Fall Forecast Assumptions

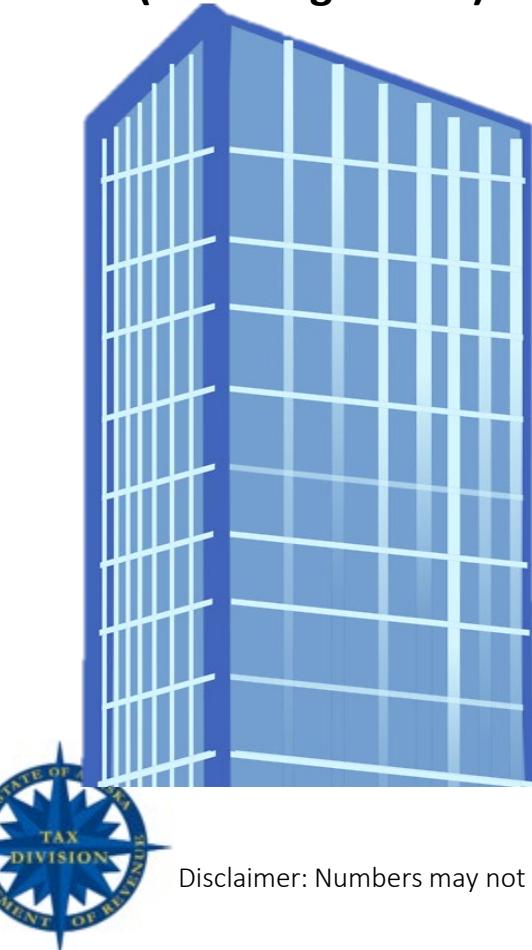

- The economic impacts of financial and geopolitical events are uncertain; Department of Revenue has developed a plausible scenario to forecast these impacts
- Key Assumptions:
 - Investments: Stable growth in investment markets, 7.60% for remainder of FY 2026 and 7.30% for FY 2027+
 - Federal: The forecast incorporates known funding as of December 1, 2025. FY 2028+ assumed to grow with inflation
 - Petroleum: Alaska North Slope oil price of \$65.48 per barrel for FY 2026 and \$62.00 per barrel for FY 2027
 - Non-Petroleum: Stable economic conditions. 1.7 million cruise passengers, five-year recovery for fisheries taxes, minerals prices based on futures markets
 - The revenue forecast is inherently uncertain and represents one scenario among a range of many possible scenarios
