Department of Environmental Conservation

## FISCAL NOTE ANALYSIS

STATE OF ALASKA  
2026 LEGISLATIVE SESSION

BILL NO. HB258

### Analysis

This bill establishes a statewide spay and neuter assistance fund and program administered by the Department of Environmental Conservation. The fund would be supported through donations including Permanent Fund dividend contributions, federal or private funds, special-request license plate revenues, and interest from the fund.

The program authorizes reimbursement to participating veterinarians, veterinary clinics, animal shelters, and nonprofit organizations for spay and neuter surgeries, presurgical examinations, and required vaccinations provided either (1) without charge or at a reduced rate to pets belonging to households at or below 130 percent of the federal poverty guidelines, or (2) to feral domestic dogs and cats when services are performed under a municipal ordinance allowing trap-neuter-vaccinate-release. This bill also authorizes municipalities to adopt ordinances allowing the capture, sterilization, vaccination, and release of feral dogs and cats.

The department would administer intake and review of reimbursement requests, eligibility determinations, implementation of financial controls, development and maintenance of reimbursement rate schedules, provider enrollment and oversight, data collection, and submission of annual reports to the legislature. The bill would take effect January 1, 2027.

**Personal Services:** *Program Coordinator 2, \$147.4:* Administers the statewide program, including provider coordination, reimbursement rate management, eligibility verification, review and approval of reimbursement requests, program oversight, outreach, and required reporting and compliance activities.

*Accounting Technician 2, \$105.6:* Processes applications, vouchers, and reimbursements; maintains financial records; supports fiscal reporting; and ensures compliance with state accounting and financial control requirements.

**Contractual Services:** *Information Management System, \$200.0 (FY27 one-time; then \$30.0 annually for maintenance):* Contracted development and maintenance of an information management system to support application intake, eligibility tracking, provider participation, reimbursement processing, data storage, and reporting. Based on professional staff recommendations.

*Education and Outreach, \$30.0 annually:* Public awareness and outreach activities including website management, mailings, social media campaigns, and publication of participating providers.

*Department of Law, \$20.9 (FY27 one-time):* Regulation development and legal review, including protocols for eligibility verification and protection of personally identifiable information. Projected at 120 law hours.

*Other Contractual Costs, \$16.3 annually:* Postage and mailing costs for outreach and reimbursement processing, general legal support, and allocated common costs.

**Supplies:** *Office and Program Supplies, \$16.0 (FY27; \$2.0 annually thereafter):* Minimal supplies necessary to support two new staff positions and basic program administration.

**Funding:** The bill will initially be funded by general funds to support program startup and administration. An undetermined amount of special request license plate fees, donations, federal or private grants, and Permanent Fund Dividend contributions may replace general funds with program receipts in future years. The amount of revenue to be collected and the amount required to pay participating veterinarians and clinics statewide are unknown. The bill relies on voluntary revenue mechanisms, while program administration would require baseline capacity prior to the availability of program receipts.
