

## I support Project Labor Agreements

Project Labor Agreements are one tool in the toolbelt of school districts, local governments, private business, state and federal governments to build the capital projects in their communities. HB 185 would limit the options available to build projects in Alaska by prohibiting project labor agreements.

**Current law does not require PLA's; it leaves the option to use or not use a PLA open to the builder.**

**HB 185 endangers Alaska Hire-** Alaska's labor unions are the first line of Alaska Hire. The hiring halls have systems in place to put Alaskans to work first. Only after residents go to work, do travelers get dispatched to jobs.

**HB 185 is anti-local control :** This bill would prevent school districts and local governments from choosing a PLA to complete public projects if they received state dollars.

### **PLA's are good for business and good for Alaska**

- PLA's provide highly trained and skilled work force with uniform work rules and no-strike clauses
- PLA's have long track record of success in Alaska with projects being completed on time and under budget
