FISCAL NOTE

STATE OF ALASKA 2009 LEGISLATIVE SESSION

BILL NO. HB 182

ANALYSIS CONTINUATION

AEA will provide basic support services to create the new corporation, assist its board members to begin the governance process, coordinate with Railbelt utilities to develop the corporation's bylaws, develop transition and financing plans, establish a detailed regulatory approach, and assist the new corporation in reporting these recommendations to the next legislative session.

AEA as program manager will provide services to form the new corporation, assist its board members to begin the governance process, coordinate with Railbelt utilities to develop the corporation's bylaws, develop transition and financing plans, establish a detailed regulatory approach, and assist the new corporation in reporting these recommendations to the next legislative session.

AEA's services will include procurement of professional and financial service as well as program management. AEA estimates its program services will be needed for a two year period. AEA will need one AIDEA employee for that period to manage this program.
