HOUSE EDUCATION COMMITTEE

Letter of intent: HB 317

Introduced By: SEATON

Date: February 10, 2010

It is the intent of the legislature that the increases in block funding for education in AS.14.17.420(a)(1) as amended by HB 317 are meant to enhance a district's ability to offer career technical/vocational education as an addition to other funds that a district applies to career technical/vocational education. The increase is not to be interpreted as the *only* funds a district can designate for career technical/vocational education.
