Alaskan North Slope Oil & Gas Potential Production & Today's Market Value

ALASKA FACTS

- **First Major Oil Discovery:** 1957.
- **Industry Investment:** \$50B+ to date.¹
- **State Production:** 16+ billion barrels of oil (bbo).¹
- **North Slope Oil Fields:** 4 of 10 largest in US; 12+ currently producing.¹
- **North Slope Estimates:** ultimate recoverable oil reserves of 22.2 bbo; up to 124 trillion cubic feet (tcf) of natural gas.¹
- **Prudhoe Bay Field:** 1,000+ wells; largest oil field in North America & largest producing US oil field; site of large natural gas processing plant.²
- **Prudhoe Bay Estimate:** 2.5 billion barrels of recoverable oil & 426 million barrels in reserves.¹
- **Pipeline Infrastructure:** 800-mile Trans-Alaska Pipeline System (TAPS); 1.5+ million barrels per day of spare capacity; supplying American energy to Americans without environmental risks or 'dirty oil' associated with Keystone Pipeline.
- **Ongoing Development:** major operators such as Exxon Mobil (NYSE:XOM | Market Cap: \$410.84B), BP (NYSE:BP | \$139.96B) and ConocoPhillips (NYSE:COP | \$71.86B) investing heavily in oil and gas-related projects.

Today's Estimated North Slope Oil Reserves of up to 22.2 billion barrels of oil are valued at \$2.3 trillion at today's prices

Today's Estimated North Slope Natural Gas Reserves of 123 Trillion Cubic Feet (TCF) are valued at \$459 billion at today's prices

MACONDO INCIDENT

It is critical to get a craft onsite as quickly as possible for command & control, well control, SAR, firefighting/suppression, oil spill containment & collection

98% of water used
in firefighting is
wasted.
Until Now!

LNG TRANSPORT

LNG GAS IS QUICKLY BECOMING A HIGHLY NEEDED COMMODITY BUT BEING ABLE TO DELIVER IT QUICKLY AND BE COST EFFECTIVE HAS BEEN AN ISSUE. ITS NOW POSSIBLE WITH THE SKYLIFT TANKER TO LOAD FROM ANY LOCATION AND DELIVER EASILY TO ALMOST ANYWHERE, MAKING THE USE OF LNG MORE PRACTICLE AND ECONOMICAL.

FIRE FIGHTING

Wildfire Air Tanker Concept

An average of 50 Tankers are needed, but only 7 are operating*
Wildfire fighting experts agree 50 additional planes are needed to complement ground crews overwhelmed by the number and intensity of wildfires during the fire season.

The Cost of putting out wildfires is over \$1.65 billion/year.
