when they begin working on jobs, whether from tobacco, marijuana, or aerosol in "vaping". Student attendance is impacted by upper respiratory conditions from exposure to smoke. I remember my first job and I didn't feel like I could say anything about how the smoke bothered me because I didn't want to lose my job. I have never smoked but now have asthma due to exposure. Yesterday I taught a class at the alternative high school and I asked them if they agreed or disagreed with SB1. They all agreed, even the smokers! They knew their choice impacted them, but didn't want to be responsible for impacting the health of others. I am glad we have the ability to protect our future generations through this law. Thank you!

BILL # or SUBJECT:

SSSB 1

COMMITTEE:

SHSS

DATE:

2/11/15

For five years, I worked in a building that shared walls and a ventilation system with a pull tab parlor. Every day by 1:30pm, and often even earlier, the secondhand smoke became so thick in our offices that we had to leave early for the day.

We begged the landlord to require that the business next door take their smoking outside, but he refused. Finally, after five years of burning lungs and stinging eyes, and in order to preserve our health we were forced to break our lease and move to a smokefree building across town.

No worker should EVER have to choose between their job and their health. SBI will protect all Alaskan workers from being exposed to secondhand smoke and secondhand aerosol from e-cigarettes at their job. It's time to make this happen!

Thank you.

BILL # or SUBJECT: SB# 1
COMMITTEE: SH#55 DATE: 2-11-15

The Kenai Peninsula Borough cannot pass Comprehensive Smokefree Workplaces because of the lack of Health powers. SB# 1 is a chance for us to protect the health of us all.

As a cancer survivor I am especially sensitive to this issue. I also work as a volunteer at the hospital and sadly see those who are suffering from those effects — which often included special smoking areas in their workplaces.

This is about the rights of employees. Just as asbestos cannot be tolerated, because tobacco smoke is unhealthy, often deadly, it cannot be tolerated.

Ultimately we all pay the price for health costs in that ERs must treat everyone & those of us w/ insurance and government entities take up the slack.

I was in Ottawa ^{CANADA} when they went smokefree and the bars (which seem to draw the most attention) were packed and it was freezing outside where they went to smoke.

Alaska State Legislature

Please enter into the record my testimony to the Senate Health & Social Services
Committee name

Committee on SBI, dated 2/11/15
Bill/Subject

I come today to support Senate Bill 1. This is not a smoker versus non-smoker debate. It is a movement to protect the rights of all Alaskans to Breathe Smoke Free Air. We know tobacco products are known carcinogens and can cause adverse health effects. Therefore we ask smokers to reduce risks to others and smoke outdoors, away from people. When we knew that was bad in paint we removed it, when we knew asbestos was in our insulation in our homes we removed it for the health of all people. We know tobacco products are dangerous to our health and need to protect the health of those who do not want to be exposed to known carcinogens. How many people have to die before we stop this practice. We have the science and knowledge to support the dangers of smoking and second and third hand exposure. We need to protect all Alaskans. If people choose to smoke that is their right but it is not their right to compromise my right to breathe smoke free air. You are all our elected officials who could help protect the health of all Alaskans and charitably reduce health care costs to this state across the board. Thank you for your consideration in support of Senate Bill 1.

TESTIMONY

Gerald Timmons, Fairbanks, Alaska
Representing myself, business owner in Fairbanks and Anchorage
I am a Lifelong Non Smoker. Never ever smoked.

I came to Alaska in the early 1960's and after graduating in Forestry became a career employee of the Bureau of Land Management in 1966.

My first professional meeting for BLM was in a smoke filled room with me being the only "non-smoker". That continued until 1983 when I left BLM. Smoke filled rooms that would choke you, but I had to adapt. No choice.

About 3 months ago an unrelated heart scan found two very small 1 cm nodules on my left lung and two enlarged Lymph Nodes. A follow up CT Scan confirmed those findings and although my local doctor thought they did not look cancerous, I flew to Mayo Clinic in Minnesota for a second opinion. A PET scan confirmed cancer of the lymph nodes and a Surgical Team met with me that day reviewing options.

The next morning, November 13, 2014, minor surgery to remove those expanded to a Lobectomy removing my entire upper lobe of my left lung and the cancerous sections of the Lower Lobe with a diagnosis of Stage III b T4 non-small cell Lung Cancer.

Survival odds and longevity tables for this stage lung cancer are dismal. However, I remain optimistic as my surgeon believes he removed all cancer and got it in time. My commitment to the horrible chemo will hopefully kill remaining cancer cells in the body and I shall remain vigilant. Radiation is a further option and my Oncology team has found a genetic mutation with my cancer that may provide further ability to slow future cell growth.

My surgical team of lung doctors believe I was no more than two months away from the cancer metastasizing. I have been leaving Fairbanks every three weeks since surgery and flying to MSP for massive doses of chemo at Mayo.

My life has been filled with Second Hand Smoke from others. I did not have a choice in the 1970's if I wanted to keep my job. I had to attend meetings and I was the only non-smoker. Incidentally, I am the only remaining person from that group that remains alive.

My doctors and I blame my Lung Cancer on "Second Hand Smoke" in the work place.

November's surgical costs and hospital time was about \$55,000. My chemo treatments are in excess of \$6,000 every three weeks. I am a candidate for a Clinical Trial thru Mayo, however its a Blind Trial and I could be on the end of a Placebo and not know.

I am normally a conservative business owner, not believing in government regulations and directions. However, when employees are subject to life changing issues beyond their control if they want a job, its a no brainer. We must pass this legislation to protect our Alaska work force.

We have a responsibility to those in our work place that can't control the air they breathe. Thank you Senator Minnichie for sponsoring this long over due legislation.

Gerald D. Timmons

Subject: Re: SB 1 Regulation of Smoking 1:30 PM Public Testimony

Please add the following to the public comments for the Health and Social Services Committee on SB1, Regulation of Smoking, which is meeting today, Feb. 11, at 1:30 PM:

I have been a resident of Sitka, Alaska since 1984. I am employed at Alaska Marine Safety Education Association here. I strongly believe in and promote healthy and safe choices for individuals and community. I would like to urge you to support Senate Bill 1, the Take it Outside Act, because it is has been shown that secondhand smoke contributes to preventable illness and death. Employees in workplaces allowing smoking are putting their health and lives at risk and they sometimes don't have a choice. Local communities throughout the state are electing to eliminate secondhand smoke from inside public buildings and workplaces but not all businesses do it. A statewide law would create a standard that would put all businesses and workplaces on a level playing field. No one should have to choose between their health and a good job.

Please support Senate Bill 1 for a statewide smoke-free workplace law.

Thank you,
Amy Blair

Subject: Senate Bill 1 - Take it Outside Act

Dear Elected Representative,

I am writing as both an Alaskan mother and as a physician to urge you to show your support for Senate Bill 1, the Take it Outside Act.

I feel very fortunate to live in a community that has a local smoke-free ordinance, and I feel strongly that all Alaskans should have the same benefit.

It is irrefutable that second-hand smoke causes health problems including heart disease and cancer. Those who have not chosen to smoke, but have chosen to make a living as they are able, should not be forced to bear the health risks that exposure to smoker's exhaust entails. In addition, customers of these same businesses are also subject to these risks, sometimes without even realizing it. We are well aware of the personal and family heartache, as well as the huge financial toll, that smoking-related diseases can create.

Some of our communities are in boroughs that don't even have the power to pass a local ordinance to address this issue. It's time for all of us to pitch in and help the people who live in these communities. I want you, as my elected representative, to support the bill for a statewide smoke-free workplace law.

Thank you for your time in serving our state.

Sincerely,

Jennifer McNichol, M.D.

I Support SB1 because this is a public health issue.

I support the U of A in stopping smoking on all state campuses and will/would support page 2 lines 4-7 and Page 4 lines 1 and 2 because private clubs are becoming barren for smokers - and the non smokers are dropping out of the clubs because of their own personal health reasons. The club I'm involved in has lost 60% of its membership do to smoking in the club house.

Please Support Senate Bill #1

Testimony by Andrea Thomas to
Senate Health & Social Services Committee on
February 11, 2015

I am in support of SBI. To me one side is influenced by tobacco companies, who are focused on their bottom line & getting & keeping people addicted to their products, including our children. There are also unfounded fears by businesses and a minority of smokers who feel they have the right to hurt others with secondhand smoke. On the other hand the majority of Alaskans support smoke free workplaces from Nome to Klawock. Many boroughs don't have the powers to pass smoke free ordinances. Hundreds of letters have been sent in support of smoke free workplaces. There is also the indisputable proof that secondhand smoke is toxic. Also the majority of states have smoke free laws, also whole countries, are smoke free & have proven that business impacts show a status quo or positive effect. Everyone deserves to breathe smoke free air in workplaces.

I hope that when you put your hands in front of you to weigh the issue that tobacco companies & unfounded fears hand falls to the table & public health & protecting people is raised high.
Please support SBI

Subject: Senate Bill 1

I am currently a family nurse practitioner at SEARHC and have been a nurse practitioner for over 20 years. I have frequently seen the effects of second hand smoke on children with asthma or who have respiratory infections. They wheeze more and have more trouble breathing requiring more medications. There is no amount of second hand smoke that is safe.

When there are smokers clustered right outside the entrances to offices, stores, bars, the patrons can be exposed to second hand smoke intensely even if it is a brief period of time. The public should not have to endure that and run the gauntlet of smokers to enter an establishment.

I personally have had to hold my breath while entering a building if there are smokers right at the door. My clothes will still catch the odor and stay with me as third hand smoke.

I care about my health and the health of my patients. Please support SB1.

Thank you,

Mary Barrett, FNP-BC

Subject: Please Support SB 1

Dear Senator, by now you have heard the clear message regarding what Alaskans have to gain from SB 1 and a smoke free Alaska. Community members all around Alaska have made their voices heard by electing to protect all people from the negative effects of secondhand smoke in public places. This policy is good for individuals, good for businesses, good for communities, and very good for Alaska. I ask for your support on this bill as proposed and endorsed by the Alaska tobacco Control Alliance. This bill will bring the benefits that most of us enjoy to many disparate groups that are not given a choice to have this basic right. This bill is simple, practical, and essential and Alaska is ready. Thank you.

- Smoking rooms and ventilation systems do not address the health hazards of secondhand smoke.
- Bar staff have to breathe at work just like everyone else.
- It's time for the Alaska legislature to protect all workers from secondhand smoke.

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

Just as you represent Alaskans, so do I. I am the first National Hero of Hope (2012) for the American Cancer Society. This is a volunteer position I take very seriously. As I 13 time cancer survivor, and entering my 14th battle, I urge you to support SB 1. Several of my cancers are directly impacted due to second hand smoke for 20 years (both parents smoked) at home and in business work places.

SB 1 would allow me to frequent many businesses I can't due to tobacco smoke or e-cigarette vapor. I makes sense and CENTS for the STATE to go smoke free. I'm sure by now you know that businesses in cities such as Palmer, report an actual INCREASE in business revenue, and repeat clientele plus a welcome addition of NEW clientele since going smoke-free.

I makes sense to support SB 1, especially since Alaska is the ONLY state where (lung) cancer is the #1 killer - all other states have heart disease as #1 killer, with obesity closing in fast. Think of the health care savings due to cancer that could be reduced if SB 1 were supported.

I want to celebrate many more birthdays as an Alaskan. Please help me, by voting in support of SB 1. Thanks!

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Mrs. Care Tuk

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

Smoke free will save lives!

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Mrs. Ronnie Denius

Just as you represent Alaskans, so do I. I am the first National Hero of Hope (2012) for the American Cancer Society. This is a volunteer position I take very seriously. As I 13 time cancer survivor, and entering my 14th battle, I urge you to support SB 1. Several of my cancers are directly impacted due to second hand smoke for 20 years (both parents smoked) - at home and in business work places.

SB 1 would allow me to frequent many businesses I can't due to tobacco smoke or e-cigarette vapor. I makes sense and CENTS for the STATE to go smoke free. I'm sure by now you know that businesses in cities such as Palmer, report an actual INCREASE in business revenue, and repeat clientele plus a welcome addition of NEW clientele since going smoke-free.

I makes sense to support SB 1, especially since Alaska is the ONLY state where (lung) cancer is the #1 killer - all other states have heart disease as #1 killer, with obesity closing in fast. Think of the health care savings due to cancer that could be reduced if SB 1 were supported.

Feb 11, 2015

Senator Peter Micciche
State Capitol, Room 125
120 Fourth Street
Juneau, AK 99801-1182

Dear Senator Micciche,

I'm writing to you today as your constituent to urge you to vote YES on Senate Bill 1, Smoke-Free Workplaces. Everyone has the right to breathe smoke-free air. In a day and age where common sense is anything but common, its one simple truth you can take to the bank.

As a single 30-something professional, I enjoy a healthy lifestyle and a lucrative career. I enjoy going out with my friends to restaurants and bars, and many times spending considerable money. What I don't enjoy, however, is smelling like an ashtray after a few minutes in an establishment that allows smoking. What's even worse is considering what effects the smoke is having when it enters unbidden into my lungs.

If this is argued as an economic hardship on establishments that would be forced to have clients smoke outside - I call BS. My friends and I are the most prime target demographic. We have the money to sustain businesses, we have the technological wherewithal to endorse the businesses we enjoy on social media, and we are not dying off or suffering from horrendous adverse health effects from smoking. Everyone is free to make their own choices. But, when it comes to secondhand smoke and e-cigarette aerosol they are free to keep it to themselves.

If they are willing to pay the consequences for their choices, so be it. But no one else should have to bear the consequences alongside them. Be smart, Alaska. Let's consider the 10 year plan the right way - by passing SB 1.

That's why I support SB 1 to get the smoke out of all Alaska workplaces. Thanks for your help in protecting everyone's right to breathe smoke-free air.

Sincerely,

Michael Crawford

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

I am a survivor and I lost my wife to Breast cancer 2 years ago, so I have personal experience and knowledge of the dangers of cancer. I am also a hospice volunteer and have seen what secondhand smoke can do to people who have never smoked. We need to realize that even though everyone is free to decide if we want to poison ourselves by smoking, we do not have the right to poison others with our secondhand smoke.

It's time to make a stand against toxic secondhand smoke in the work place, so if folks want to smoke they are free to step it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

SB 1 – Support

Dear Sen. Micciche,

On behalf of AARP Alaska's 86,000 members, we are pleased to support passage and enactment of SB 1, which provides for smoke-free workplaces and public spaces statewide. Voluminous scientific evidence spanning many decades has demonstrated without doubt the serious risks to health caused by tobacco and second-hand smoke. Smoking represents one of the most preventable causes of lung and heart disease which cost lives and money.

Living in Anchorage, where smoke-free workplaces has been the norm for many years, it is easy to see the benefits of such a law, as well as the positive results it has for businesses. Having a statewide statute answers the concerns of businesses that worry about a level playing field. All employees, and customers, deserve to breathe clean air. Far from taking away freedom, this law restores freedom from unwanted second-hand smoke.

Additionally, we support the provisions of SB 1 to prohibit the use of electronic cigarettes, or vaping, in the workplace. Evidence is mounting that the vapors contain toxins of their own which can present significant risk to health of others in proximity.

The bill in no way prohibits anyone from smoking or vaping. It merely prevents them from harming others.

We join with the thousands of individuals, the hundreds of businesses, and the vast majority of health care professionals who have indicated their support for smoke-free Alaskan workplaces. Thank you very much for sponsoring this bill.

Respectfully,

Ken Helander
Advocacy Director

Marie Darlin
Coordinator, AARP Capitol City Task Force

Subject: Support SB 1- Realize Bad Interior Air Pollution is also as hazardous as 2nd hand cigarette smoke.
Attachments: Air Pollution Fairbanks 21515.jpg
Follow Up Flag: Follow up
Flag Status: Flagged

Senators,

I am in support of SB 1. I have a son who has congenital heart problems and even going in and out of airports for travel to health care is sometimes clouded with entryway smokers. Taking it outdoors is important, but I hope SB 1 will also include setbacks for public places like airports.

Please note that hundreds of current, reputable research articles clearly state that wood smoke is even more toxic than second hand smoke and should be considered every bit as dangerous. My son misses school on a regular basis because of the poor air quality in Fairbanks and the risk it poses to him. When he must stay home, I miss work.

I am concerned that even some members of our Interior Delegation are not taking this problem seriously enough. We need to clean up our air now. The way to reduce air pollution is to reduce burning.

The FNSB should alter its stove change out program to only include propane stoves from now on. More wood stoves can only mean more burning. What gain has been made in efficiencies has been lost mostly due to increased number of wood burners. Despite what you may hear, our air quality is worse everywhere in the borough, except the Down Town SLAMS monitor where regulations are in place by the city of Fairbanks to regulate burning. The rest of the borough has no regulation at this time. Propane stoves will be magnitudes cleaner and move us in the direction of natural gas and can be converted from propane to natural gas with an inexpensive (\$10.00-\$12.00) conversion plate. Please fund money to convert "Essential Burners" (those with only wood or coal to burn) and others qualified, to propane for the coming season.

Consider the following excerpt:

From the 2014 article-

<http://www.adn.com/article/20140912/protect-your-lungs-treat-wood-smoke-cigarette-smoke>

The Author, Dr. Brian Moench, is a respected, nationally recognized anesthesiologist in Utah and is a leader with the Utah Physicians for Social Responsibility. He has reported widely in most mainstream media.

Wood smoke is uniquely toxic among all sources of urban air pollution. For example, the EPA estimates that the lifetime cancer risk from wood stove smoke is 12 times greater than that from an equal volume of secondhand tobacco smoke. Particles in wood smoke are extraordinarily small, behaving essentially like gases, making them easy to inhale but less likely to be exhaled. They are then distributed by the blood throughout the body, causing inflammation and biologic disruption wherever they go. Attached to these tiny particles are at least 200 of the most toxic compounds known -- dioxins, furans, formaldehyde, heavy metals and polycyclic aromatic hydrocarbons. One fireplace burning 10 pounds of wood in an hour will generate nearly as many polycyclic aromatic hydrocarbons as 3,000 packs of cigarettes. No one in their right mind, even a smoker, would think lighting up 3,000 packs of cigarettes every hour during a cozy winter evening would be a good idea.

The free-radical chemicals in wood smoke are active 40 times as long as those from cigarette smoke, resulting in a greatly prolonged opportunity to seriously damage cells. Studies show that even the chromosomes in those cells can be impaired literally within minutes of exposure.'

A check of the obituaries in the Fairbanks Daily Newsminer in recent months should raise concerns as the number of people dying of cancer, unexplained cardiac events and those in the 49-62 year old range is alarming.

Two schools, Weller Elementary and Tanana Middle School were smoked out by residential wood smoke in Jan. 2015. The construction debris from the Klondike Hotel was burned during an air quality alert over several days, triggering community outrage and many complaints. The ADEC is presently dealing with this. The Weller incident was report by staff to the school district and the Tanana incident, which resulted in fire alarms going off and the complete evacuation of the school was well investigated by the fire department and reported to the ADEC. NO School children should be exposed in this manner.

The Fairbanks Memorial Hospital has started a new study to correlate ER/Admission visits with poor air quality. As stated at a recent Town Hall Meeting, hosted by the Borough Assembly, the correlation, even in its early stages is positive.

The Alaska State Constitution Article VII includes the important provision to "provide for the promotion and protection of public health" and "provide for public welfare". I urge you to keep that responsibility in mind as you move forward to pass SB 1 and take decisive, supportive measures to clean up the air in the Fairbanks North Star Borough. Please consider a resolution in support of a local solution to our problem, or a bill directing the state to promote/openly support an Air Quality State Implementation Program that is complete, adequate, and protective, or better yet, provide for the ADEC and Troopers with citation and enforcement authority for the laws that currently exist.

We are often in a sea of 2nd hand smoke, even when there is no inversion and the temperature is unseasonably warm. Please see attached photo. The power plant smoke stack showing its plume heading strait up indicates there is no inversion present. The temperature was 4 degrees F, warm for February.

This is a health and safety issue. Please set politics aside.

Very Sincerely,

Patrice Lee

Subject: Please Oppose SB 1 and HB 40 and any other effort to treat e-cigarettes like smoking.

Damian Rolland
4100 N. Campbell Rd.
Palmer, AK 99645

January 28, 2015

Dear Bert Stedman,

I am writing to express my deep concern and opposition regarding HB 40 and SB 1 which would include the use of smoke-free vapor products (e-cigarettes) in Alaska's smoking law.

Smoking laws are ostensibly enacted to protect the public from the harm of secondhand smoke, but smoke-free e-cigarettes have not been shown to cause harm to bystanders. In fact, all evidence to date shows that the low health risks associated with e-cigarettes are comparable to other smokeless nicotine products. A comprehensive review conducted by Dr. Igor Burstyn of Drexel University School of Public Health (and published in a peer-reviewed journal earlier this year - <http://www.biomedcentral.com/1471-2458/14/18/abstract>) examined over 9,000 observations of e-cigarette liquid and vapor and found "no apparent concern" for bystanders exposed to e-cigarette vapor, even under "worst case" assumptions about exposure.

Lawmakers must beware of unintended consequences from well-intentioned laws. There is clear evidence of a phenomenon called "accidental quitting," wherein many of the smokers who initially choose e-cigarettes to use just where smoking is prohibited go on to quit smoking conventional cigarettes completely. Prohibiting the use of e-cigarettes in public spaces completely eliminates that incentive to even try e-cigarettes. Unfortunately, the health risks of every one smoker who doesn't quit because e-cigarette use is prohibited (and the risks to the children and others who live with them) cumulatively outweigh any good done by eliminating the miniscule exposures to even hundreds of bystanders in public spaces.

Clearly, the benefits of allowing smokers to use e-cigarettes in public--and thereby increasing the likelihood of "accidental quitting" and reducing the known, extremely high health risks of smoking--outweigh the very low risks of insignificant exposures to bystanders. So, not only is there no genuine public health reason to prohibit e-cigarette use in public spaces, but, in fact, allowing e-cigarettes to be used in public spaces will actually improve public health by inspiring other smokers to switch and reduce their health risks by an estimated 99%. Moreover, private businesses in Alaska are already setting their own policies, and they should retain the right to allow or disallow usage since there is no proven health threat to bystanders.

While I understand some have expressed a fear about these products acting as a "gateway" to traditional cigarettes for youth, there is no evidence to suggest this is really happening, and research actually shows it is unlikely to happen to any substantial extent. Teen smoking rates are at their lowest point since smoking became popular and continue to drop, but there are adults who will continue to smoke until they die unless we provide attractive alternatives.

I urge you to oppose these bills and any legislation that would limit where smoke-free products like e-cigarettes can be used. It is imperative that existing adult smokers become aware of all the alternatives currently available and that access to these products remains unimpeded.

I look forward to your response on this issue. I, along with my fellow members of CASAA (Consumer Advocates for Smoke-free Alternatives Association), thank you for considering my comments and hope you will oppose misguided attempts to limit adult use of smoke-free e-cigarettes.

Sincerely,
Damian Rolland

WRITTEN TESTIMONY

NAME: Carol Crandall
REPRESENTING: SELF

BILL#/ SUBJECT: #1 PUBLIC SMOKING PROHIBITION

COMMITTEE &
HEARING DATE: SHSS 2-11-5 1:30 PM

I am in support of Senate Bill No. 1, because I believe everyone has a right to breathe clean air. My husband had heart surgery and I have allergies, which prohibits us from participating at functions in organizations we belong to because of the smoking policy. I believe you need to pass this bill for the greater good of the people of Alaska!

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to
you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Ms. Finley Baird

Subject: Support SB 1- Realize Bad Interior Air Pollution is also as hazardous as 2nd hand cigarette smoke.

Senators,

I am in support of SB 1. I have a son who has congenital heart problems and even going in and out of airports for travel to health care is sometimes clouded with entryway smokers. Taking it outdoors is important, but I hope SB 1 will also include setbacks for public places like airports.

Please note that hundreds of current, reputable research articles clearly state that wood smoke is even more toxic than second hand smoke and should be considered every bit as dangerous. My son misses school on a regular basis because of the poor air quality in Fairbanks and the risk it poses to him. When he must stay home, I miss work.

I am concerned that even some members of our Interior Delegation are not taking this problem seriously enough. We need to clean up our air now. The way to reduce air pollution is to reduce burning.

The FNSB should alter its stove change out program to only include propane stoves from now on. More wood stoves can only mean more burning. What gain has been made in efficiencies has been lost mostly due to increased number of wood burners. Despite what you may hear, our air quality is worse everywhere in the borough, except the Down Town SLAMS monitor where regulations are in place by the city of Fairbanks to regulate burning. The rest of the borough has no regulation at this time. Propane stoves will be magnitudes cleaner and move us in the direction of natural gas and can be converted from propane to natural gas with an inexpensive (\$10.00-\$12.00) conversion plate. Please fund money to convert "Essential Burners" (those with only wood or coal to burn) and others qualified, to propane for the coming season.

Consider the following excerpt:

From the 2014 article-

<http://www.adn.com/article/20140912/protect-your-lungs-treat-wood-smoke-cigarette-smoke>

The Author, Dr. Brian Moench, is a respected, nationally recognized anesthesiologist in Utah and is a leader with the Utah Physicians for Social Responsibility. He has reported widely in most mainstream media.

'Wood smoke is uniquely toxic among all sources of urban air pollution. For example, the EPA estimates that the lifetime cancer risk from wood stove smoke is 12 times greater than that from an equal volume of secondhand tobacco smoke. Particles in wood smoke are extraordinarily small, behaving essentially like gases, making them easy to inhale but less likely to be exhaled. They are then distributed by the blood throughout the body, causing inflammation and biologic disruption wherever they go. Attached to these tiny particles are at least 200 of the most toxic compounds known -- dioxins, furans, formaldehyde, heavy metals and polycyclic aromatic hydrocarbons. One fireplace burning 10 pounds of wood in an hour will generate nearly as many polycyclic aromatic hydrocarbons as 3,000 packs of cigarettes. No one in their right mind, even a smoker, would think lighting up 3,000 packs of cigarettes every hour during a cozy winter evening would be a good idea.

The free-radical chemicals in wood smoke are active 40 times as long as those from cigarette smoke, resulting in a greatly prolonged opportunity to seriously damage cells. Studies show that even the chromosomes in those cells can be impaired literally within minutes of exposure.'

A check of the obituaries in the Fairbanks Daily Newsminer in recent months should raise concerns as the number of people dying of cancer, unexplained cardiac events and those in the 49-62 year old range is alarming.

Two schools, Weller Elementary and Tanana Middle School were smoked out by residential wood smoke in Jan. 2015. The construction debris from the Klondike Hotel was burned during an air quality alert over several days, triggering community outrage and many complaints. The ADEC is presently dealing with this. The Weller incident was report by staff to the school district and the Tanana incident, which resulted in fire alarms going off and the complete evacuation of the school was well investigated by the fire department and reported to the ADEC. NO School children should be exposed in this manner.

The Fairbanks Memorial Hospital has started a new study to correlate ER/Admission visits with poor air quality. As stated at a recent Town Hall Meeting, hosted by the Borough Assembly, the correlation, even in its early stages is positive.

The Alaska State Constitution Article VII includes the important provision to "provide for the promotion and protection of public health" and "provide for public welfare". I urge you to keep that responsibility in mind as you move forward to pass SB 1 and take decisive, supportive measures to clean up the air in the Fairbanks North Star Borough. Please consider a resolution in support of a local solution to our problem, or a bill directing the state to promote/openly support an Air Quality State Implementation Program that is complete, adequate, and protective, or better yet, provide for the ADEC and Troopers with citation and enforcement authority for the laws that currently exist.

We are often in a sea of 2nd hand smoke, even when there is no inversion and the temperature is unseasonably warm. Please see attached photo. The power plant smoke stack showing its plume heading strait up indicates there is no inversion present. The temperature was 4 degrees F, warm for February.

This is a health and safety issue. Please set politics aside.

Very Sincerely,

Patrice Lee

Subject: smoke free workplaces

Dear Senators,

I am writing to you in favor of the smoke free workplace ordinance for Alaska currently being evaluated. Speaking as a physician this is clearly the correct choice from a health standpoint. The health effects of second hand smoke were first described a number of decades ago and the data is mounting re its negative effects. Second hand smoke contains more than 4,000 chemicals at least 250 of them are known to cause cancer. It is now estimated to cause 3,400 death from lung cancer. More startling is the estimated 22,700-69,600 deaths per year from heart disease. A person inhales second hand smoke and a heart attack results. This can happen to people with known heart disease but also to those without known heart disease. In addition it can aggravate asthma in some patients. Second hand smoke has been shown to cause chronic rhinosinusitis in exposed persons.

Looking at banning workplace second hand smoke also makes sense from an economic standpoint. Second hand smoke can affect productivity by contributing to more illness and work absence.

The typical worker exposed to second hand smoke is a blue collar lower income worker. They often times do not have much power in their work environment. They are reluctant to confront management for fear of losing their jobs.

I urge you to support a smoke free workplace for all of Alaskan workers.

Sincerely,

Beth A. Baker, M.D., ACCP, ACP,

Chuck Kopp

FW: I Support SB1

Mar 3, 2015

**Senator Peter Micciche
State Capitol, Room 514
120 Fourth Street
Juneau, AK 99801-1182**

Dear Senator Micciche,

Twenty-five years ago, today, all domestic airline flights were made smokefree, for the protection of flight crews' lungs. Smokefree flights protect millions of people from the health risks of secondhand smoke in the air, but currently in Alaska, thousands of workers face the same health hazards from secondhand smoke exposure that flight attendants did a quarter century ago. Now is the time to pass legislation to protect all Alaskans from the hazards of secondhand smoke. Senate Bill 1 provides for the protection of all Alaskans from the dangers of secondhand smoke and e-cig aerosol, by asking those who do smoke or vape to take it outside.

According to the U.S. Surgeon General, there is no risk-free level of exposure to secondhand smoke, and the only effective protection is to completely eliminate indoor smoking. Even brief exposure can be harmful to health. Secondhand smoke contains more than 7,000 chemicals, including 11 cancer-causing poisons and 250 known toxins. Health risks from secondhand exposure include lung cancer, heart disease and stroke and, among children, SIDS, childhood asthma and chronic ear infections.

The U.S. Centers for Disease Control and Prevention reports secondhand smoke exposure results in more than 30,000 heart disease deaths and more than 7,000 lung disease deaths in non-smokers each year.

All Alaskans deserve the right to breathe clean air at work. It's about health, and it's about time.

Thanks to Senator Micciche for sponsoring this bill!!

I ask for your support in moving Senate Bill 1 out of committee, and ultimately to pass it, to protect all workers and visitors in Alaska from indoor secondhand smoke exposure.

Sincerely,

**Ms. Kathy East

Subject: Our Support for SB 1

Dear Senator Micciche:

As health care providers we, Fairbanks Memorial Hospital and Denali Center, witness the health repercussions of secondhand smoke regularly. As a community owned hospital, and the only hospital in the Interior, we feel a deep sense of obligation to do what we can to keep our community, and those we serve, as healthy as possible. It's for these reasons that we express our support for SB 1, which would prohibit smoking in businesses and public places.

Secondhand smoke is much more than a nuisance. It causes cancer and it can cause heart disease and stroke. It makes children more susceptible to serious infections, worsened asthma and slow lung growth. Pregnant women who breathe secondhand smoke are more likely to miscarry or have a baby with a low birth weight.

The Centers for Disease Control and Prevention states that no level of exposure to secondhand smoke is safe and that ventilation is not enough to protect people. The World Health Organization agrees that establishing a smoke-free workplace is the only way to protect workers.

In 2007, Fairbanks Memorial Hospital/Denali Center became a smoke-free facility. To achieve this, we started with a year-long campaign promoting the upcoming change, and followed up with practical support to employees who smoked, providing nicotine patches, a smoking-cessation counselor and extensive education.

Employees and members of our community both expressed support for our decision to go smoke-free. In fact, almost nine in 10 adults in Alaska believe people should be protected from secondhand smoke, according to Alaska Tobacco Facts, 2014 Update. That includes eight in 10 smokers.

As you know, the health ramifications of smoking and secondhand smoke are expensive for the state. "In 2012, tobacco use cost Alaska an estimated \$370 million in direct medical expenditures and an additional \$231 million in lost productivity due to tobacco-related deaths," according to the Alaska Tobacco Facts report.

The main argument raised against SB 1 seems to be that e-cigarettes are included in the ban. E-cigarettes have been studied less than cigarettes, so we don't know as much about their dangers, yet. However, the World Health Organization advises that they be included in such bans, stating that they do release toxic substances. In addition, children have been poisoned from drinking the liquid in e-cigarettes.

At Fairbanks Memorial Hospital/Denali Center we enthusiastically applaud the Senate for taking on such a polarizing, but extremely important subject. We look forward to the day when we no longer see individuals - adults and children alike - being treated in our hospital because of a toxin in the air that they had no way to avoid.

Sincerely,

Mike Powers

Dear Senator Micciche,

I'm writing to you today as your constituent to urge you to vote YES on Senate Bill 1, Smoke-Free Workplaces. Everyone has the right to breathe smoke-free air. In a day and age where common sense is anything but common, its one simple truth you can take to the bank.

Being a 30+ ex-smoker, I never realized the impact my smoking choices had on others around me, especially my family. Now I can smell a smoker from twenty feet away... And yes, everyone is free to make their own choices. But, when it comes to secondhand smoke (and e-cigarette aerosol, for that matter) they are free to keep it to themselves and TAKE IT OUTSIDE! If they are willing to pay the consequences for their choices, so be it. But no one else should have to bear the consequences alongside them.

That's why I support SB 1 to get the smoke out of all Alaska workplaces. Thanks for your help in protecting everyone's right to breathe smoke-free air.

Sincerely,

Mr. Tony Oliver

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Ms. Sunni Danielowski

Bill/Subject

Hello, my name is Maggie Auble and I am
a life long resident of the Mat-Su Valley.

Born in Anchorage 31 years ago, my parents moved to
the valley when I was a newborn. I am a
non-smoker and have been enjoying visiting all the
Smoke-Free establishments in Palmer. Businesses that I used to
not go to when they had smoking I now visit regularly.
There are several places in Wasilla that I will not
visit because of the smoking.

I believe that no business should allow smoking
in its premises. No one should be exposed to
second hand smoke. I urge you to please support
Senate Bill 1. Thank you for your consideration.

Subject: In Support of SB1

Dear Members of the Senate Health & Social Services Committee:

In past positions, when I was young and poor, I was subject to smoke in my workplace. I knowingly compromised my health out of immediate short term economic necessity. I regret having done that and wish that no one would ever have to face that daunting choice.

To ensure that no Alaskan ever does have to make that decision, I appeal to you to pass SB1. This will be one of the most significant acts of your Legislative service. It will produce immediate results statewide, as it already has in Juneau, Anchorage and many places around the US and the World.

Thank you for your service!

Joan Cahill

TESTIMONY

Gerald Timmons, Fairbanks, Alaska
Representing myself, business owner in Fairbanks and Anchorage
I am a Lifelong Non Smoker. Never ever smoked.

I came to Alaska in the early 1960's and after graduating in Forestry became a career employee of the Bureau of Land Management in 1966.

My first professional meeting for BLM was in a smoke filled room with me being the only "non-smoker". That continued until 1983 when I left BLM. Smoke filled rooms that would choke you, but I had to adapt. No choice.

About 3 months ago an unrelated heart scan found two very small 1 cm nodules on my left lung and two enlarged Lymph Nodes. A follow up CT Scan confirmed those findings and although my local doctor thought they did not look cancerous, I flew to Mayo Clinic in Minnesota for a second opinion. A PET scan confirmed cancer of the lymph nodes and a Surgical Team met with me that day reviewing options.

The next morning, November 13, 2014, minor surgery to remove those expanded to a Lobectomy removing my entire upper lobe of my left lung and the cancerous sections of the Lower Lobe with a diagnosis of Stage III b T4 non-small cell Lung Cancer.

Survival odds and longevity tables for this stage lung cancer are dismal. However, I remain optimistic as my surgeon believes he removed all cancer and got it in time. My commitment to the horrible chemo will hopefully kill remaining cancer cells in the body and I shall remain vigilant. Radiation is a further option and my Oncology team has found a genetic mutation with my cancer that may provide further ability to slow future cell growth.

My surgical team of lung doctors believe I was no more than two months away from the cancer metastasizing. I have been leaving Fairbanks every three weeks since surgery and flying to MSP for massive doses of chemo at Mayo.

My life has been filled with Second Hand Smoke from others. I did not have a choice in the 1970's if I wanted to keep my job. I had to attend meetings and I was the only non-smoker. Incidentally, I am the only remaining person from that group that remains alive.

My doctors and I blame my Lung Cancer on "Second Hand Smoke" in the work place.

November's surgical costs and hospital time was about \$55,000. My chemo treatments are in excess of \$6,000 every three weeks. I am a candidate for a Clinical Trial thru Mayo, however its a Blind Trial and I could be on the end of a Placebo and not know.

I am normally a conservative business owner, not believing in government regulations and directions. However, when employees are subject to life changing issues beyond their control if they want a job, its a no brainer. We must pass this legislation to protect our Alaska work force.

We have a responsibility to those in our work place that can't control the air they breathe. Thank you Senator Minnichie for sponsoring this long over due legislation.

Gerald D. Timmons

Subject: Re: SB 1 Regulation of Smoking 1:30 PM Public Testimony

Please add the following to the public comments for the Health and Social Services Committee on SB1, Regulation of Smoking, which is meeting today, Feb. 11, at 1:30 PM:

I have been a resident of Sitka, Alaska since 1984. I am employed at Alaska Marine Safety Education Association here. I strongly believe in and promote healthy and safe choices for individuals and community. I would like to urge you to support Senate Bill 1, the Take it Outside Act, because it is has been shown that secondhand smoke contributes to preventable illness and death. Employees in workplaces allowing smoking are putting their health and lives at risk and they sometimes don't have a choice. Local communities throughout the state are electing to eliminate secondhand smoke from inside public buildings and workplaces but not all businesses do it. A statewide law would create a standard that would put all businesses and workplaces on a level playing field. No one should have to choose between their health and a good job.

Please support Senate Bill 1 for a statewide smoke-free workplace law.

Thank you,
Amy Blair
Sitka, Alaska

No. 3641 P. 2/2

Comments from Doug Osborne - Sitka.

Received PED

FEB 11 2015

I support this policy and this bill

Protecting people's right to breath clean air is the right thing to do and its time that Alaska finally has a comprehensive clean air policy that will protect everyone in our state.

This bill does not prohibit smoking it just requires that people can work and get in and out of buildings without breathing fumes that kill people. Secondhand smoke kills and there are no safe levels of exposure.

This bill has widespread support because it makes sense and will ultimately be beneficial to non-smokers and smokers a like.

If this bill passes the total number of cigarette ~~smokers~~ smokers will fall. This will

help some special people who are struggling with a tough addiction. ~~many people who are struggling with a tough addiction.~~

Comprehensive Clean air policies are an important part of ~~reasonable~~ approach to addressing a public health issue that hurts our economy and our quality of life.

Please support this bill and please make sure that everyone's are protected for better. Thank you.

BILL#/ SUBJECT: #1 PUBLIC SMOKING PROHIBITION
COMMITTEE &
HEARING DATE: SHSS 2-11-5 1:30 PM

I wish to convey my strong
and profound support of Senate
Bill No. 1.

The issue of contaminating the free
air we all must breathe to live,
is a severe disregard for the health
and welfare of all of us who
must coexist with those offenders
of our right to breathe healthy ~~air~~ in
the public areas mentioned in this
bill.

With all certainty this bill is a
paramount one and emphatically
support the passing of it as
soon as possible.

Thank you

your constituent

Christie Mason of Delta Junction, AK

Thank you for taking time to hear my concerns with Senate bill 1 (SB1).

My name is Eric Vargason from North Pole, AK. I am no longer a smoker. I have tried numerous attempts to quit tobacco including gum, patches, therapy, counseling, thumb stones, assorted medication, including Chantix; many were recommended by the Alaska Quitline, none have worked for me and not for lack of trying. If you are questioning my motivation to quit, I was told if I didn't quit smoking I would die, that is plenty of motivation. Some of the recommendations even made my health conditions worse. After many failed attempts of using more mainstream ways of quitting tobacco, I found vaping. I haven't smoked since, and that was seven months ago. The last two years of using tobacco were my worst. I had diminished quality of life, loss of hope, and I would hang my head in shame while buying a pack of cigarettes. The past seven months I've noticed positive changes in my health and life. Now my breathing isn't labored, I feel energized, and I'm losing weight because I'm more active. I also have a great support network in the Alaskan vaping community. They help me stay tobacco free, for the first time in 23 years. That is over two decades that I have been dependent on tobacco products.

I have been six months without a lung infection, which were normal occurrences. I was often sick at work, due to my tobacco use. Since I have quite tobacco, I have been in good health and my productivity has gone up dramatically.

My family's health has improved as well, even though I never smoked inside, or around my daughter, this is the first winter that she has not required her inhaler. We had thought that it might be allergies, pollen, or other factors, but after a week of quitting tobacco she has been fine. My kids are proud to see that I have quit using tobacco products, my health has improved, as have theirs. I don't have any more regular check ups scheduled, and I will be around to enjoy more of their lives. Restricting alternatives to tobacco diminishes people's chances of quitting tobacco through alternative means. A medical research team from the University of London published in the British Journal of General Practice states "Given that smokers smoke for the nicotine but die primarily from the tar, one might imagine that e-cigarettes would be welcomed as a means to prevent much death and suffering caused by cigarettes." in conclusion I am proof that this works.

In regards to Senate Bill 1: I am Danny Ruerup and I am opposed to SB 1. This Bill is phrased as a direct attack to local small business. There needs to be some rewording to this bill to stand up for community members that run small business that this will in effect shutdown their livelihood. There is no one that will argue that smoking and tobacco products are not healthy and kill millions a year. There is no proof the e-juice and vaping products do any such thing. There is a great deal of research that needs to be done yet that will provide any type of conclusion to this question. Please do not include e cigarettes in this bill. The state obviously does not have the funding to police this situation anyways. I appreciate your time to allow me to voice my opinion.

Danny Ruerup

A handwritten signature in black ink, appearing to read 'D. Ruerup', written over a horizontal line.

I would like to thank you for allowing me to share my concerns with Senate Bill 1 (SB1).

My name is Jennifer Vargason of North Pole, Alaska.

Vaping has saved my family from the ball and chain of tobacco use. And I am thankful for that! I am healthier, my husband is healthier, and my family is healthier. Why this bill would consider vaping the same thing as smoking or a tobacco product is beyond me. Vapor products do not contain tobacco and there is no combustion! Current research has shown that vaping does not have the harmful effect of smoking and there are no concerns for bystanders. The ingredients in the liquid are in every day foods that we consume. Yes, there can be nicotine in the liquid but there have been studies that show that nicotine is not harmful. The article "Is everything we know about nicotine wrong?" Dr. Neff even states instances where nicotine has been known to help certain conditions such as Alzheimer's disease, depression, Parkinson's disease, and more. It has been found that in those demographics tobacco use is higher. Alternatives to tobacco could help these demographics.

I have been a tobacco user since I was 9 years old. Since then I have gone from Iqmik (natural tobacco mixed with punk ash), Copenhagen, to cigarettes and have never been able to quit. I will be honest and tell you that when I first came upon vaping, I rolled my eyes and thought that it was just another fad that does not work. I was disgusted that my husband would vape, I was ~~hesitant to even try it until I had witnessed my husband go~~ without a cigarette for over a month. I was amazed, as I had seen him try several different methods of quitting, none of which were successful. I did a little research, after seeing the results in person, and I decided to give it a try. When I started vaping, I vaped while I was off work, but I still used Iqmik during normal work hours. Since December of 2014, I have been without

Senator Stedman,

I hope this day finds you and your family well.

I am writing you this evening in regards to SB 1. My words will be few, and not as refined as I usually try to be.

Although I prefer to walk into a business that has chosen to be smoke free, and I think even many smokers enjoy to spend time in smoke free environments, I am against a State Law dictating that a private business not allow smoking. Most business are already smoke free, especially the ones that children are brought into. Yes, I do believe people have the right to breathe clean air, but they also have the right to make a choice and they have to accept the personal responsibility to not subject themselves or possibly their children to an environment that caters to smokers. This is true just as the owners of private businesses have the right to decide whether or not they allow smoking within their facilities.

I also understand that current and prospective employees have the right to breathe clean air, but they also have the choice and personal responsibility to not work in an establishment that allows smoking. What's more, in today's society most business owners have come to realize that they are severely limiting themselves of potential employees and patrons if they allow smoking within the confines of their establishment, this without written law.

I applaud and commend businesses who go smoke free on their own accord, but I can never support any Governmental Entity who uses force via legislation and consequence.

Thank you for your time and consideration.

God bless,

William M. Manuel, MICP, NR-P

To: Sen. Bert Stedman
Subject: Please Oppose SB 1 and HB 40 and any other effort to treat e-cigarettes like smoking.

David Paulsen
4501 Reka #1
Anchorage, AK 99508

February 12, 2015

Dear Bert Stedman,

I am writing to express my deep concern and opposition regarding HB 40 and SB 1 which would include the use of smoke-free vapor products (e-cigarettes) in Alaska's smoking law.

Smoking laws are ostensibly enacted to protect the public from the harm of secondhand smoke, but smoke-free e-cigarettes have not been shown to cause harm to bystanders. In fact, all evidence to date shows that the low health risks associated with e-cigarettes are comparable to other smokeless nicotine products. A comprehensive review conducted by Dr. Igor Burstyn of Drexel University School of Public Health (and published in a peer-reviewed journal earlier this year - <http://www.biomedcentral.com/1471-2458/14/18/abstract>) examined over 9,000 observations of e-cigarette use and vapor and found "no apparent concern" for bystanders exposed to e-cigarette vapor, even under "worst case" assumptions about exposure.

Lawmakers must beware of unintended consequences from well-intentioned laws. There is clear evidence of a phenomenon called "accidental quitting," wherein many of the smokers who initially choose e-cigarettes to use just where smoking is prohibited go on to quit smoking conventional cigarettes completely. Prohibiting the use of e-cigarettes in public spaces completely eliminates that incentive to even try e-cigarettes. Unfortunately, the health risks of every one smoker who doesn't quit because e-cigarette use is prohibited (and the risks to the children and others who live with them) cumulatively outweigh any good done by eliminating the miniscule exposures to even hundreds of bystanders in public spaces.

Clearly, the benefits of allowing smokers to use e-cigarettes in public--and thereby increasing the likelihood of "accidental quitting" and reducing the known, extremely high health risks of smoking--outweigh the very low risks of insignificant exposures to bystanders. So, not only is there no genuine public health reason to prohibit e-cigarette use in public spaces, but, in fact, allowing e-cigarettes to be used in public spaces will actually improve public health by inspiring other smokers to switch and reduce their health risks by an estimated 99%. Moreover, private businesses in Alaska are already setting their own policies, and they should retain the right to allow or disallow usage since there is no proven health threat to bystanders.

While I understand some have expressed a fear about these products acting as a "gateway" to traditional cigarettes for youth, there is no evidence to suggest this is really happening, and research actually shows it is unlikely to happen to any substantial extent. Teen smoking rates are at their lowest point since smoking became popular and continue to drop, but there are adults who will continue to smoke until they die unless we provide attractive alternatives.

I urge you to oppose these bills and any legislation that would limit where smoke-free products like e-cigarettes can be used. It is imperative that existing adult smokers become aware of all the alternatives currently available and that access to these products remains unimpeded.

I look forward to your response on this issue. I, along with my fellow members of CASAA (Consumer Advocates for Smoke-free Alternatives Association), thank you for considering my comments and hope you will oppose misguided attempts to limit adult use of smoke-free e-cigarettes.

Sincerely,
David Paulsen

My name is Pamela Howard and I live in Soldotna, AK. I have been a school nurse for 28 years and would like to thank you for considering SB1 as I have concerns for my student's health who are exposed to second hand smoke when they begin working on jobs, whether from tobacco, marijuana, or aerosol in "vaping". Student attendance is impacted by upper respiratory conditions from exposure to smoke. I remember my first job and I didn't feel like I could say anything about how the smoke bothered me because I didn't want to lose my job. I have never smoked but now have asthma due to exposure. Yesterday I taught a class at the alternative high school and I asked them if they agreed or disagreed with SB1. They all agreed, even the smokers! They know their choice impacted them, but didn't want to be responsible for impacting the health of others. I am glad we have the ability to protect our future generations through this law. Thank you!

SHSS

DATE:

2/11/15

For five years, I worked in a building that shared walls and a ventilation system with a pull tab parlor. Every day by 1:30pm, and often even earlier, the second hand smoke became so thick in our offices that we had to leave early for the day.

We begged the landlord to require that the business next door take their

smoking outside, but he refused. Finally, after five years of burning lungs and stinging eyes, and in order to preserve our health we were forced to break our lease and move to a smokefree building across town.

No workers should EVER have to choose between their job and their health. SBI will protect all Alaskan workers from being exposed to secondhand smoke and secondhand aerosol from e-cigarettes at their job. It's time to make this happen!

Thank you.

BILL # or SUBJECT:

SB# 1

COMMITTEE:

SH#55

DATE:

2-11-15

The Kenai Peninsula Borough cannot pass Comprehensive Smokefree Workplaces because of the lack of Health powers. SB# 1 is a chance for us to protect the health of us all.

As a cancer survivor I am especially sensitive to this issue. I also work as a volunteer at the hospital and sadly see those who are suffering from those effects — which often included special smoking areas in their workplaces.

This is about the rights of employees. Just as asbestos cannot be tolerated, because tobacco smoke is unhealthy, often deadly, it cannot be tolerated.

Ultimately we all pay the price for health costs in that ERs must treat everyone & those of us w/ insurance and government entities take up the slack.

I was in Ottawa ^{CANADA} when they went smokefree and the bars (which seem to draw the most attention) were packed and it was freezing outside where they went to smoke.

Committee name

Committee on SBI, dated 2/11/15
Bill/Subject

I come today to support Senate Bill 1. This is not a smoker versus non-smoker debate. It is a movement to protect the rights of all Alaskans to Breathe Smoke Free Air. We know tobacco products are known carcinogens and can cause adverse health effects. Therefore we ask smokers to reduce risks to others and smoke outdoors, away from people. When we knew that was bad in paint we removed it, when we knew asbestos was in our insulation in our homes we removed it for the health of all people. We know tobacco products are dangerous to our health and need to protect the health of those who do not want to be exposed to known carcinogens. How many people have to die before we stop this practice. We have in science and ^{Research} knowledge to support the dangers of smoking and second and third hand exposure. We need to protect all Alaskans. If people choose to smoke that is their right but it is not their right to compromise my right to breathe smoke free air. You are all our elected officials who could help protect the health of all Alaskans and financially reduce health care costs to the state across the board. Thank You for your consideration in support of Senate Bill 1.

Subject: Senate Bill 1 - Take it Outside Act

Dear Elected Representative,

I am writing as both an Alaskan mother and as a physician to urge you to show your support for Senate Bill 1, the Take it Outside Act.

I feel very fortunate to live in a community that has a local smoke-free ordinance, and I feel strongly that all Alaskans should have the same benefit.

It is irrefutable that second-hand smoke causes health problems including heart disease and cancer. Those who have not chosen to smoke, but have chosen to make a living as they are able, should not be forced to bear the health risks that exposure to smoker's exhaust entails. In addition, customers of these same businesses are also subject to these risks, sometimes without even realizing it. We are well aware of the personal and family heartache, as well as the huge financial toll, that smoking-related diseases can create.

Some of our communities are in boroughs that don't even have the power to pass a local ordinance to address this issue. It's time for all of us to pitch in and help the people who live in these communities. I want you, as my elected representative, to support the bill for a statewide smoke-free workplace law.

Thank you for your time in serving our state.

Sincerely,

Jennifer McNichol, M.D.

I Support SB1 because this is a public health issue.

I support the U of A in stopping smoking on all state campuses and will/would support page 2 lines 4-7 and Page 4 lines 1 and 2 because private clubs are becoming barren for smokers - and the non smokers are dropping out of the clubs because of their own personal health reasons. The Club I'm involved in has lost 60% of its membership do to smoking in the club house.

Please Support Senate Bill #1

testimony by Andrea Thomas to
Senate Health & Social Services Committee on
February 11, 2015

I am in support of SBI. To me one side is influenced by tobacco companies, who are focused on their bottom line & getting & keeping people addicted to their products, including our children. There are also unfounded fears by businesses and a minority of smokers who feel they have the right to hurt others with secondhand smoke. On the other hand the majority of Alaskans support smoke free workplaces from Nome to Kilaush. Many boroughs don't have the powers to pass smoke free ordinances. Hundreds of letters have been sent in support of smoke free work places. There is also the indisputable proof that secondhand smoke is toxic. Also the majority of states have smoke free laws, also whole countries, are smoke free & have proven that business impacts show a status quo or positive effect. Everyone deserves to breathe smoke free air in work places.

I hope that when you put your hands in front of you to weigh the issue that tobacco companies & unfounded fears have fallen to the table & public health & protecting people is raised high.
Please support SBI

Subject: Senate Bill 1

I am currently a family nurse practitioner at SEARHC and have been a nurse practitioner for over 20 years. I have frequently seen the effects of second hand smoke on children with asthma or who have respiratory infections. They wheeze more and have more trouble breathing requiring more medications. There is no amount of second hand smoke that is safe.

When there are smokers clustered right outside the entrances to offices, stores, bars, the patrons can be exposed to second hand smoke intensely even if it is a brief period of time. The public should not have to endure that and run the gauntlet of smokers to enter an establishment.

I personally have had to hold my breath while entering a building if there are smokers right at the door. My clothes will still catch the odor and stay with me as third hand smoke.

I care about my health and the health of my patients. Please support SB1.

Thank you,

Mary Barrett, FNP-BC

Comments From Doug Osborne - Sitka.

I support this policy and this bill

Protecting people's right to breath clean air is the right thing to do and it's time that Alaska finally has a comprehensive clean air policy that will protect everyone in our state.

This bill does not prohibit smoking it just requires that people can work and get in and out of buildings without breathing fumes that kill people. Secondhand smoke kills and there are no safe levels of exposure.

This bill has widespread support because it makes sense and will ultimately be beneficial to non-smokers and smokers alike.

If this bill passes the total number of cigarette ~~smokers~~ smokers will fall. This will help some good people who are struggling with a tough addiction. ~~It will also help the economy and the environment.~~

Comprehensive Clean air policies are an important part of reasonable approach to addressing a public health issue that hurts our economy and our quality of life.

Please support this bill and please make sure that entry ways are protected for brothers. Thank you.

Dear Senator, by now you have heard the clear message regarding what Alaskans have to gain from SB 1 and a smoke free Alaska. Community members all around Alaska have made their voices heard by electing to protect all people from the negative effects of secondhand smoke in public places. This policy is good for individuals, good for businesses, good for communities, and very good for Alaska. I ask for your support on this bill as proposed and endorsed by the Alaska tobacco Control Alliance. This bill will bring the benefits that most of us enjoy to many disparate groups that are not given a choice to have this basic right. This bill is simple, practical, and essential and Alaska is ready. Thank you.

- Smoking rooms and ventilation systems do not address the health hazards of secondhand smoke.
- Bar staff have to breathe at work just like everyone else.
- It's time for the Alaska legislature to protect all workers from secondhand smoke.

Dear Senator:

I am a 45 year resident of Anchorage and the surviving partner of a man who died from lung cancer in 2002. Therefore, I know the heart ache of losing a loved one because of tobacco smoke.

Research has shown secondhand smoke is just as deadly as the original smoke, so why are we allowing it to continue to cause unnecessary illness and death to our fellow Alaskans? All it takes to change that is for elected officials, such as you, to stand up and say "enough is enough."

By passing SB1 out of Committee, you will be taking the first step to assure all Alaskan workers are free from secondhand smoke.

Most sincerely,

Thomas U. Rachal, Jr.

Subject: Support SB 1- Realize Bad Interior Air Pollution is also as hazardous as 2nd hand cigarette smoke.
Attachments: Air Pollution Fairbanks 21515.jpg
Follow Up Flag: Follow up
Flag Status: Flagged

Senators,

I am in support of SB 1. I have a son who has congenital heart problems and even going in and out of airports for travel to health care is sometimes clouded with entryway smokers. Taking it outdoors is important, but I hope SB 1 will also include setbacks for public places like airports.

Please note that hundreds of current, reputable research articles clearly state that wood smoke is even more toxic than second hand smoke and should be considered every bit as dangerous. My son misses school on a regular basis because of the poor air quality in Fairbanks and the risk it poses to him. When he must stay home, I miss work.

I am concerned that even some members of our Interior Delegation are not taking this problem seriously enough. We need to clean up our air now. The way to reduce air pollution is to reduce burning.

The FNSB should alter its stove change out program to only include propane stoves from now on. More wood stoves can only mean more burning. What gain has been made in efficiencies has been lost mostly due to increased number of wood burners. Despite what you may hear, our air quality is worse everywhere in the borough, except the Down Town SLAMS monitor where regulations are in place by the city of Fairbanks to regulate burning. The rest of the borough has no regulation at this time. Propane stoves will be magnitudes cleaner and move us in the direction of natural gas and can be converted from propane to natural gas with an inexpensive (\$10.00-\$12.00) conversion plate. Please fund money to convert "Essential Burners" (those with only wood or coal to burn) and others qualified, to propane for the coming season.

Consider the following excerpt:

From the 2014 article-

<http://www.adn.com/article/20140912/protect-your-lungs-treat-wood-smoke-cigarette-smoke>

The Author, Dr. Brian Moench, is a respected, nationally recognized anesthesiologist in Utah and is a leader with the Utah Physicians for Social Responsibility. He has reported widely in most mainstream media.

'Wood smoke is uniquely toxic among all sources of urban air pollution. For example, the EPA estimates that the lifetime cancer risk from wood stove smoke is 12 times greater than that from an equal volume of secondhand tobacco smoke. Particles in wood smoke are extraordinarily small, behaving essentially like gases, making them easy to inhale but less likely to be exhaled. They are then distributed by the blood throughout the body, causing inflammation and biologic disruption wherever they go. Attached to these tiny particles are at least 200 of the most toxic compounds known -- dioxins, furans, formaldehyde, heavy metals and polycyclic aromatic hydrocarbons. One fireplace burning 10 pounds of wood in an hour will generate nearly as many polycyclic aromatic hydrocarbons as 3,000 packs of cigarettes. No one in their right mind, even a smoker, would think lighting up 3,000 packs of cigarettes every hour during a cozy winter evening would be a good idea.

The free-radical chemicals in wood smoke are active 40 times as long as those from cigarette smoke, resulting in a greatly prolonged opportunity to seriously damage cells. Studies show that even the chromosomes in those cells can be impaired literally within minutes of exposure.'

A check of the obituaries in the Fairbanks Daily Newsminer in recent months should raise concerns as the number of people dying of cancer, unexplained cardiac events and those in the 49-62 year old range is alarming.

Two schools, Weller Elementary and Tanana Middle School were smoked out by residential wood smoke in Jan. 2015. The construction debris from the Klondike Hotel was burned during an air quality alert over several days, triggering community outrage and many complaints. The ADEC is presently dealing with this. The Weller incident was report by staff to the school district and the Tanana incident, which resulted in fire alarms going off and the complete evacuation of the school was well investigated by the fire department and reported to the ADEC. NO School children should be exposed in this manner.

The Fairbanks Memorial Hospital has started a new study to correlate ER/Admission visits with poor air quality. As stated at a recent Town Hall Meeting, hosted by the Borough Assembly, the correlation, even in its early stages is positive.

The Alaska State Constitution Article VII includes the important provision to "provide for the promotion and protection of public health" and "provide for public welfare". I urge you to keep that responsibility in mind as you move forward to pass SB 1 and take decisive, supportive measures to clean up the air in the Fairbanks North Star Borough. Please consider a resolution in support of a local solution to our problem, or a bill directing the state to promote/openly support an Air Quality State Implementation Program that is complete, adequate, and protective, or better yet, provide for the ADEC and Troopers with citation and enforcement authority for the laws that currently exist.

We are often in a sea of 2nd hand smoke, even when there is no inversion and the temperature is unseasonably warm. Please see attached photo. The power plant smoke stack showing its plume heading strait up indicates there is no inversion present. The temperature was 4 degrees F, warm for February.

This is a health and safety issue. Please set politics aside.

Very Sincerely,

Patrice Lee

To: Sen. Bert Stedman
Subject: Please Oppose SB 1 and HB 40 and any other effort to treat e-cigarettes like smoking.

Damian Rolland
4100 N. Campbell Rd.
Palmer, AK 99645

January 28, 2015

Dear Bert Stedman,

I am writing to express my deep concern and opposition regarding HB 40 and SB 1 which would include the use of smoke-free vapor products (e-cigarettes) in Alaska's smoking law.

Smoking laws are ostensibly enacted to protect the public from the harm of secondhand smoke, but smoke-free e-cigarettes have not been shown to cause harm to bystanders. In fact, all evidence to date shows that the low health risks associated with e-cigarettes are comparable to other smokeless nicotine products. A comprehensive review conducted by Dr. Igor Burstyn of Drexel University School of Public Health (and published in a peer-reviewed journal earlier this year - <http://www.biomedcentral.com/1471-2458/14/18/abstract>) examined over 9,000 observations of e-cigarette liquid and vapor and found "no apparent concern" for bystanders exposed to e-cigarette vapor, even under "worst case" assumptions about exposure.

Lawmakers must beware of unintended consequences from well-intentioned laws. There is clear evidence of a phenomenon called "accidental quitting," wherein many of the smokers who initially choose e-cigarettes to use just where smoking is prohibited go on to quit smoking conventional cigarettes completely. Prohibiting the use of e-cigarettes in public spaces completely eliminates that incentive to even try e-cigarettes. Unfortunately, the health risks of every one smoker who doesn't quit because e-cigarette use is prohibited (and the risks to the children and others who live with them) cumulatively outweigh any good done by eliminating the miniscule exposures to even hundreds of bystanders in public spaces.

Clearly, the benefits of allowing smokers to use e-cigarettes in public--and thereby increasing the likelihood of "accidental quitting" and reducing the known, extremely high health risks of smoking--outweigh the very low risks of insignificant exposures to bystanders. So, not only is there no genuine public health reason to prohibit e-cigarette use in public spaces, but, in fact, allowing e-cigarettes to be used in public spaces will actually improve public health by inspiring other smokers to switch and reduce their health risks by an estimated 99%. Moreover, private businesses in Alaska are already setting their own policies, and they should retain the right to allow or disallow usage since there is no proven health threat to bystanders.

While I understand some have expressed a fear about these products acting as a "gateway" to traditional cigarettes for youth, there is no evidence to suggest this is really happening, and research actually shows it is unlikely to happen to any substantial extent. Teen smoking rates are at their lowest point since smoking became popular and continue to drop, but there are adults who will continue to smoke until they die unless we provide attractive alternatives.

I urge you to oppose these bills and any legislation that would limit where smoke-free products like e-cigarettes can be used. It is imperative that existing adult smokers become aware of all the alternatives currently available and that access to these products remains unimpeded.

I look forward to your response on this issue. I, along with my fellow members of CASAA (Consumer Advocates for Smoke-free Alternatives Association), thank you for considering my comments and hope you will oppose misguided attempts to limit adult use of smoke-free e-cigarettes.

Sincerely,
Damian Rolland

SB 1 – Support

Dear Sen. Micciche,

On behalf of AARP Alaska's 86,000 members, we are pleased to support passage and enactment of SB 1, which provides for smoke-free workplaces and public spaces statewide. Voluminous scientific evidence spanning many decades has demonstrated without doubt the serious risks to health caused by tobacco and second-hand smoke. Smoking represents one of the most preventable causes of lung and heart disease which cost lives and money.

Living in Anchorage, where smoke-free workplaces has been the norm for many years, it is easy to see the benefits of such a law, as well as the positive results it has for businesses. Having a statewide statute answers the concerns of businesses that worry about a level playing field. All employees, and customers, deserve to breathe clean air. Far from taking away freedom, this law restores freedom from unwanted second-hand smoke.

Additionally, we support the provisions of SB 1 to prohibit the use of electronic cigarettes, or vaping, in the workplace. Evidence is mounting that the vapors contain toxins of their own which can present significant risk to health of others in proximity.

The bill in no way prohibits anyone from smoking or vaping. It merely prevents them from harming others.

We join with the thousands of individuals, the hundreds of businesses, and the vast majority of health care professionals who have indicated their support for smoke-free Alaskan workplaces. Thank you very much for sponsoring this bill.

Respectfully,

Ken Helander
Advocacy Director

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Mrs. Billie Menefee

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

Just as you represent Alaskans, so do I. I am the first National Hero of Hope (2012) for the American Cancer Society. This is a volunteer position I take very seriously. As I 13 time cancer survivor, and entering my 14th battle, I urge you to support SB 1. Several of my cancers are directly impacted due to second hand smoke for 20 years (both parents smoked) - at home and in business work places.

SB 1 would allow me to frequent many businesses I can't due to tobacco smoke or e-cigarette vapor. I makes sense and CENTS for the STATE to go smoke free. I'm sure by now you know that businesses in cities such as Palmer, report an actual INCREASE in business revenue, and repeat clientele plus a welcome addition of NEW clientele since going smoke-free.

I makes sense to support SB 1, especially since Alaska is the ONLY state where (lung) cancer is the #1 killer - all other states have heart disease as #1 killer, with obesity closing in fast. Think of the health care savings due to cancer that could be reduced if SB 1 were supported.

I want to celebrate many more birthdays as an Alaskan. Please help me, by voting in support of SB 1. Thanks!

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Sincerely,

Mrs. Care Tuk

Feb 11, 2015

Senator Peter Micciche
State Capitol, Room 125
120 Fourth Street
Juneau, AK 99801-1182

Dear Senator Micciche,

I'm writing to you today as your constituent to urge you to vote YES on Senate Bill 1, Smoke-Free Workplaces. Everyone has the right to breathe smoke-free air. In a day and age where common sense is anything but common, its one simple truth you can take to the bank.

As a single 30-something professional, I enjoy a healthy lifestyle and a lucrative career. I enjoy going out with my friends to restaurants and bars, and many times spending considerable money. What I don't enjoy, however, is smelling like an ashtray after a few minutes in an establishment that allows smoking. What's even worse is considering what effects the smoke is having when it enters unbidden into my lungs.

If this is argued as an economic hardship on establishments that would be forced to have clients smoke outside - I call BS. My friends and I are the most prime target demographic. We have the money to sustain businesses, we have the technological wherewithal to endorse the businesses we enjoy on social media, and we are not dying off or suffering from horrendous adverse health effects from smoking. Everyone is free to make their own choices. But, when it comes to secondhand smoke and e-cigarette aerosol they are free to keep it to themselves.

If they are willing to pay the consequences for their choices, so be it. But no one else should have to bear the consequences alongside them. Be smart, Alaska. Let's consider the 10 year plan the right way - by passing SB 1.

That's why I support SB 1 to get the smoke out of all Alaska workplaces. Thanks for your help in protecting everyone's right to breathe smoke-free air.

Sincerely,

Mr. Michael Crawford
36615 Chinulna Dr

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

Everyone is free to make their own choices. But, when it comes to toxic secondhand smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense. I work in the healthcare industry and have worked with folks that think it's ok to smoke the e-cigarettes in their offices or the workplace. E-cigarettes do give off an odor that is very offense to many people. Cigarette smokers are changing to the e-cigarettes because they think they can smoke them inside which is a plus for them in the winter months. Please make our work places free of ALL cigarettes and tobacco products.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

Dear Senator Micciche,

Thank you for considering Senate Bill 1 in committee. I support the bill and smoke-free workplaces, and I would like to tell you why.

I am a survivor and I lost my wife to Breast cancer 2 years ago, so I have personal experience and knowledge of the dangers of cancer. I am also a hospice volunteer and have seen what secondhand smoke can do to people who have never smoked. We need to realize that even though everyone is free to decide if we want to poison ourselves by smoking, we do not have the right to poison others with our secondhand smoke.

It's time to make a stand against toxic secondhand smoke in the work place, so if folks want to smoke they are free to keep it to themselves and take it outside. Whether it's tobacco smoke or e-cigarette aerosol, taking it outside makes sense.

That's why I support Senate Bill 1 and want to get the smoke out of all Alaska workplaces, for the health of all Alaskans. I hope I can count on your support for SB 1 - because everyone has the right to breathe smoke-free air.

I believe...

No job description should include heart disease and lung cancer.

- Secondhand smoke is a serious health hazard, causing heart disease and cancer.
- Smoke-free policies protect worker health.
- There is no risk-free level of exposure to secondhand smoke.
- Smoke-free policies have proven good for health and good for business.

I believe...

No job description should include heart disease and lung cancer.

- Secondhand smoke is a serious health hazard, causing heart disease and cancer.
- Smoke-free policies protect worker health.
- There is no risk-free level of exposure to secondhand smoke.
- Smoke-free policies have proven good for health and good for business.
