### Mid-Year Status and Operating Budget Outlook

February 5, 2026

KEEP ALASKA MOVING

# Operating Vision

## A Modern, Resilient, and Agile Transportation System and Organization

### MODERN

Tools, data, and ways of working that reduce handoffs, duplication, and bottlenecks while improving how we recruit, solve problems, share information, and deliver improvements.

### RESILIENT

Cross-functional teams and shared expertise able to absorb vacancies, supply disruptions, extreme weather, and funding volatility - while sustaining service, responding to emergencies, and delivering results.

### AGILE

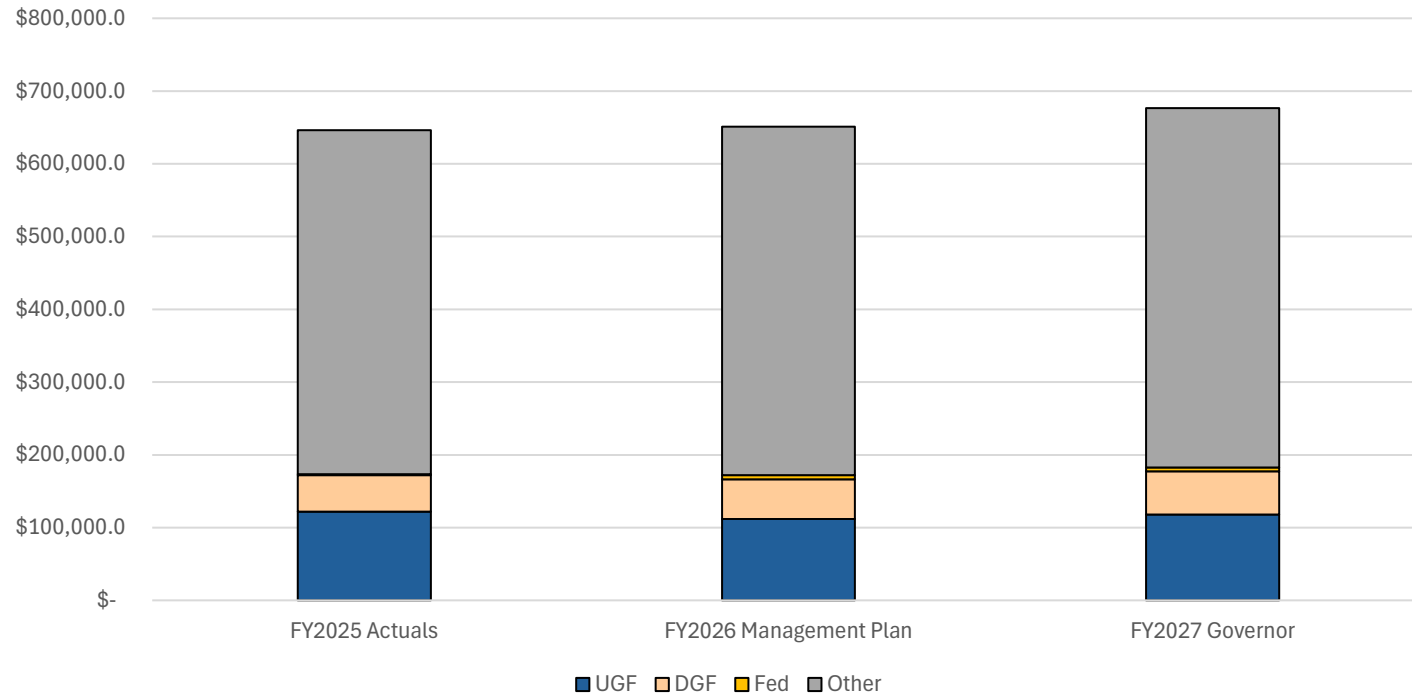

The ability to deploy people, expertise, and resources statewide - working across regions, with communities and partners, and using technology and alternative delivery tools.

**AS 19.05.125. Purpose.** *“carrying out a highway planning, construction, and maintenance program that will provide a common defense to the United States and the state, a network of highways linking together cities and communities throughout the state (thereby contributing to the development of commerce and industry in the state, and aiding the extraction and utilization of its resources), and otherwise improve the economic and general welfare of the people of the state.”*

# Impacts of Reductions

## **FY2026 UGF Reduction –12.2% Highways & Aviation vs. FY2025**

*Absorbed through alignment and  
realignment not service  
reductions.*

Carry forward budget authority was hollow; no maintenance and operations funds were carried forward.

Savings from extending life of equipment fleet was unrealizable; the department had already implemented longer replacement schedules to the maximum extent possible for nearly a decade.

Holding leadership positions vacant or sharing responsibility across leadership positions.

Mitigating impacts to front line Maintenance & Operations Services through administrative restructuring, re-organizations of programs, and shifting support where possible.
