Temporary							

ANALYSIS: (Attach a separate page if necessary)

The bill changes the definition of a power project relative to the power project fund to include nuclear production.

Alaska Energy Authority's (AEA) fiscal note is zero, because there are currently no projects of this type.

AEA estimates that annual operating costs would increase by \$365,000 for each nuclear power project that has to be managed; \$165,000 for a project manager with technical nuclear knowledge and \$200,000 for contractual advisory service in the field.
