FISCAL NOTE ANALYSIS**STATE OF ALASKA
2016 LEGISLATIVE SESSION****Analysis**

SB 193 would extend the exemption created in 2010 for owners of renewable energy generation facilities from regulation by the Regulatory Commission of Alaska (RCA). The exempted entity would not be subject to RCA certification requirements or RCA regulation of rates and standards of service.

The original exemption was created for plants or facilities originally placed into commercial operation before January 1, 2016, a date tied to the expiration of the federal Business Energy Investment Tax Credit (ITC). The ITC was most recently amended in December 2015, and currently expires for large wind on December 31, 2019. The legislation extends the exemption to January 1, 2025.

Since the RCA will not be required to certificate or regulate the owners of renewable energy generation facilities, the agency will not experience any increase in workload due to the passage of SB 193. The RCA does not anticipate fiscal impact from this legislation.
