Representative Les Gara  
Alaska State Legislature  
Juneau, Alaska 99801

Dear Representative Gara:

I am writing in support of HB33, the legislation you have proposed relating to foster care in Alaska. Denali Family Services (DFS) is a community mental health agency that provides therapeutic foster care to many children in the custody of the State / Office of Children's Services. DFS is also a child placement agency and in that role, processes foster home applications and licenses foster home in cooperation with OCS (i.e., the license is still a State foster care license). As an agency licensing foster homes, we support using the variance for homes in rural communities as long as the home is a safe environment and there are adequate ways to exit the home in case of a fire.

Denali Family Services serves many adolescents who are moving from care to independence and I am especially pleased to see the language changes that will make extending foster care to age 21 easily accessible for youth who want to take advantage of that opportunity. For youth who do not have a support system in place, those additional three years can make a huge difference in their maturity and readiness to survive on their own.

With regard to the application process for foster parents, DFS has significantly reduced our paperwork requirements in the last two years. In addition, effective this fiscal year, DFS will be utilizing a new foster parent training curricula (Presley Ridge). This curricula offers foster care providers in-depth, specialized training and OCS has agreed that DFS' foster parents who complete the Presley Ridge training will not have to take the OCS CORE training. This change will provide foster parents with more specialized training while maintaining the total hours at a number (per year) that is manageable.

On behalf of Denali Family Services, I am writing in support of HB33. Should you need additional information, please feel free to contact me at 907-222-2322.

Sincerely,

Yvonne M. Chase, PhD, LCSW  
President / CEO
