Subject: Oppose SB 120
Date: Thursday, April 17, 2025 7:20:57 PM

As you know, all Alaskans that called in to testify against SB120 didn't pull any punches. I was watching Gutfeld today and I just naturally thought of this and Senator Gray-Jackson. Mother Jones redid a Guardian article, "Bad News for Mans Best Friend. Dogs are Environmental Villains"! See the pictures, second one "Dogs are Killing the Planet".

So, will this commission, if even gets past a veto, then in the event of a Climate Change Emergency, order the deaths of all Alaskan dogs?

This is but one reason why the testimony was so angry and against stupid!
