

Moore v. Alaska, decision

RE: HSGQE – Exit Exam

p. 33 # 81. “This reform was a reaction by the legislature to frustration that children were receiving high school diplomas but were lacking in basic skills.”

p.34 #83. “State acknowledges that ‘children have a property interest in their prospective diploma, and cannot be deprived of that property interest by a test that is unfair to them because they have not had notice of the content of the test.’”

p. 36 #92 ‘Bering Strait’s graduation rate has fallen significantly since 2002-2003, when it was 59.4%. This may be due to the introduction of the exit exam requirement since that date, but also may be due in part to the “Quality Schools” program in place there that allows students additional time to complete their studies past 12th grade.’”

p. 38 #95 “While the dropout rate may be some indication as to whether an educational program is meeting a student’s need, the evidence showed that not all students drop out because of low academic achievement. Family and work commitments, among other reasons, may also be factors.”

p.38 #96 “Some students drop out because they are unable to pass the exit exam.

p.56 #164 Mr. Morgan was concerned about the exit exam and the impact may have on students dropping out: “There’s so much focus to pass [the exit exam] and I think there’s more to life than just passing the exist exam.”

p. 56 #165 Mr. Morgan ... had classes in photography, foreign languages and pottery, which have not been available to his children. He also believes there were more teachers. And he remembered that everyone graduated then. Now, he is ‘saddened by the kid who [does not] get the diploma but still walks.

p. 72. #226 “Dr. Davis (BSSD) testified that small schools in Alaska should not be expected to offer all of the course available in large schools. Instead, his position is that “we should offer an adequate education.”

p. 72. #229 Dr. Davis defines an adequate education as an “education that gives young people the tools to succeed in whatever live they choose.” He testified that BSSD students are receiving an adequate education due in part to supplemental activities and education from families. He does not think they meet state standards but they are successful based on their own standards and the improvements they have made.

p. 77. Note: Bering Strait School District has some of the highest paid teachers and highest funding per student (Kuspuk School District: received \$21,758 per student in 2005).

p. 79 #246 Dr. Laster testified that “we are in good faith really working to try to get those core competencies to students: reading, writing and math. But it’s really important to have an interdisciplinary approach; an approach that respect the community that kids come from, the culture that they come from, that engages them in a way that grabs them and engages them and has them working on stuff that that is rally meaningful to them.”
