

Alaska Coastal Management Program

Program Goals and Objectives

The Alaska Coastal Management Program (ACMP) oversees the responsible development of coastal uses and resources, federal activities within the coastal zone, and activities on the Outer Continental Shelf.

ACMP Structure and Organization

The ACMP is a voluntary State program, authorized by the Coastal Zone Management Act of 1972, as amended. The Division of Coastal and Ocean Management (DCOM), within the Department of Natural Resources, is the lead agency for the ACMP. Several State departments and agencies participate in the implementation of the ACMP. In addition, several coastal municipalities and service areas (collectively known as coastal districts) voluntarily participate in the implementation of the ACMP. This structure and organization of State agencies and coastal districts provides for a networked implementation scheme designed to comprehensively manage coastal uses and resources.

The primary tool used to implement the ACMP is the consistency review process at 11 AAC 110. Through this process, proposed resource development activities are reviewed for consistency and compliance with the State's coastal management program which includes State laws, State standards, and district enforceable policies.

Value of ACMP

Having a federally-approved coastal management program allows the State the opportunity to:

- Balance the need for economic investment and development in coastal areas with the need to protect and manage the uses and resources of coastal areas
- Act as the State's liaison to federal agencies (1) conducting/permitting activities within the State's coastal area and the Outer Continental Shelf; (2) involving federal laws/initiatives that effect development of the coastal zone, waters, uses or resources of the State
- Act as the department's lead on issues affecting or addressing the coastal waters affecting the State
- Apply State ACMP enforceable policies to federal agency activities
- Provide project applicants with a single point of contact for the State's review of resource development permit applications
- Incorporate coastal district input and knowledge for reasoned decisions

Key FY 2008 and FY 2009 Priorities and Needs

- Educate and train participants on implementation of ACMP
- Re-evaluate the ACMP Statutes (AS 46.39 and 40) and Regulations (11 AAC 110, 112, 114), so to strengthen the ACMP as a State program
- Implement the approved Coastal Impact Assistance Program (CIAP) and act as the liaison between the federal government and the State of Alaska

A Program of the Division of Coastal and Ocean Management

"The Alaska Coastal Management Program provides stewardship for Alaska's rich and diverse coastal resources to ensure a healthy and vibrant Alaskan coast that efficiently sustains long-term economic and environmental productivity."

Alaska Coastal Management Program

Key 2008 Calendar Year Accomplishments

- In June 2008, DNR/DCOM initiated a series of workshops to review the current ACMP statutes (AS 46.39 and 46.40) and regulations (11 AAC 110, 112, and 114). The purpose of the re-evaluation is to strengthen the ACMP as a State program, that will benefit applicants and the public in the coordinating project reviews and that will enhance coastal district participation regarding activities occurring in the coastal area and on the outer continental shelf.
- DNR is currently revising the list of expedited consistency reviews using the ABC List. This revision was initiated to meet the legislative intent of identifying and broadening categories of activities subject to the expedited consistency review process. AS 46.40.096(m) SB 102 (2005) requires that DNR establish in regulation the state resource agency permits and federal permits that would trigger a consistency review. The ABC List categorizes development activities in the Coastal Zone according to expected levels of impact on uses and resources in the Zone. The last time the ABC List was substantively amended was in 1995. The current revision initiative will clarify the review process for certain resource development projects that are “de minimis” in nature or that are routine and can be made consistent with standard alternative measures. By updating the ABC List and developing new expedited consistency reviews for routine activities, DNR expects to reduce the workload for State agencies and coastal districts.
- In September 2008, the federal Minerals Management Service approved the State of Alaska Coastal Impact Assistance Program (CIAP) plan, making Alaska eligible to receive approximately \$9.7 million in federal funds under the CIAP initiative. Due to an increase in OCS revenue off the coast of Alaska, the state’s portion of CIAP funds will increase by more than \$53 million in the next two fiscal years. DCOM is currently working on amending the CIAP plan to reflect Alaska’s new allocation. A portion of the funds will go to 8 municipalities that are within 200 nautical miles of OCS development, and a portion will be offered to State agencies and the public through a competitive grant process.
- During the 2008 calendar year, nine more coastal district plans went into effect, bring the total of approved coastal district management plans to 25.
- During the 2008 calendar year, DCOM performed 262 coordinated or expedited consistency reviews, issued 415 No Additional Reviews and 29 Single Agency Reviews for resource development projects within the coastal zone.
