---

I support SB 37.

Like President Trump is doing in making our budget a performance based budget along with DOGE finding as of today 160 Billion in fraud, waste and abuse, SB 37 will get our State spending to a performance and merit based system.

Our budget has for too long been too large and with little to no means to determine if the departments are meeting their goals. This makes those department come up with measurable missions and goals. Then if those missions and goals are met with the budgeted amount or less, that then is what any business strives for. Sadly, our government has a “use it or loose it” mentality and is not held to a measurable standard. SB 37 will do so. Most importantly to me is that the missions, goals and last years spending will be readily known to the legislature and then those departments that meet or exceed their missions/goals will be recognized and those that didn't will have to explain themselves and the legislature may then give guidance or reduce funding or both.

President Trump is making our government accountable and America First. There is every reason why our State can and should demand the same!

Pass out SB 37
