Larry--

Thanks. As chair of the education committee, I'm holding a committee hearing on the bill in a half hour and am co-sponsor of the bill.

Senator Elton,

I quick word in support of the funding formula equalization bill. I am a charter school parent. We do school jobs to save our school money to make our program happen. My wife and I perform janitorial service and recess duty to save cost. Its not that we mind doing these jobs but we would like to be able to spend our volunteer efforts on jobs that would directle lead to improving oue children's educational experience. AS it is the Juneau charter school is an educational success meeting core standards and for all social classes. Please help us help our kids.
