Support H.B. 336

I am writing today in support of H.B. 336, legislation which would increase the distance between schools or religious centers and licensed establishments which sell liquor.

Right now, some Alaskan children go to school directly across the street from these establishments. These children have witnessed the inappropriate behavior of inebriates who spend time surrounding these stores and have asked the Legislature to take action to help future students.

In support of keeping these and other students safe, I ask the Alaska Legislature to support H.B. 336.

Sincerely,

Rep. Kurt Olson, Chair  
House Labor & Commerce  
Committee
