

Senior and Disability Services

Regarding grants: How do we know if they are matching grants and if the dollar amounts have changed?

Initially, grantees must identify all sources of matching funds in their replies to Requests for Proposals. SDS staff, Grant Administrators and Program Managers, then review for the required matching amounts on the quarterly expenditure reports which grantees are required to submit. Should a grantee not meet their agreed upon match amounts SDS staff counsels the grantee in attempt to get them back in compliance. When non-compliance continues, SDS seeks to sever the grant agreement and then utilize the additional funds to further support compliant grantee's programs.

Regarding assessing and reassessing waivers: State workers may be doing the assessing but there are some parts that are being performed by contractors. Has the Department looked at privatizing some of these items?

Currently, assessments and reassessments are performed entirely by State employees. However, the Department contracts for an independent third-party review of waiver assessments when State assessors determine that a waiver recipient no longer meets institutional level of care. This third-party review is required under AS 47.07.045.

In the past, the Department has contracted out assessments, but assumed the responsibility for assessments after it was unable to find a contractor willing to provide assessments throughout the state and due to problems maintaining quality controls on assessments performed by contractors.

In regards to combining Senior Services with Disability Services: When we talk about how we need to constrain growth - with in-home services and pioneer homes. Where do we save money in the long term vs. monies today?

The goal of in-home services is to provide minimal supports to individuals experiencing disabilities so that they can remain in their homes longer than if no supports were available. According to a report from the Population Reference Bureau (May 2013), "16% of adults ages 65 and over report having difficulty with at least one daily activity (preparing meals, shopping, managing money or using a telephone)" (p. 2) and "20% have difficulty with personal care activities (bathing, dressing, eating, or getting in and out of bed)" (p. 2). Low cost home modifications, assistive devices, and social services such as home delivered meals, grab bars in the bathroom or chore services may allow individuals to continue to live at home or in a non-institutional setting (Population Reference Bureau, 2013). The share of older adults who experience disabilities increases with age and is more prevalent among elderly in socio-economically disadvantaged groups than in others. The provision of in-home services will support older adults to

remain independent longer, and the savings to the state, especially as the baby boomers age, will be great.

AVERAGE ANNUAL COST FOR SERVICES PER INDIVIDUAL IN ALASKA	
Service	Average Annual Cost
In-home grants	\$ 2,064
PCA	\$ 23,811
Alaskans Living Independently Waiver	\$26,576
Children with Complex Medical Conditions Waiver	\$39,732
Intellectual and Developmental Disabilities Waiver	\$81,572
Adults with Physical and Developmental Disabilities Waiver	\$89,585
Nursing Home	\$110,555
Source: Average cost data provided by SDS-Research and Analysis Unit	

Is there an influx of people to our state because we are offering services at what could be considered an extremely generous level?

Exact data addressing this topic could not be found. However, Alaska's Department of Labor and Workforce Development's Research and Analysis webpage (<http://laborstats.alaska.gov/pop/migration.htm>) offers several reports which lead SDS to conclude that an influx of people seeking services is unlikely.

The current increases in Alaska's population are due to a better economy than the US average and lower rates of unemployment. It is unlikely that Alaska would be a popular destination for elderly adults living alone seeking services, especially those with a disability, due to lack of medical care, few services in rural areas, an overall higher cost of living, a lack of senior housing and transportation, extreme weather, and other environmental factors. However, if a family member is the caregiver for a person needing services and that family member moves to Alaska in search of the better opportunities offered here, it would not be unheard of for that caregiver to bring the person needing services to Alaska along with the rest of their household.

Wrap Up Questions Senior and Disability Services (SDS)

SDD: What flexibility do reviewers have in determining soft cap or/vs hard cap for residential waivers?

Currently, there are two services which have a soft cap; (1) Day Habilitation and (2) Supported Living Habilitation Services.

Under 7 AAC 130.260, individuals receiving group home habilitation are subject to a 15 hour/week limit on day habilitation unless the Department determines that the individual is unable to benefit from any other community service or activity. Waiver reviewers must evaluate the request for hours in excess of the 15 hour soft cap to consider whether

habilitative service needs can be addressed by other habilitative services, such as group home habilitation or supported employment, which allow the recipient to benefit from more social interaction while receiving habilitative services. If the needs of the recipient, as described by their Care Coordinator in their Plan of Care, cannot be met by any other habilitative service hours beyond 15 may be approved. The regulations do not provide reviewers the flexibility to approve additional units of day habilitation based on the financial benefits to the day habilitation or group home habilitation provider.

Under 7 AAC 130.265((e)), there is a soft cap of 18 hours/day for supported-living habilitation services. Reviewers have the flexibility to approve services in excess of 18 hours/day of supported-living habilitation if they determine the individual is unable to benefit from other home and community-based services or services provided by family members or community supports when viewing this service option within the overall Plan of Care.

SDD: Independent Living is a line item in the Labor Budget as well as Health and Social Services. Why is it in both budgets? Is there any benefit to it being in two budgets?

Independent Living Centers (there are 4) are funded in part, to provide Independent Living (IL) services as outlined in the Rehabilitation Services Administration. IL programs are overseen by the Division of Vocational Rehabilitation, Department of Labor.

The Division of Senior and Disabilities Services provides funding to two of the four IL Centers through the Aging and Disability Resource Center (ADRC) grants. Both ADRC and IL services provide information about, and assistance in accessing services to help individuals remain as independent as possible and in their own homes and communities; however, IL Centers are also vendors for DVR and assist individuals in meeting their employment goals as well as their other needs. But not all ADRCs are ILs, so it would not be practical to combine the funding.

SDD: Please provide a statewide list of new assisted living homes (by community) for the last 5 years.

SDD: Please also supply a list of assisted living home that have/have been closed in the last five years.

A summary count of assisted living homes which have been certified or closed by SDS during the last five years can be found below. A full list of assisted living homes in the State licensed from 2011 through October 2013 with company names and license numbers can be found on the Assisted Living Licensing webpage, <http://dhss.alaska.gov/dhcs/Pages/cl/all/default.aspx>, as not all assisted living homes do not provide services to SDS recipients and thus do not require SDS certification to operate. However, the most recent list has been included below for your reference.

SDD: When an assisted living center closes what is the state's plan? Where are the people moved? How do we ensure that we are keeping our Senior Citizens safe?

In the case of a planned closure by an assisted living home, the home must provide 90 days' notice to residents, any service coordinators, and the Department. This allows for orderly transition planning for residents. In situations where the home is to be closed by the Department's Certification and Licensing unit, that unit submits a Report of Harm to the Division of Senior and Disabilities Services' Adult Protective Services (APS) unit. If there are residents over 60, the Long Term Care Ombudsman is notified of the closure and all three agencies coordinate a response. APS has the authority by statute to coordinate an emergency placement of the vulnerable adults and this is DSDS's primary role in the process.

APS completes research prior to going to the assisted living home to best match residents to new placements and notifies applicable guardians/legal decision makers to assist with that decision making. On site, all residents and staff are interviewed. This duty may be split up between Licensing, APS and LTCO. (This is coordinated beforehand or on site.) APS reconciles each person's medications and delivers them to the staff at the new home with known treatment info/plan of care and makes transportation arrangements to ensure the vulnerable adult gets to the new home safely. APS places adults in licensed facilities that agree to care for the person's needs and are authorized to provide those services.

SDD: In regards to grants: What assurances/procedures are in place to ensure that these grant monies are getting down to the bottom level? How does the money get spent? How do we track those dollars?

Grant Administrators and Division Program Managers ensure funds are being used as intended by comparing the quarterly reports with the grantees annual proposal submission which is approved at the beginning of the fiscal year. Site visits are also performed for each program once every grant cycle. These site visits include interviews with grantee staff and recipients. All grantees are required to conduct satisfaction surveys and report the findings annually. If a grantee is found to be non-compliant remediation steps are taken by SDS staff. All corrective action is documented in the grantees file and termination of a grant due to non-compliance must be approved by the Commissioner.

SDD: Please provide a demographic/matrix on "how the money went out for that" regarding day habitation (\$22M to \$40M from 05-12). Would like breakdown by the time we get to Juneau so we can track some of those issues.

Due to a recent Medicaid billing system change over this question cannot be answered at this time, October 2013. However, SDS is confident that the data will be available by the time that the House Finance Committee convenes again in Juneau.

SDD: Please provide a list of grantees and how much they get for administrative fees? What are administrative costs? There is a federal list which varies by agencies will get the detail and get it to you.

Administrative costs most often include overhead costs or indirect costs, such as rent, utilities, accounting costs. The Department cannot provide a list of grantees with their administrative fees as our regulations give them a choice between using a federally approved indirect cost rate or including their administrative expense in their proposed budget as direct costs.

For SDS grants, allowable administrative costs are identified in the DHSS Grant Regulations 7 AAC 78.160 Costs.

7 AAC 78.160 Costs – Applicable sections relating to Indirect and Administrative Costs

(p) Except for capital grant projects, a grantee may use grant money to pay indirect costs of the grant project in accordance with an indirect cost rate agreed upon by the federal government and the grantee. In computing the amount of indirect cost to the grantee, the commissioner will accept the indirect cost rate in effect between the grant applicant and the federal government at the time of the grant award....A grant applicant desiring approval in a grant agreement of payment of indirect costs in accordance with the subsection must include in the grant proposal, or have on file with the department, a copy of the most recent federally –approved indirect cost rate and other relevant documentation as the department directs...

(q) Except for capital grant projects, an applicant that does not have a federally approved indirect cost rate may include administrative costs in the applicant's proposed budget as direct costs. The applicant shall document the proposed costs in the applicant's justification narrative for the proposed budget.
