## FISCAL NOTE

STATE OF ALASKA  
2010 LEGISLATIVE SESSION

BILL NO. HB 229

### ANALYSIS CONTINUATION

#### **Bill Language:**

This bill extends the existing Gas Exploration and Development tax credit for investment in qualified capital expenditures and related qualified services, dealing with those capital expenditures. The Gas Exploration and Development tax credit is taken against the Corporate Income Tax (CIT), before any other federal or state credits are taken. One hundred percent of a company's tax liability can be offset by this credit in a given tax year. Additionally, credits from prior years must be used before current year credits can be used. A credit must be used within five years, otherwise it expires.

Currently, 10% of qualifying capital expenditures and operating expenditures can be taken as capital credits, sunsetting in 2013. The bill would increase the credit rate to 25% for qualifying capital and service expenditures incurred after June 30, 2011 for tax years beginning after December 31, 2010. The 25% rate would sunset on January 1, 2020. Under existing law all remaining tax credits under AS 43.20.043 expire December 31, 2017. This bill would change the sunset date to expire the tax year ending December 31, 2024.

In order for an expenditure to qualify for the 10% rate, cash expenditures or binding payment agreements must be made between June 30, 2003 and before July 1, 2011. Expenditures qualify for the 25% rate cash expenditures or binding payment agreements must be made after June 30, 2011.

The credit is limited to activities south of 68 degrees North latitude and exempts delivery of Alaska North Slope natural gas to tidewater.

#### **Revenues:**

It is difficult to determine the number of taxpayers who would take advantage of this tax credit, the degree to which the credit would be utilized, and other exogenous variables impacting the revenues the state would collect. Reduction in CIT are indeterminate at this time.

Additionally, the State of Alaska would most likely see a decline in the use of other credits. For example, since a taxpayer would have to utilize the Gas Exploration and Development tax credit first, it is likely we would see a reduction in the Education Credits. Especially, if the taxpayer has limited tax liabilities.

#### **Expenditures:**

The provisions of this bill could be implemented with existing state resources. No additional personnel or resources would be needed, since the DOR is already performing these duties.
