2016 - 2023

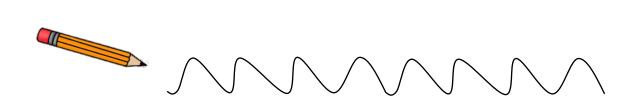

Year

Source: J-1 Visa, Facts and Figures, U.S. Department of State, Bureau of Educational and Cultural Affairs

Why Inflation Proofing?

- Hiring decisions are made by mid-March and educators are let go when districts do not have budgetary certainty
- State budget could be decided as late as the end of June, less than a week before the next fiscal year begins
- School districts begin planning 9 months in advance of the next school year
- Foundation formula accounts for cost differences across urban,
 rural and remote schools, ensuring fair distribution of resources
- Enrollments are declining, but fixed costs stay the same
- Legislators have a constitutional obligation to Alaskans who deserve to have confidence in their children's future

One-Time Funding Doesn't Go To Classrooms

- The formula lifts all of Alaska's public education options: charter, neighborhood, and correspondence schools
- Fixed costs do not go down
- Personnel costs make up 80% or more of the districts' budgets – there is little margin for error if we want to give our children the best education in the nation

Constitutional Obligation

Article VII, Section 1

"The legislature shall by general law establish and maintain a system of public schools open to all children of the state and may provide for other public educational institutions."
