Summary of Changes

HB 119 (34-LS0613\A) to CS HB119 STA (34-LS0613\N)

Page 1 line 2: Updated title to reflect additions to the bill.

Section 1: Adds language requiring a Fairbanks spur line to AS 35.25.005(5). The previous version of the bill only included this language in subsection 4. Adding that same language to subsection 5 expands the requirement for a spur line to Fairbanks to any natural gas pipeline project undertaken by AGDC.

Section 2: *New Section*

Establishes a framework to pay for natural gas hook ups for homes and business. It does this by allowing tax revenue from natural gas transported through an instate natural gas pipeline established by AGDC to be used for hook ups.

Section 3: *Former Section 2*
