I support HJR 18

President Trump is all about America First and MAGA, which is not just Make America but Make Alaska Great Again!

We now have a SecInterior, EPA Administrator, etc., who are and have removed roadblocks on the oil industry. Hopefully the oil companies will act because of these removals and will start on ANWR as early as this winter!

The only reason this pipeline has not happened is because Presidents who implemented crushing regulations and supported lawsuits by eco-terrorist groups, not to mention Biden's 70 Executive Orders shutting down our State! SecInterior is reducing permitting to less than a month! The uncertainty for projects like this, opening ANWR, NPRA, Amber Mine, etc. is now over! The need for the engineering, design, clearing, permitting that was required for the existing pipeline access is no longer! Glenfarne no longer needs the 50 million! This can be done in the next 2-4 years!

The Alaska Legislature needs to fully support the immediate building of the LNG pipeline, the spurs to Fairbanks, Delta Junction, Tok, Glennallen, the Matsu, Anchorage, the Kenai, etc.! I hope that small spurs will happen to those villages that can be easily reached off the main pipeline or spurs.

We can bring in data centers that can tap into the pipeline for self sufficient LNG electrical turbines. The impact on our economy with just this one added industry will be huge! These companies, from

all I am hearing are not asking for subsidies but just to be able to build and not have to be impeded by government!

Lastly, the impact on sales to Japan, Taiwan, South Korea, Indonesia, etc. will be bringing in Billions to our State! We must have a effective Spending Ceiling Cap prior to this project even starting! We must decide now how we will reap the rewards by not taxing the hell out of this!

Make Alaska Great Again!
