Re: Support for HB 33

Dear Representative Gara,

On behalf of the Alaska Mental Health Board and the Advisory Board on Alcoholism and Drug Abuse, I would like to express our thanks and appreciation for the commitment that you and your co-sponsors have made to improving the lives of Alaskan children in foster care. HB 33 continues that process of system improvement, and we support the small but very significant changes that better prioritize the needs of foster children.

Being removed from your home, even when that home is not a safe or healthy environment, is traumatic. Being removed from your home and then separated from your brothers and sisters compounds the initial harm caused by abuse or neglect exponentially. While we know this from research and study, the Boards recognized fully the devastating effect this separation has on foster children when we heard from youth involved in the 2011 Youth Policy Summit. No child should have to beg, plead and fight for years to see a brother or sister, and yet we heard how this is the case for far too many youth who grow up in foster care.

HB 33 also prioritizes family connections as an important source of strength, support and resiliency for children and youth who experience abuse or neglect by making family placements easier in rural Alaska. Too often children in rural Alaska are placed with foster parents in urban communities rather than with relatives in villages, with the justification that the rural homes fail to meet foster care licensing standards. How can an aunt in a village where no one has running water ever hope to care for a niece or nephew who is in need, if there is no reasonableness standard in determining a safe physical environment for placement? HB 33 provides that element of reason to family placement decisions.

We are grateful for your continued advocacy for Alaska's children and are glad to be able to support HB 33.

Sincerely,

J. Kate Burkhart  
Executive Director
