

Ma'am,

I applaud your efforts to address the very real threat to Southeast Alaska's fisheries by the mining development occurring in BC. It is unfortunate that the Executive branch is not taking this as serious as it warrants and is not utilizing the best tool in the tool box, the 1909 Boundary Waters Treaty.

I will be in Haines and Klukwan on this day, but would look forward to the opportunity to provide information and testimony. I have been following these developments for over 7 years and have provided information at many public forums and in comments directly to BC's permitting agencies.

I look forward to contributing to this critical conversation.
