Subject: Driving Safety Bill

Driving in Fairbanks and environs in the ice fog and with limited hours of daylight and cars that are white or silver or shades of gray I think a law that required headlights and tail lights (not just those obnoxious "driving lights or fog lights") be required 24-7 from 1 November until March 1.

Respectfully submitted,

Don Callahan

And following distance requirement should be on the 4 second rule not the 2 second or 3 second...
