Introduction

The Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) was created by the Legislature in 1986 to provide a readily available funding source to investigate, contain, clean up and take other necessary action to protect public health, welfare and the environment from the release or threatened release of oil or a hazardous substance. Alaska Statute 46.080.030 states: "It is the intent of the legislature and declared to be the public policy of the state that funds for the abatement of a release of oil or a hazardous substance will always be available." (SLA 1986 Sec.1 Ch. 59).

The statutes governing the Response Fund were amended in 1989, 1990, 1991, 1994, 1999, and 2006. These amendments changed the scope that defines how the Response Fund can be used and it also increased the Department of Environmental Conservation's (DEC's) reporting requirements. In addition, the 1994 amendment made major changes to the Response Fund structure by dividing the Response Fund into two separate accounts. The first account is the response account and the second account is the prevention account. The changes became effective on July 1, 1994. The diagram on page three illustrates the current structure of the Response Fund.

The 1999 amendment changed the reporting requirement on the status of the Response Fund from an annual report to the Legislature to a biennial report. The 2006 amendment changed the surcharge levied on crude oil produced in the state. The legislation imposed a prevention account surcharge of \$.04 (formerly \$.03) per barrel of oil produced from each lease or property in the state, less any oil the ownership or right to which is exempt from taxation. Sec. 26 of AS 43.55.201 was also amended to change the response account surcharge from \$.02 to \$.01 per barrel of oil produced from each lease or property in the state.

Response Account

The response account may be used to finance the state's response to an oil or hazardous substance release disaster declared by the governor, or to address a release or threatened release that poses an imminent and substantial threat to the public health or welfare, or to the environment. To access the response account for any incident other than a declared disaster, DEC must notify the governor and the Legislative Budget and Audit Committee within 120 hours of using the money from this account.

The response account is financed by a \$.01 per barrel surcharge and money recovered from responsible parties. The surcharge is suspended when the combined balance of the surcharge account, the response mitigation account and the unreserved and unobligated balance in the response account reach \$50 million. The account balance reached \$50 million for the first time during the quarter ending December 31, 1994. The surcharge collection was suspended on December 31, 1994.

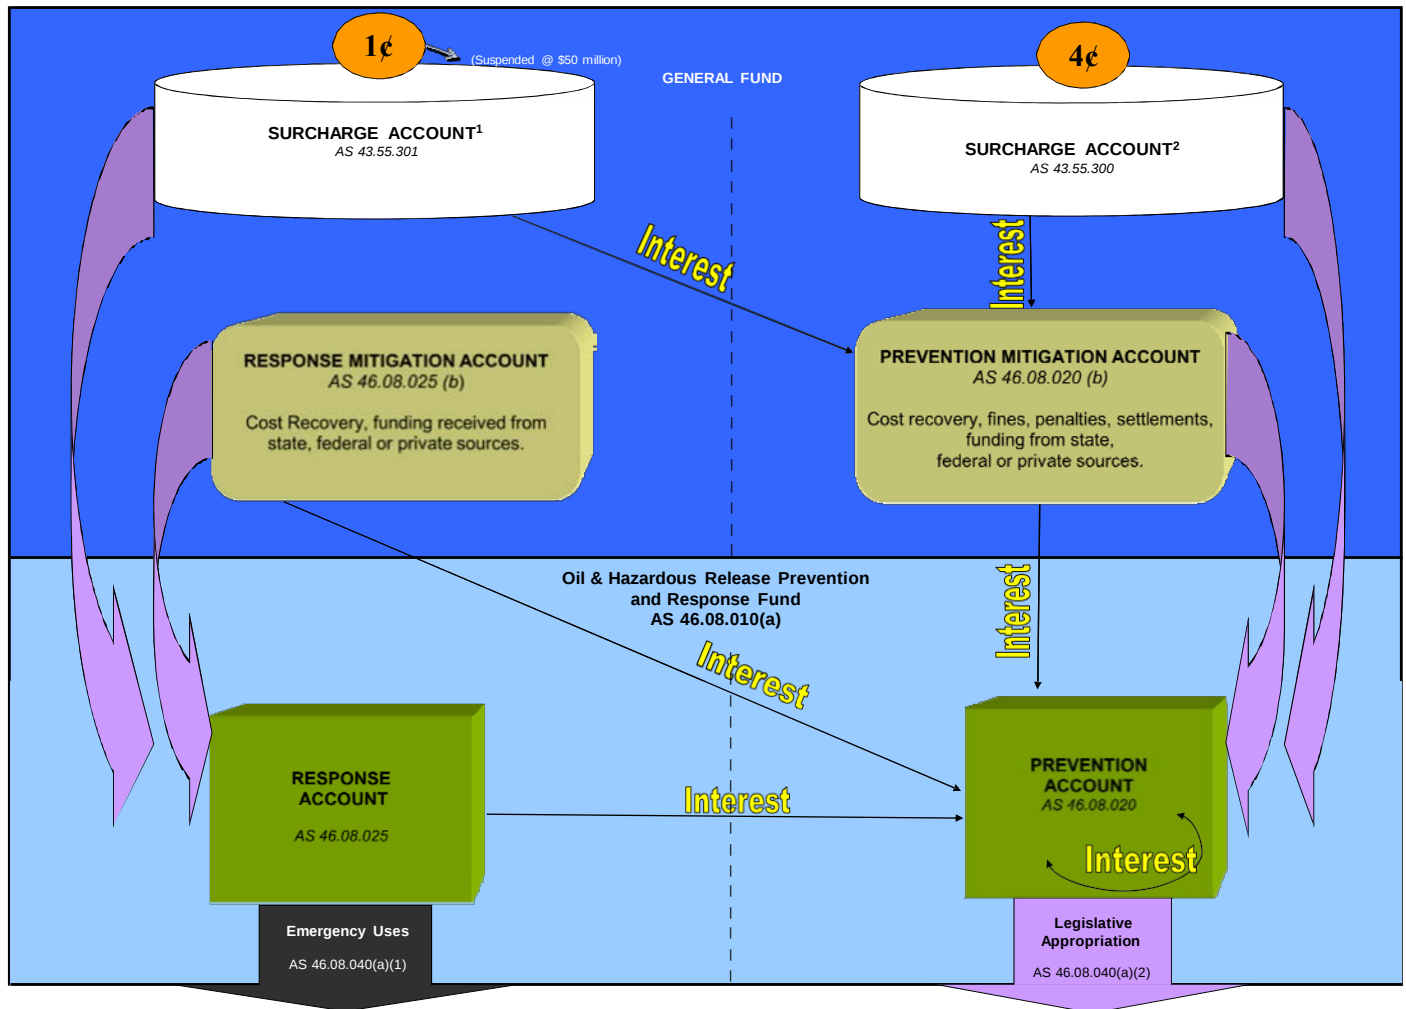

Access to the fund for the response to the North Slope Pipeline spills occurred on November 20, 2006. This action lowered the balance of the account below \$50 million. On April 1, 2007, the Department of Administration imposed the \$.01 cent surcharge to restore the balance to \$50 million. The combined balance of the response account as of June 30, 2012 is \$49.5 million. As a result, the \$.01 cent surcharge has remained on through the Fiscal Year 2012.

Prevention Account

The prevention account may be used to respond to oil and hazardous substance releases that have not been declared a disaster by the governor. In addition, the prevention account is also used to fund Alaska's oil and hazardous substance release response and prevention programs. The Legislature appropriates money from the prevention account for spill prevention and preparedness planning activities (AS 46.08.040(a)(2)).

The prevention account is financed with a \$.04 per barrel surcharge and fines, settlements, penalties and interest.

Figure 1: Oil & Hazardous Substance Release Prevention and Response Fund

*Oil or hazardous substance discharge emergency.
 *Investigate, evaluate, contain, cleanup, monitor and assess a release or threatened release of oil or hazardous substance that poses an imminent and substantial threat to public health or welfare, or to the environment.

* Investigate, evaluate, contain, and cleanup a release or threatened release of oil or hazardous substances.
 * Establish and maintain spill response capability.
 * Review oil discharge prevention and contingency plans.
 * Maintain spill response contracts and agreements.
 * Conduct training, response exercises, inspections, and tests.
 * Verify or establish preparedness of the state.
 * Verify proof of financial responsibility.
 * Acquire, repair and improve spill response equipment caches.
 * Prepare, review and revise regional and state spill plans and local Hazmat plans
 * Participate in federal oil discharge cleanup activities.
 * Assess effects of a release.
 * Recover state costs.
 * Restore the environment.

¹ House Bill 3001C amended AS 43.55.201 Sec. 26 and changed the Surcharge from \$.02 to \$.01 effective 4/1/2006

² House Bill 3001C amended AS 43.55.300 Sec. 28 and changed the Surcharge from \$.03 to \$.04 effective 4/1/2006

Table A

Fiscal Year 2011 & 2012 Expenditures and Obligations

This table summarizes the expenditures and year-end obligations for appropriations funded by the Oil and Hazardous Substance Release Prevention and Response Fund (Response Fund) in Fiscal Year 2011 and 2012.

Table C**Revenue Sources**

This table summarizes the various funding sources appropriated to the Oil & Hazardous Substance Release Prevention and Response Fund (Response Fund) since FY02. "Program Receipts" are revenues collected from an outside party for specific program expenditures. "Mitigation Revenue" includes interest earned on surcharge deposits, cost reimbursement, fines, penalties or settlement payments from parties financially responsible for incidents or sites for which the state expended money from the Response Fund. "Oil Surcharge Revenue" represents collection in the prior year of the conservation surcharge imposed on oil produced in the state.

(In Thousands)

Fiscal Year	Program Receipts	Mitigation Accounts	3 Cents Oil Surcharge	4 Cents Oil Surcharge Note 1	1 Cent Oil Surcharge Note 2	Other General Fund	Total
FY02	-	\$6,194.7	\$9,295.2	-	-	-	\$ 15,489.9
FY03	-	\$6,490.0	\$9,597.0	-	-	-	\$ 16,087.0
FY04	-	\$3,157.0	\$9,232.9	-	-	-	\$ 12,389.9
FY05	-	\$1,392.8	\$9,052.5	-	-	-	\$ 10,445.3
FY06	-	\$1,688.8	\$8,330.5	-	-	-	\$ 10,019.3
FY07	-	\$3,731.1	\$7,758.7	-	-	\$1,800.0	\$ 13,289.8
FY08	-	\$2,316.7	\$2,880.9	\$6,629.7	\$593.2	\$2,000.0	\$ 14,420.5
FY09	-	\$8,248.9	-	\$9,476.2	\$2,333.7	-	\$ 20,058.8
FY10	-	\$1,968.0	-	\$8,922.5	\$2,405.1	-	\$ 13,295.6
FY11		\$3,740.0		\$8,303.2	\$2,075.6		\$ 14,118.8
FY12		\$5,425.2	-	\$7,563.4	\$1,922.2		\$ 14,910.8
FY13		\$1,878.6		\$7,558.6	\$1,889.8		\$ 11,327.0

Note 1: AS 43.55.300 is amended to change the surcharge levied on every producer of oil from \$.03 to \$.04 per barrel of oil produced from each lease or property in the state, less any oil the ownership or right to which is exempt from taxation. The amendment changing surcharge to \$.04 was effective on April 1, 2006.

Note 2: The amendment changing the surcharge to \$.01 was effective on April 1, 2006.

Table D**Summary of Response Contracts & Purchases in Excess of \$10,000**

This table lists contracts the department signed that are associated with response activities funded by the Oil and Hazardous Substance Release Prevention & Response Fund (Response Fund) & which exceeded \$10,000 in Fiscal Year 2011 and Fiscal Year 2012 payments.

Fiscal Year 2011

Tables H, I, and J list all the sites inventoried in the DEC's contaminated sites and leaking underground storage tank sites database as of June 30, 2012.

Table H summarizes the numbers of active sites by location and by priority ranking based on the threat to the public health or welfare or to the environment. The database contains the following totals for each priority category.

High Priority	120
Medium Priority	1183
Low Priority	778
Unranked	<u>268</u>
Total Active Sites	<u>2,349</u>

Table I lists all DEC active Contaminated and Leaking Underground Storage Tanks sites alphabetically by location as June 30, 2012.

Table J lists all DEC closed Contaminated and Leaking Underground Storage Tanks sites alphabetically by location as of June 30, 2012.

Table H

Appendix 1: Community Spill Response - No costs incurred for communities in Fiscal years 2011.

Appendix 2: Project Summaries - This appendix summarizes information for contaminated sites or pollution incidents for which the department made direct expenditures of \$10,000.00 or more during Fiscal years 2011 & 2012 from the Oil and Hazardous Substance Release Prevention and Response Fund. Indirect expenditures, expenditures paid from other sources and expenditures for budgeted legal services provided by the Department of Law are not included. Direct department response activities involve cleanup, control, containment, investigation and oversight.

ZipMart Store – Sterling.....	194

Project/Site Name: **314 Wendell Avenue (formerly MC Commercial Cleaners)**
Location: Fairbanks
Project Manager: James Fish
Site ID Number: 3821
Telephone: (907) 451-2117
Ledger Code: 14981360

Situation:

Results from Phase I and Phase II environmental site assessments in 2000-2002 indicated chlorinated solvent releases in the Wendell Avenue area. In 2008, DEC conducted vapor intrusion assessments at three buildings in the vicinity of 314 Wendell Avenue and found solvents intruding into all the buildings. The highest concentrations were found at the former dry cleaner at 314 Wendell. The owner was unable to conduct the investigation so DEC completed a site characterization in 2009 of the site and surrounding area along Wendell Avenue and down to the Chena River. Air concentrations above the Federal Agency for Toxic Substances and Disease Registry's acute values were found at 314 Wendell. High soil gas, groundwater and soil concentrations were also found at the site and in the surrounding area. The solvent contamination also was found in pore water samples collected at the interface with the Chena River. Vapor intrusion has been documented in three buildings and is strongly suspected in two to three others.

FY11 Actions:

Work consisted of continued vapor intrusion data collection, further investigation of the potential risk to the Chena River, and completing an alternatives analysis for source remediation and groundwater monitoring. Reallocated funding was used to install Sub-Slab Depressurization (SSD) and Soil Vapor Extraction (SVE) remediation systems during FY12.

FY11 Response Fund Expenditures:	\$419,769.59
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

Work in FY12 involved operation of the SSD and SVE remediation systems and re-implementation of the Chena River Monitoring Plan. Operation of the remedial systems have resulted in a dramatic decrease in chlorinated solvent concentrations in all environmental media, but particularly sub-slab soil gas. Groundwater-surface water interactions were also evaluated to understand fate and transport of contaminant discharge into the Chena River. A pilot study was initiated to monitor subsurface microbiology in response to amendments to induce biodegradation of chlorinated ethenes. Access was granted to conduct indoor air sampling at 330 Wendell.

FY12 Response Fund Expenditures:	\$295,328.63
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Work in FY13 will include evaluation of the remedial systems (including vapor intrusion evaluation), operation of the remedial systems via transitions to seasonally pulsed operations, additional groundwater monitoring, development of a groundwater cleanup plan, and implementation of Phase I of groundwater cleanup.

Estimated FY13 Costs:	\$300,000.00
-----------------------	--------------

Project/Site Name: **Adak Petroleum Diesel Spill**

Location: Adak

Project Manager: John Brown

Site ID Number: 10259901101

Telephone: (907) 269-7688

Ledger Code: 14282760

Situation:

The incident was reported to ADEC at 6:00 pm on January 11, 2010 by Adak Fuel personnel. The spill occurred during a fuel transfer operation from *T/V Al Almerat* to tank N-7 in the Adak tank farm. The fuel entered into nearby Helmet creek which feeds into the small boat harbor. Upon discovery of the incident, facility staff deployed boom immediately into Helmet Creek. Additional boom was deployed at the mouth of Helmet Creek and entrance to the small boat harbor. USCG Sector Anchorage, Alaska Chadux and ADEC responders responded to the incident over the following eight months. Upon completion of the cleanup ADEC estimates that approximately 1,636 barrels (68,745.6 gallons) were spilled.

The causal investigation determined that human error was the causes of the over fill. The fuel escaped through one or more gaps in a seal between the tank's wall and the roof into secondary containment surrounding the tank. Valves from the secondary containment to a drainage system leading to Helmet Creek had been left open. The fuel overwhelmed the tank system's oil/water separator and flowed into the drainage system, resulting in a fuel release to Helmet Creek and the small boat harbor at its terminus. Photographs and other incident information are available for viewing at: http://dec.alaska.gov/spar/perp/response/sum_fy10/100111201/100111201_index.htm

FY11 Actions:

During the week of August 15, 2010 ADEC staff participated in the investigation to determine if any fuel had escaped the secondary containment outside of the drainage system. Upon completion of the investigation there was no indication the secondary containment had leaked any fuel.

FY11 Response Fund Expenditures: \$ 44,472.44

FY11 Cost Recovery: \$ 23,077.36

FY12 Actions:

FY12 Response Fund Expenditures: \$ 0.00

FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **AIA Airport-Wide Drainage System**
Location: Anchorage
Project Manager: Todd Blessing
Site ID Number: 2562

Telephone: (907) 269-7699
Ledger Code: 14155380

Situation:

In the summer of 1996 AIA implemented an airport-wide drainage basin maintenance. Soil samples were taken at various locations to prevent maintenance workers from being exposed to contamination. Numerous areas of contaminated soils exist. Prior to and during AIA construction projects, DEC staff coordinates with DOT&PF staff in order to review and approve of protocols for discovery, handling, and treatment of contaminated soil. Post construction season, soil treatment and excavation reports are reviewed for compliance purposes.

FY11 Actions and Expenditure Amounts:

The cost accounting code for this site has been used to capture DEC staff time for airport-wide contamination issues beyond the drainage sytem proper. Soil and groundwater samples were collected from numerous areas in and around the airport facility. Several reports and construction work plans were reviewed by DEC personnel.

FY11 Response Fund Expenditures: \$32,204.83
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **Alaska Real Estate Parking Lot – State Lead**
Location: Anchorage
Project Manager: Todd Blessing Telephone: (907) 269-7699
Site ID Number: 4084 Ledger Code: 14144960

Situation:

The property is presently operating as a parking lot on Fourth Avenue, between Gambell and Hyder streets. The property has been occupied by a variety of businesses, including a likely dry cleaners from approximately 1968 to 1970, as well as a tire center, the last occupant of the last building on the site (the eastern portion) before the building was demolished. A Phase I Environmental Site Assessment (ESA) was conducted in 1993, indicating that underground storage tanks (USTs) might exist in the northeast and northcentral portions of the property, as well as chlorinated solvents.

In 1997, a Phase II ESA was conducted, identifying areas of contaminated soil and groundwater near the previous locations of the dry cleaner and tire businesses. Soil and groundwater sampling revealed levels of tetrachloroethylene (PCE), ethylbenzene, toluene, 1, 2, 4-trimethylbenzene, 1, 3, 5-trimethylbenzene, arsenic, barium, cadmium and chromium exceeded DEC cleanup criteria. An additional Phase II ESA was conducted in 2004 and six exploratory test pits were advanced on the property with associated soil sampling, and removal of five hydraulic lifts, two associated hydraulic USTs, and two heating oil USTs, originally identified in 1997.

A relatively small volume of soil exhibiting hydrocarbon concentrations exceeding DEC cleanup criteria was encountered during the removal of the hydraulic lifts and associated USTs. The test pit excavations revealed numerous soil samples exhibiting PCE concentrations above DEC cleanup criteria. In 2007, five soil borings were advanced on the property and north of the property; three of the soil borings were completed as monitoring wells. PCE was again detected in soil and groundwater above cleanup levels on and off the property. Groundwater was found to be approximately 40 feet below grade and groundwater elevations suggest that groundwater flows northeast. In 2009, three soil gas probes were installed and indoor air, soil gas and outdoor air samples were collected to be analyzed for volatile organic compounds. PCE gas has been detected at elevated levels in soil gas and within occupied buildings. In 2010, four soil borings were advanced on Block 26B, East Addition Subdivision and completed as monitoring wells. PCE was not detected in these samples above cleanup levels suggesting PCE contamination has not migrated east of Hyder Street.

FY11 Actions and Expenditure Amounts:

Work consisted of determining the nature and extent of contamination, east of the subject site (i.e. between Hyder and Ingra Streets on Fourth Avenue). Soil and groundwater sample results suggest contamination has not migrated east of Hyder Street.

FY11 Response Fund Expenditures:	\$ 75,341.14
FY11 Cost Recovery:	\$ 0.00

FY12 Actions and Expenditure Amounts:

Work consisted of conducting a release investigation/feasibility study (RI/FS) in collaboration with the Environmental Protection Agency. This study will identify appropriate remedial action alternatives.

FY12 Response Fund Expenditures:	\$ 14,968.36
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Work will consist of implementing a corrective action plan on-site to treat contaminated soil, soil gas, and groundwater.

Estimated FY13 Costs:	\$250,000.00
-----------------------	--------------

Project/Site Name: **Alyeska Pipeline Service Company – Multiple Sites**
Location: Deadhorse and Pipeline Corridor
Project Manager: Richard Bernhardt
Site ID Number: Various
Telephone: (907) 269-7546
Ledger Code: 14818360

Situation:

Petroleum contamination from various releases related to pipeline operations is present.

FY11 Actions:

A decision letter was issued indicating cleanup was completed at the Alyeska Five Mile Airstrip Site, Alyeska PLMP 734 Pipe Leak, and Alyeska PS 03 Fire Training Area. Alyeska conducted remediation at three sites. Groundwater monitoring continued at 13 sites and surface water monitoring at 10 sites.

FY11 Response Fund Expenditures:	\$10,313.00
FY11 Cost Recovery:	\$13,744.64

FY12 Actions:

Alyeska assessed groundwater conditions at 16 sites, installed or repaired monitoring wells at six sites, analyzed natural attenuation parameters at five sites, and measured surface water conditions at six sites. Alyeska also renewed their five year management plan for their Valdez Marine Terminal.

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$19,270.58

FY13 Projected Actions and Expenditure Amounts:

Alyeska will monitor surface water at four sites, groundwater at 9 sites, survey water at two sites, repair/replace/install monitoring wells at six sites, and analyze monitored natural attenuation parameters at four sites. They will also remove structures (tower and former fire shed) from north end of runway at Five Mile Airstrip, then assess for contamination. Previous contamination was on south end of runway.

Estimated FY13 costs:	\$ 0.00
-----------------------	---------

Project/Site Name: **Aniak White Alice Communications Site (WACS)**
Location: Aniak
Project Manager: John Halverson Telephone: (907) 269-7545
Site ID Number: 23620 Ledger Code: 14812960

Situation:

The Aniak Middle School building and property was initially developed and used by the Air Force in the 1950s as a "White Alice" communication system during the Cold War. By the late 1970s the military facility was obsolete and was turned over to the School District, which renovated the main building and used it for a school from 1981 until 2003. The Alaska Department of Transportation and Public Facilities has owned the property since 1965 and currently leases the site to the Kuskokwim School District.

During White Alice operations and renovation of the school by contractors, fluids containing polychlorinated biphenyls (PCBs) were spilled in and around the generator room and onto the ground outside the building, resulting in soil contamination. Hazardous materials were placed into drums that were moved to various locations on the property, where additional spills reportedly occurred.

The U.S. Air Force and DEC conducted PCB cleanup at the site between 1979 and 1983 and attempted to remove all PCB contaminated material and soil containing more than 50 parts per million (ppm) PCB. After additional contamination was discovered in 1994, the Army Corps of Engineers assumed responsibility for the military's portion of the contamination under "Formerly Used Defense Site Program".

In 1997, the U.S. Environmental Protection Agency released a report that showed PCBs remained in soil outside the middle school wood shop, which was the former generator room at the White Alice Site. Subsequent sampling inside the school documented that PCBs had been tracked into the building. With DEC oversight, the Corps' contractors cleaned the inside of the Middle School and covered PCB-contaminated soil outside the school with a temporary liner and six inches of clean soil.

Since 1998, DEC has been working with the potentially responsible parties (PRPs) for PCB contamination at the site including: the federal government, the State (as the landowner), the Kuspuk School District and its contractors that renovated the site, and the Air Force contractors that operated the White Alice site.

Between 1998 and 2003, DEC hired contractors to better characterize the extent and location of remaining PCB contamination, cleanup a portion of the site, and complete a feasibility study to evaluate alternatives for completing the cleanup. Excavation and off-site disposal of soil containing more than 1 ppm PCB was recommended as the best overall alternative when considering regulatory compliance, protection of human health and safety, implementability, effectiveness and cost.

Although DEC, the Dept. of Law, and the PRPs negotiated through an alternative dispute resolution process in an effort to reach a settlement agreement on the past and future cleanup costs and work, it was necessary in FY08 for DEC to begin cleanup operations due to concerns about adverse health impacts from high concentrations of PCBs in the soil in unrestricted areas around the school.

During 2008 – 2009, trichloroethylene (TCE), which is a solvent, contamination was discovered in soil and groundwater and elevated TCE vapors were found beneath and inside the Joe Parent School building.

FY11 Actions:

Oasis Environmental installed a sub-slab depressurization system to mitigate chlorinated solvent vapor intrusion into the Joe Parent school building. Sub-zero temperatures during December 2010 caused condensation in several of the extraction lines to freeze, which resulted in the sub-slab depressurization system to not effectively create a negative pressure beneath portions of the building. During January 2011, Oasis staff added additional heat trace and insulation to the extraction lines in the unheated portion of the attic. The system had thawed and was operating as intended again by early February.

FY11 Response Fund Expenditures:	\$387,629.19
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

Oasis Environmental, under contract to DEC, continued operating, maintaining and monitoring the sub-slab depressurization system. This included quarterly sampling and analysis of indoor air and soil gas vapors beneath the building along with monitoring the operational parameters. Additionally, Oasis completed a Feasibility Study on TCE contamination in the groundwater to evaluate various potential cleanup alternatives.

DEC continued working with the Department of Law on settlement negotiations to recover past State expenditures and address the remaining cleanup needs.

FY12 Response Fund Expenditures:	\$189,246.09
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

DEC informed the PRPs they must conduct the remaining characterization, cleanup and monitoring rather than the State funding the work up-front. To avoid turning off the depressurization system, DEC extended the Oasis contract through December 2013 with the scope of work limited to simply covering the electrical cost to continue running the system.

Estimated FY13 costs:	\$ 9,000.00
-----------------------	-------------

Project/Site Name: **City of Kotzebue**
Location: Kotzebue
Project Manager: Jim Fish
Site ID Number: 394

Telephone: (907) 269-8685
Ledger Code: 14112560

Situation:

Historical spill of #1 diesel occurred over time from 1950 to 1980. An estimated 100,000 to 200,000 gallons spilled underground in an area up to 10 acres. ADEC was alerted when fuel was discovered seeping into the elementary school basement in 1980. The top three suspected sources are 1) a ruptured tank at the bulk tank farm in the 1950's; 2) the former distribution line from the bulk tank farm to the Kotzebue school and the former Public Health Service Hospital; and 3) the tank farm located at the school consisting of ASTs, USTs and various piping systems.

FY11 Actions and Expenditure Amounts:

Further site investigation was conducted as part of the Shore Avenue improvements.

FY11 Response Fund Expenditures:	\$17,989.89
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Estimated FY13 Costs:	\$ 0.00
-----------------------	---------

Project/Site Name: **DEED Huslia Huntington School Aboveground Storage Tanks**
Location: Huslia
Project Manager: Melinda Brunner
Site ID Number: 23
Telephone: (907) 451-5174
Ledger Code: 14228380

Situation:

The site consists of property and buildings under the direction of the Yukon Koyukuk School District in Huslia. In 1979, a combined fuel system and tank farm was installed at the school with the capacity of 40,000 gallons of diesel fuel. In 2006, the tank farm and fuel delivery system were abandoned, but no action was taken to address the significant petroleum contamination near the surface and in close proximity to the school. Petroleum vapors in the buildings were reported by school officials. Limited site characterization and vapor intrusion assessments were completed in 2000, 2007, and 2008. Diesel contamination exceeding DEC cleanup criteria remained in the soil adjacent to school buildings and teacher's housing.

FY 11 Actions and Expenditure Amounts

During the summer of 2010, OASIS Environmental performed the removal of multiple underground heating oil tanks (HOTS) and soil cleanup at the Jimmy Huntington School. The project involved removing three HOTS; two associated with the Vocational Education Building and one associated with Teacher's Housing. A fourth HOT associated with the Elementary School was slated to be removed, but was left in place because intersecting underground utilities had been installed above the tank. Contaminated soil was transported to the old landfill and stockpiled for follow-up action.

OASIS removed the associated piping (and residual fuel) and wooden tank support platforms for the Aboveground Storage Tank (AST) system; however, the AST removal was performed by another contractor. OASIS also removed contaminated soil associated with the former AST farm to a depth of 5 feet below ground surface and over an area of approximately 4,200 square feet. Approximately 950 cubic yards of contaminated soil was removed and transported to the containment area constructed at the old landfill. The excavation was backfilled and re-graded.

FY11 Response Fund Expenditures: \$183,024.34
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

Inspect and complete sampling and characterization of multiple stockpiles located at the former dumpsite, including the pile derived from the school site. The intent is to determine if chemical constituent concentrations in stockpiles have reduced sufficiently to allow for spreading onsite. Additional stockpiles were the result of contaminated material derived from infrastructure development projects initiated by Alaska Native Tribal Health Consortium.

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: State Owned – No Cost Recovery

FY13 Projected Actions and Expenditure Amounts:

Continue with work initiated in FY12.

FY13 Response Fund Expenditures: \$ 0.00
FY13 Cost Recovery: State Owned – No Cost Recovery

Project/Site Name: **DEED New Stuyahok Old BIA School**
Location: New Stuyahok
Project Manager: Brunner, Melinda Telephone: (907) 451-5174
Site ID Number: 25446 Ledger Code: 14277280

Situation:

The former New Stuyahok Old School site is approximately 7.9 acres. The City of New Stuyahok passed a resolution to accept the property after the Southwest Region School District built a new school at another location. Over the years, numerous small spills are believed to have occurred, and the fill lines to the high school day tank were found to be leaking. In January 2003, a release was documented on the northeast side of the former elementary school. Contaminated soil remains at the site and other unknown or unreported releases are believed to have contaminated other areas on the property.

The School District had funding to demolish selected buildings on the site and complete general cleanup of the site. After the demolition of the buildings in 2009, test pits were excavated and sampled, identifying diesel range organic (DRO) contamination near the gymnasium. Benzene levels were identified in the soil above the migration to groundwater cleanup levels but below the health-based cleanup levels; however, due to budget shortfalls, the School District was not able to complete contaminated soil cleanup activities.

FY11 Actions:

A Property Assessment and Cleanup Plan was completed. Known source areas with petroleum contamination were identified and include: the utility building AST; the former tank farm area; the area between the fuel pipelines between the tank farm and the utility building; the gymnasium AST; and the teacher's quarters AST. Oasis states that additional source areas may be present along other sections of the buried fuel oil pipeline system that were not investigated

FY11 Response Fund Expenditures: \$32,627.98
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

No activity in FY12 as projected.

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13.

Project/Site Name: **DNR Asphalt Drum Site**
Location: Mile 278 Richardson Highway
Project Manager: Janice Wiegers Telephone: (907) 451-2127
Site ID Number: 1156 Ledger Code: 14258680

Situation:

In 1990 ADEC investigated a public complaint regarding abandoned drums with unknown contents leaking on the ground. Sixteen corroded drums were found and determined to contain liquid asphalt. A 1998 DEC site visit identified 22 drums of asphalt product. Drums were deteriorated with bullet holes and corrosion. The drums were removed in 2008 but residual material remained on the soil surface.

FY11 Actions:

Approximately 700 gallons of residual asphalt/tar on the surface soil was removed. Soil samples collected beneath the tar did not exceed cleanup levels.

FY10 Response Fund Expenditures: \$10,203.00
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

The site was closed on the contaminated sites database. Remaining contamination does not exceed DEC cleanup levels.

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No additional work is required.

Project/Site Name: **DOT&PF Aniak Airport GW Study**
Location: Aniak
Project Manager: Grant Lidren
Site ID Number: 1571
Telephone: (907) 269-8685
Ledger Code: 14103480

Situation:

Historic spills and leaks from various sites have caused area-wide groundwater impacts at the Aniak Airport. These sites include the following Department of Transportation and Public Facilities: Aniak Maintenance Building, Runway Apron, City Shop Building, and MarkAir – Aniak Airport.

FY11 Actions and Expenditure Amounts:

A site reconnaissance was conducted; potential landfarm areas were identified; groundwater monitoring wells and drinking water wells were sampled.

FY11 Response Fund Expenditures: \$16,805.97
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

No work completed in FY 12

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13

Project/Site Name: **DOT&PF Gustavus Tank Farm**
Location: Gustavus
Project Manager: Bruce Wanstall Telephone: (907) 465-5210
Site ID Number: 4368 Ledger Code: 14230260

Situation:

The tank farm was constructed in 1945 and was owned and operated by the Federal Aviation Administration (FAA) until 1972 to supply fuel for the airport. A pipeline from the Gustavus Dock allowed the fuel to be pumped from the barge into the tanks. In 1972, the tank farm was transferred to the Department of Transportation and Public Facilities (DOT&PF) who owned and operated it until 1980. It is now in private ownership.

The FAA conducted a facility-wide study in 1991 and stained soil was documented at the tank farm inside the containment berm. In 1992, the owner removed the soil above the liner and shipped it off for disposal. At that time, a perforated piping system located underneath the tanks was removed. FAA reports that the system was used for the discharge of waste oil below the tanks in order to help prevent corrosion of the tanks.

The City of Gustavus is working with the Agency for Industrial Development and Export Authority (AIDEA) to develop an adjacent new bulk fuel facility. Both the current tank farm and proposed new tank farm properties are owned by the State of Alaska, managed by the Department of Natural Resources (DNR). DNR has given management authority over the property to the City of Gustavus based on DEC assurance that the current tank farm property will be characterized and, if necessary, cleaned up.

The Attorney General's Office is providing legal assistance regarding the determination of Potential Responsible Parties (PRP) and the proportioning of liability for characterization and cleanup of the Gustavus Tank Farm.

FY11 Actions:

Extensive groundwater sampling was conducted. Free-phase petroleum (petroleum on top of the water table) was discovered.

FY10 Response Fund Expenditures: \$39,514.08
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

CS terminated the multi-year NTP with Oasis to commit the funds to other State CIP NTPs. FAA agreed to assume the lead on site cleanup and future monitoring site activities.

FY12 Response Fund Expenditures: \$30,391.47 (estimate \$17,901.99 on NTP unused)
FY12 Cost Recovery: Memo to Dept of Law dated 2/10/2012
recommended initiating informal cost recovery. In
July 2012 the FAA, DOT and Gustavus Dray
agreed to terms of a COBC to replenish the RF.

FY13 Projected Actions and Expenditure Amounts:

No Response Fund Expenditures are planned.

Project/Site Name: **DOT&PF Homer Airport HOT (Kachemak Dr.)**
Location: Homer
Project Manager: Paul Horwath Telephone: (907) 262-3422
Site ID Number: 3032 Ledger Code: 14868580

Situation:

During the removal of an underground storage tank system, diesel contaminated soils and groundwater were encountered. The contamination was associated with a 3,000 gallon heating fuel oil tank.

FY11 Actions:

A site assessment initiated in late FY10 was completed in FY11. Based on the completion of this work, this site is now eligible for a closure decision.

FY11 Response Fund Expenditures: \$12,496.42
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

A closure decision was issued for this site. The groundwater monitoring wells were decommissioned. No further work is anticipated at this time.

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: State Owned – No Cost Recovery

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13

Project/Site Name: **DOT&PF Knik River Rest Stop, Reflections Lake – State Owned**
Location: Palmer
Project Manager: Linda Nuechterlein Telephone: (907) 269-1530
Site ID Number: 3327 Ledger Code: 14103360

Situation:

The site is located adjacent to the Knik River south of the Glenn Highway Bridge and was originally owned by the Bureau of Land Management (BLM). The BLM issued a land use permit to the Alaska Department of Transportation and Public Facilities (DOT&PF) in 1963 for use as a mineral material site for construction of the Glenn Highway, and DOT&PF operated the site as a gravel borrow pit. The site is readily accessible to the highway, and after gravel mining operations ceased the area became an unauthorized shooting range and dumping ground for approximately 30 years. Prior site characterization and remediation activities conducted from 2000 - 2003 included the removal of approximately 106 cubic yards of lead contaminated soil and illegally dumped material. Capping material was placed over two former lakeside shooting lanes (seasonally submerged) referred to as Shooting Area A1 and Shooting Area A2. As a result of the cleanup, the majority of lead contamination was removed. The site is currently under development by ADF&G as a recreation area. Follow-up sampling efforts indicated that lead contamination remained in several former shooting areas that exceeded lead cleanup levels.

FY11 Actions and Expenditure Amounts:

A gravel cap was placed over areas with elevated lead levels.

FY11 Response Fund Expenditures:	\$68,293.28
FY11 Cost Recovery:	State Owned – No Cost Recovery

FY12 Actions:

FY 12 Response Fund Expenditures:	\$93,703.64
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13

Project/Site Name: **DOT&PF Kotzebue Airport Area-wide**
Location: Kotzebue
Project Manager: Jim Fish Telephone: (907) 451-2117
Site ID Number: 25418 Ledger Code: N/A

Situation:

This includes the DOT&PF Kotzebue Airport Maintenance Station. An FY09 and FY10 investigation confirmed contamination reaching Kotzebue Sound.

FY11 Actions:

Collected pore water data from Kotzebue airport and Shore Avenue; conducted a building survey; installed monitoring wells at the airport and collected first round of groundwater data. Contract extended into FY12.

FY11 Response Fund Expenditures: \$113,233.22
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

Groundwater sampling was conducted in September 2011. Pore water data was analyzed and reported in reference to groundwater cleanup levels and surface water quality standards.

FY12 Response Fund Expenditures: \$ 56,028.54
FY12 Cost Recovery: State Owned – No Cost Recovery

FY13 Projected Actions and Expenditure Amounts:

Additional pore water, sediment, surface water and groundwater sampling will be conducted to assess petroleum and solvent contaminant migration and bioavailability. An eco-scoping process will be followed to assess ecological contaminant exposure pathways. A well search on airport lease lots and surrounding area will also be conducted.

Estimated FY13 Costs: \$ 0.00

<u>Project/Site Name:</u>	DOT&PF Old Quinhagak Airport		
<u>Location:</u>	Quinhagak		
<u>Project Manager:</u>	John Carnahan	<u>Telephone:</u>	(907) 451-2166
<u>Site ID Number:</u>	25348	<u>Ledger Code:</u>	14218580

Situation:

In the spring of 2009, following several unsuccessful requests for legislative funding to address environmental concerns, the Department of Transportation and Public Facilities (DOT&PF) submitted a Department of Environmental Conservation (DEC) Brownfield Assessment (DBA) request form to DEC to assist with cleanup at the Old Quinhagak Airport (Site). The site consists of an unpaved runway, an apron area, and a boat parking/storage area, and encompasses approximately 64.5 acres. The Site, previously owned by the Bureau of Land Management (BLM) was leased by BLM to DOT&PF in 1973. In 1980, the BLM transferred ownership of the property to the Quinhagak Native Corporation, Qanirtuuq Incorporated. DOT&PF continued to use the site under lease to Qanirtuuq until December 2004 when airport operations were moved to a new location in Quinhagak. ADOT&PF presently maintains their lease on the property and must restore the Site to a condition safe for human health and the environment before the lease may be terminated.

The DBA request form from DOT&PF identified petroleum contamination from former activities at the Site as a potential health concern precluding their ability to relinquish the lease, and hindering reuse of the land. DOT&PF stated in the DBA request that the State would like to remediate the Site so they may terminate their lease with Qanirtuuq, and Qanirtuuq will be able to develop the Site as they see fit.

FY 10 Actions and Expenditure Amounts

Develop corrective action plan for the site.

FY10 Response Fund Expenditures:	\$18,571.00
FY10 Cost Recovery:	State Owned – No Cost Recovery

FY 11 Actions and Expenditure Amounts

Cleanup actions focused on the grader storage building and included excavating contaminated soil from three identified source areas, field screening of soil, constructing a containment cell, installing one groundwater monitoring well, collecting analytical soil and groundwater samples, and backfilling excavated areas with clean material.

FY11 Response Fund Expenditures:	\$54,382.11
FY11 Cost Recovery:	State Owned – No Cost Recovery

FY12 Actions:

Completed monitoring of soil pile and sampling, and completed final reporting

FY12 Response Fund Expenditures:	\$13,614.00
FY12 Cost Recovery:	State Owned – No Cost Recovery

FY13 Projected Actions and Expenditure Amounts:

None

Project/Site Name: **DOT&PF Willow Maintenance Station (Former) – State Owned**
Location: Willow
Project Manager: Todd Blessing
Site ID Number: 1809
Telephone: (907) 269-7699
Ledger Code: 14229280

Situation:

In 1993, a 1,000 gallon heating oil tank was removed from the site and diesel contaminated soil was discovered. In 1997, two 3,000 gallon underground storage tanks (USTs) and associated dispensers were removed from the northeast portion of the site. The material excavated during the removal was used to backfill the excavation. A fire destroyed the former maintenance station in the early 2000s. In 2007, a site characterization was conducted. Twenty one test pits were dug and eight soil borings were advanced and completed as groundwater monitor wells. Soil and groundwater samples indicated that both media in four areas were impacted above Department of Environmental Conservation (DEC) cleanup criteria. In 2009, contaminated soil was excavated from all known contaminated areas. Soil stockpiles were generated for each contaminated area and were designated as either potentially clean, petroleum contaminated, or chlorinated solvent and petroleum contaminated based on field screening results. The stockpiles were eventually placed on a concrete pad that was bermed with clean soil. Confirmation soil sample results from the base of each four excavation pits confirmed that no contaminated soil remained in all four contaminated areas with the exception of the former dry well location. All excavation pits, were brought up to grade with clean soil. In 2010, stockpiled soil was spread out and treated via land farming and groundwater samples were collected to determine if groundwater contaminants exceed DEC cleanup criteria.

FY11 Actions and Expenditure Amounts

DEC continued groundwater sampling to verify that groundwater is clean in all excavated areas and continuing the treatment of contaminated soil.

FY11 Response Fund Expenditures: \$24,552.20
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

Work consisted of landfarming contaminated soil on-site and evaluating the levels of contaminants of concern in treated soil. Groundwater monitoring wells were also decommissioned.

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Continue treating landfarmed soil on-site and sampling treated soil in support of a cleanup complete determination.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **Eek Old BIA School and Tanks**
Location: Eek
Project Manager: Melinda Brunner
Site ID Number: 25493
Telephone: (907) 451-5174
Ledger Code: 14288880

Situation:

In 2010, the Native Village of Eek submitted a DEC Brownfield Assessment (DBA) request form to DEC to address contamination concerns at the Old Bureau of Indian Affairs (BIA) School property. The Site is located on the bank above the Eek River and includes a tank farm and five buildings on approximately 79,000 square feet of land. The property is owned by the State of Alaska Department of Education and Early Development (DEED) and managed by the Lower Kuskokwim School District. The DBA request form identified potential hazardous substances that may pose risks to subsistence resources as the major concern at the Site. Community concerns primarily focused on spills associated with fuel storage at the former tank farm. Additional concerns include the dilapidated structure which served as an attractive nuisance, the former use of lead paint, and asbestos presumed to exist within the structure.

FY11 Actions and Expenditure Amounts:

A Property Assessment and Cleanup Plan was completed. The findings indicate that the site is in need of solid waste removal, sampling and abatement of asbestos, demolition of structures and tanks, and excavation and removal of petroleum contaminated soil.

FY11 Response Fund Expenditures: \$32,204.83
FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

In 2011, the Lower Kuskokwim School District removed the five tanks at the tank farm. No other actions were taken.

FY12 Response Fund Expenditures: \$ 0.00
FY12 Cost Recovery: State Owned – No Cost Recovery

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **Egegik Light and Power – State Lead**

Location: Egegik

Project Manager: Todd Blessing

Site ID Number: 2149

Telephone: (907) 269-7699

Ledger Code: 14886860

Situation:

Reports were made to the Department of Environmental Conservation (DEC) regarding oil staining on ground surface and the owner trying to conduct cleanup on his own, such as excavation, stockpiling and remediation of contaminated soil. Contaminants of potential concern include petroleum constituents and polychlorinated biphenyls. The owner initiated cleanup actions without submitting documentation or receiving DEC approval. Numerous letters were sent to the owner, who refused to meet or talk with DEC without an attorney present. The owner of the property passed away in December 2009. No heirs of the owners estate have accepted the real property due to the contamination issues. At this time, there is no viable responsible party since the former owner's estate is in probate and therefore, this site is a State lead.

FY12 Projected Actions and Expenditure Amounts:

Estimated FY12 Costs: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Evaluate the nature and extent of contamination by collecting soil, groundwater, and surface water samples. Assessment is anticipated to extend into FY 2014, with cleanup and monitoring thereafter.

Estimated FY13 Costs: \$82,000.00

<u>Project/Site Name:</u>	Eskimo Creek – Eddie’s Fireplace Inn		
<u>Location:</u>	King Salmon		
<u>Project Manager:</u>	Rich Sundet	<u>Telephone:</u>	(907) 269-7699
<u>Site ID Number:</u>	2152	<u>Ledger Code:</u>	14875960

Situation:

In 1994, a petroleum hydrocarbon seep into Eskimo Creek in the vicinity of Eddie’s Fireplace Inn was reported to DEC. The source(s) of contamination was unknown but sample analysis indicated a diesel range fuel product. Possible suspect areas included a former heating oil tank buried behind Eddie’s Fireplace Inn and possible debris and/or runoff from the nearby airport. The owner had died and his estate was unwilling or unable to do any cleanup measures. The former heating oil tank had been decommissioned by the former owner without any sample data. It was suspected as a source and the CSP investigation identified soil and groundwater contamination in the former tank location. Interim corrective action included the installation of recovery wells to intercept product before it entered Eskimo Creek. However, soil contamination at (and adjacent to) the seep area continued to cause sheen and product release to the creek.

In 2001, an interception trench and recovery system was installed. About 100 cubic yards of petroleum contaminated soil excavated from the trench or adjacent to Eskimo Creek was transported off-site and stored at the community landfill. The contaminated soil was thermally treated in 2003 and used as landfill cover material. Between 2001 and June 2012, about 92 gallons of product have been recovered from the interception trench and recovery wells. No sheening or detection of petroleum hydrocarbons has been observed in the creek since the interception trench was installed.

FY11 Actions:

Work consisted of continued monitoring and recovery of product from recovery wells. Did not utilize the full 20K because the contractor was able to coordinate with another project in King Salmon to minimize expenses.

FY11 Response Fund Expenditures:	\$10,828.22
FY11 Cost Recovery:	\$ 1,482.79

FY12 Actions:

About one gallon of product was recovered in FY12 from the existing recovery wells and interception trench.

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Projected Actions and Expenditure Amounts:

Product will continue to be recovered from the existing recovery wells and interception trench. In addition, the six existing monitoring wells and the on-site drinking water well will be sampled for petroleum hydrocarbons.

Estimated FY13 Costs:	\$70,000.00
-----------------------	-------------

Project/Site Name: **Flint Hills Resources Refinery**

Location: North Pole

Project Manager: Ann Farris

Site ID Number: 539

Telephone: (907) 451-2104

Ledger Code: 14804360

Situation:

A very large but unknown amount of product leaked from above ground bolted storage tanks in the late 1970s and early 1980s. During 2000 to 2002 site characterization activities, the chemical sulfolane, an industrial solvent, was discovered periodically in scattered ground water monitoring wells. Flint Hill Resources (FHR) took control of the refinery in 2004. In 2009 an extensive offsite sulfolane groundwater plume was documented. In March 2010, DEC established a Technical Project Team to provide comprehensive and coordinated oversight for the investigation into the sulfolane release. FHR currently supplies affected residents with drinking water.

FY11 Actions:

DEC and FHR reached an agreement on an accelerated timeline for investigating and remediating the groundwater contamination. A DEC contractor, Oasis Environmental, was retained to assist DEC with groundwater plume characterization and drinking water well sampling continued. Standard laboratory operating procedures for sulfolane analysis were crafted. Plant samples were collected and tested to address concerns about eating garden produce grown with sulfolane-impacted well water.

FY11 Response Fund Expenditures: \$461,974.62

FY11 Cost Recovery: \$417,554.74

FY12 Actions:

FY12 Response Fund Expenditures: \$474,862.02

FY12 Cost Recovery: \$557,450.60

FY13 Projected Actions and Expenditure Amounts:

Estimated FY13 Costs: \$ 0.00

<u>Project/Site Name:</u>	Gaffney Road Areawide	
<u>Location:</u>	Fairbanks	
<u>Project Manager:</u>	Tamara Cardona-Marek	<u>Telephone:</u> (907) 451-2192
<u>Site ID Number:</u>	2919	<u>Ledger Code:</u> 14622260

Situation:

DEC has been investigating and monitoring area wide soil and ground water contamination in the area of Gaffney Road since 1997. The assessment used passive soil gas surveys, groundwater monitoring wells, and sewer line sampling methodologies to define the nature and extent of the contamination. The contamination consists primarily of tetrachloroethylene (PCE) and its breakdowns chemicals from former dry cleaning operations in the area. The groundwater contaminant plumes extend in a northwesterly direction from Gaffney Road towards the Golden Heart Utilities well field that serves the City of Fairbanks. However, the groundwater monitoring data collected over 10 years indicate the contamination is not reaching the public water wells.

Four release areas of chlorinated solvents have been identified. Three are west of Cushman Street, creating the “Gaffney-West” groundwater contaminant plume, which consists primarily of PCE. The fourth source area is located east of Cushman Street and has created the “Gaffney-East” groundwater plume that consists of both PCE and trichloroethylene (TCE). The distribution of contaminants is associated with the sanitary sewer lines in the area.

DEC is addressing the releases individually as “Gaffney East” and “Gaffney West” due to the different locations of the source. Investigation of soil, groundwater, and vapors initially started as the Gaffney Areawide investigation but has now been split (Gaffney East and Gaffney West). However, because the plumes potentially co-mingle, groundwater investigation and monitoring will potentially remain under Gaffney Road Areawide.

FY11 Actions and Expenditure Amounts:

The University of AK Fairbanks, through a Reimbursable Services Agreement, provided analytical testing and monitoring services to support vapor intrusion investigations.

FY11 Response Fund Expenditures:	\$37,572.96
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

The University of AK Fairbanks, through a Reimbursable Services Agreement, continued to provide analytical testing and monitoring services to support vapor intrusion investigations. This was a continuation of the 2011 work.

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$ 5,000.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated

Estimated FY13 Costs:	\$ 0.00
-----------------------	---------

Project/Site Name: **Gaffney Road East**
Location: Fairbanks
Project Manager: Tamara Cardona-Marek
Site ID Number: 25573
Telephone: (907) 451-2192
Ledger Code: 14306160

Situation:

This site is part of an area-wide effort to track tetrachloroethylene, trichloroethylene and 1, 2 dichloroethane contaminants in groundwater from multiple sources. This portion of the groundwater plume has been made an individual site because it appears to be associated with sources along the east end of Gaffney Road, including the sanitary sewer lines in the area. Vapor intrusion assessments from 2007-2010 indicate at least one building with vapor intrusion occurring. Access to take soil, groundwater or indoor air samples in the suspected source area has been denied. Additional work is needed to characterize the source area after a subpoena for property access is issued.

FY11 Actions and Expenditure Amounts:

Work included conducting an investigation to define the northbound limit of the Gaffney-East groundwater chlorinated solvent plume through additional groundwater and subslab soil gas sampling.

FY11 Response Fund Expenditures: \$65,321.83
FY11 Cost Recovery: \$ 0.00

FY12 Actions:

In 2012 the actions started in 2011 were finalized. These actions included finalizing the vapor intrusion assessments,; reporting for the activities conducted in 2011; and submittal of the collected data in Access and GIS format.

FY12 Response Fund Expenditures: \$66,123.48
FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Work planned for FY 13 includes sampling at the suspected source area, Coin King, to fill all existing data gaps. Sampling will include installation of soil borings for soil sampling ; monitoring wells for groundwater sampling, subslab sampling probes for sampling of vapors beneath the slab; compound specific isotope analysis to evaluate natural attenuation of solvents within the groundwater plume; logging of lithology during soil boring installation; inspection and sampling of floor drains and manholes; evaluation of remediation alternatives; and reporting.

Estimated FY13 Costs: \$232,000.00

<u>Project/Site Name:</u>	Gaffney Road West - Royal Master Laundrette		
<u>Location:</u>	Fairbanks		
<u>Project Manager:</u>	Tamara Cardona-Marek	<u>Telephone:</u>	(907) 451-2192
<u>Site ID Number:</u>	4503	<u>Ledger Code:</u>	14154580

Situation:

This site is part of an area-wide effort to track tetrachloroethylene, trichloroethylene and 1, 2 dichloroethane contaminants in groundwater from multiple sources. This property has been made an individual site because it was a former dry cleaners and soil and groundwater contamination at the southwest corner of the building is causing vapor intrusion concerns for the building. This site is the current location of the Good News Bible and Bookstore on Gaffney Road. There has been a settlement agreement with the responsible parties, including the current owner and the former owner who operated the dry cleaning facility. The investigation to date has shown the plume does not extend to the city drinking water wells, which are approximately a half-mile downgradient of the site.

FY11 Actions and Expenditure Amounts:

Work completed at this site was contracted under the Gaffney Road Area-Wide ledger code and included operations and maintenance of the remediation system (including electricity and air monitoring), groundwater monitoring, and vapor intrusion assessment of the buildings affected by the solvent plume.

FY11 Response Fund Expenditures:	\$199,187.40
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

Work during FY12 included operations and maintenance of the remediation system (including electricity and air monitoring), upgrading of several SVE wells that were in need of maintenance, coordination with UAF for sample collection for the existing RSA, vapor intrusion assessments, and reporting.

FY12 Response Fund Expenditures:	\$160,904.50
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Work planned for FY13 includes continued operations and maintenance of the remediation system (electricity and air monitoring); vapor intrusion assessment at the Donut Shop; installation and sampling of additional monitoring wells for vertical delineation of the plume and lithology logging; and sampling of groundwater for compound specific isotope analysis for an evaluation of natural attenuation within the groundwater plume.

Estimated FY13 Costs:	\$272,000.00
-----------------------	--------------

Project/Site Name: **Kaltag School Oil Seep**

Location: Katltag

Project Manager: Jim Fish

Site ID Number: 289

Telephone: (907) 451-2117

Ledger Code: 14937680

Situation:

Past remedial efforts (soil excavation, bio-cell treatment, and a seepage filtration system) in Kaltag have addressed oil seepage appearing each spring at the Kaltag School and surrounding roads. The former Yukon School District (YKSD) tank farm has consistently contained the greatest quantities of diesel range organics (DRO) and benzene-contaminated soils, and presents a significant source area for groundwater contamination near the school. The conceptual site model indicates that dermal absorption and incidental ingestion continue to be exposure pathways to contaminants from soil. This project will estimate the quantity of contaminated soil (via screening and analysis), evaluate remedial options, and develop a plan for clean-up. The former YKSD tank farm is also the location of a school playground. Past reconnaissance has reported storage of electrical equipment and presence of stained soil, indicating possible leaking of PCB compounds at the former tank farm, near the playground. Soils will be screened for PCB presence or absence, and containments actions will be taken, if necessary.

FY11 Actions:

PCB field-screening was undertaken near the former YKSD tank farm, and what is now teacher housing. Field screening indicated widespread PCB contamination at the former YKSD tank farm, but the field-screening results were false-positives and were not confirmed by laboratory analysis. The compound 1-chloro-octadecane was hypothesized to interfere with the field screening method. DRO-contaminated soil was also delineated at the former YKSD tank farm, as well as at the YKSD heating-oil transfer tank and winter fuel-line leak areas.

FY11 Response Fund Expenditures: \$51,175.21

FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

Additional DRO was delineated at the former YKSD tank farm, as well as at the YKSD heating-oil transfer tank and winter fuel-line leak areas. Spring melt-water carrying sheen from contaminated soil in the area was monitored and mitigated with absorbant boom materials during FY12. A cleanup plan was developed for future implementation. A feasibility study with University of Alaska Fairbanks was initiated to identify promising soil remediation approaches. Cleanup is anticipated for FY 14.

FY12 Response Fund Expenditures: \$17,639.46

FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work is anticipated for FY 13.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **Kincaid Park Former Biathlon Range**
Location: Anchorage
Project Manager: Eileen Olson
Site ID Number: 4650
Telephone: (907) 269-7527
Ledger Code: 14264260

Situation:

A biathlon shooting range located near the Kincaid Outdoor Center on West Raspberry Road in Anchorage was closed in late 2007 after 20 years of use. The range was subsequently removed during May 2008 earthwork and other preconstruction activities for a proposed artificial turf soccer field and stadium. Bullet slugs and fragments and potentially contaminated soil removed from the range and particularly from the target line were not properly tracked or handled, so that the location of an estimated 75 cubic yards of hazardous waste, federally regulated under the Resource Conservation and Resource Act (RCRA) hazardous waste regulations, remains at the site within approximately 14,000 cubic yards of fill that were moved during the 2008 site work. As a result of the mishandling of the contaminated media, a Notice of Violation was issued by the U.S. Environmental Protection Agency (EPA) for soil that was stockpiled improperly and the soccer field project area, encompassing all areas documented as contaminated or potentially-contaminated by lead, was classified as a RCRA solid waste management unit. EPA is the lead oversight agency but DEC Contaminated Sites regulations are also applicable to the site cleanup. DEC has coordinated closely with EPA with respect to communications to the involved parties to and otherwise providing regulatory oversight to prevent duplication of effort by the responsible parties. Activities completed to date include the removal by the responsible parties in September 2008 of approximately 52 tons of hazardous waste that was disposed of at a permitted facility out-of-state, and removal and treatment on site 1,344 cubic yards of contaminated soil in 2011. The 1,344 cy of treated lead contaminated soil was disposed of at the Municipality of Anchorage Class D landfill as non-hazardous waste. Clean closure of the site without institutional controls was issued by EPA and DEC in 2012.

FY11 Actions:

A Clean Closure and Site Cleanup Plan was approved. Cleanup was completed at the south end of the former target line and the two areas designated as the A2 and A3 fill areas in the *Closure Plan*.

As a result of the discovery of visible lead in areas not previously recognized as being impacted, EPA and DEC expanded the area of concern to include all areas where visible lead is present.

FY11 Response Fund Expenditures:	\$43,312.49
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

Field work, including stabilizing lead contaminated soils, continued through early October 2011. DEC staff periodically inspected the site and in coordination with EPA, jointly approved various subplans or modifications to the work plan. DEC in coordination with EPA, reviewed the closure report and jointly provided comments on the original and revisions of the report. In May 2012, EPA and DEC issued independent clean closure letters without institutional controls regarding the site.

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work is anticipated in FY13.

Estimated FY13 Costs:	\$	0.00
-----------------------	----	------

Project/Site Name: **Kotzebue Former HIS Hospital – School Pipeline Release**
Location: Kotzebue
Project Manager: Kim DeRuyter Telephone: (907) 451-2752
Site ID Number: 25558 Ledger Code: 14282360

Situation:

Historical spill of #1 diesel occurred over time from 1950 to 1980. An estimated 100,000 to 200,000 gallons released underground in an area up to 10 acres. The Department of Environmental Conservation was alerted when fuel was discovered seeping into the elementary school basement in 1980. The suspected sources were: 1) a ruptured tank at the bulk tank farm in the 1950's; 2) the former distribution line from the bulk tank farm to the Kotzebue school and the former Public Health Service Hospital; and 3) the tank farm located at the school consisting of ASTs, USTs, and various piping systems.

An estimated 40,000 gallons of fuel was recovered by several contractors and private individuals between 1980 and 1984. Floating product was noted on the groundwater in 1986 between two and six inches thick. In 1988 high snowfall created a visible seep of oil along the beach, and sheen was noted on the Kotzebue Sound. A barrier was installed along 400 plus feet of the beach to prevent oil migration into Kotzebue Sound. Twenty-thousand to 40,000 gallons of recoverable fuel was estimated to remain underneath Kotzebue in 1986.

FY11 Actions and Expenditure Amounts:

Potentially Responsible Party (PRP) letters were sent to multiple PRPs. A meeting was held in Kotzebue to bring the PRPs and stakeholders up to date on the site history, and to begin forging an agreement to move ahead with site characterization. A follow-up teleconference was held in early 2011. Interviews were conducted with Kotzebue elders, former BIA employees, and a contact from a barge company that had personally transferred fuel to the school pipeline.

FY11 Response Fund Expenditures:	\$16,900.72
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

No action

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Resume PRP meetings with the goal of allocating costs among the primary PRPs and beginning site characterization

Estimated FY13 Costs:	\$ 0.00
-----------------------	---------

Project/Site Name: **M & M Enterprises – Wyoming Drive**
Location: Anchorage
Project Manager: Rich Sundet
Site ID Number: 303
Telephone: (907) 269-7578
Ledger Code: 14670960

Situation:

The site is a former battery and scrap metal recycling operation. A1991 site assessment identified elevated levels of lead and petroleum in soil and groundwater. Later investigations confirmed the presence of mercury and a volatile organic compound above cleanup levels. In 2005 approximately 372 tons of lead-contaminated soil was removed. In 2007 an area of remaining lead contamination was cleared of vegetation and paved. The landowner later determined the paving was inadequate and had issues with surface drainage. DEC contracted to modify the cap to satisfactorily address the property owner's concern including to address the surface drainage alleged problem. However, DEC's term contractor was unable to obtain necessary permits and approvals from the Municipality of Anchorage (MOA) for the work in 2009 and 2010.

FY11 Actions and Expenditure Amounts:

Planning efforts with a new DEC contractor and the Municipality of Anchorage began for modification to the existing asphalt cap and to improve drainage.

FY11 Response Fund Expenditures: \$10,662.44
FY11 Cost Recovery: \$ 0.00

FY12 Actions:

Work plan approved by DEC and the property owner, and necessary approvals and permits obtained from the MOA. Work commenced to modify the cap.

FY12 Response Fund Expenditures: \$99,502.25
FY12 Cost Recovery: \$ 418.64

FY13 Projected Actions and Expenditure Amounts:

Completion of the modified cap and issuance of a cleanup complete decision with institutional controls for the property.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **M/V Golden Seas Incident**
Location: 44 miles North of Atka Island
Project Manager: John Brown
Site ID Number: 10259933701
Telephone: (907) 269-7688
Ledger Code: 14307260

Situation:

At 8:05 AM on December 3, 2010, the US Coast Guard (USCG) reported to the Alaska Department of Environmental Conservation (ADEC) that the vessel M/V *Golden Seas* was adrift north of Adak Island. The crew of the vessel reported the loss of power to the USCG at 12:15 AM on December 3, 2010.

No spill occurred. The *Golden Seas* is a 738-foot long Liberian registered Panamax bulk carrier with 20 crew members aboard. The United State Coast Guard (USCG) reported that the vessel's cargo is rapeseed (used to make canola oil) and that it had up to 451,561 gallons of IFO 380; 11,780 gallons of diesel fuel; and 10,000 gallons of lube oil on board. The crew reported that the turbocharger on the ship's single propulsion engine failed and was not reparable at sea. Without the turbocharger, the ship's engine was not able to turn the propeller with sufficient power to hold the vessel in position or to make headway in the severe weather.

FY11 Actions:

On December 3, 2011, the Potential Responsible Party (PRP), the USCG and ADEC established a Unified Command (UC) to manage the response to this incident and set up a command post in Anchorage. The ocean-going tug, the *Tor Viking II*, and an offshore response vessel, the *Nanuq*, stationed in Dutch Harbor for work with Shell Oil were contracted by the PRP to assist the *Golden Seas*. The ADEC 10-inch emergency tow system staged in Dutch Harbor was mobilized to the *Tor Viking* for potential deployment upon arrival to the scene. The USCG Cutter *Alex Haley*, two USCG HH60 Helicopters and a USCG C-130 airplane with a second ADEC 10-inch emergency tow system were mobilized to assist in the response.

Shortly after 8:00 PM on December 4, 2011, the crew of the tug *Tor Viking II* successfully deployed the State of Alaska Emergency Towing System (ETS) and attached the towline to the *Golden Seas*. The USCG Cutter *Alex Haley* joined the vessels at 11:30 PM on December 4 at a location just north of Seguam Island and escorted the vessels through Amutka Pass. The UC released the cutter from its escort duties at 11:30 AM on December 5, but the ship remained in the general vicinity of the *Golden Seas* as it performed normal patrol duties on its return to Dutch Harbor.

At 1:40 PM on December 7, 2011, the *Thor Viking II* and the *Golden Seas* disconnected the tow in Unalaska Bay and the *Golden Seas* proceeded to anchor at Wide Bay to repair the vessel's turbocharger. Repairs to the turbocharger were completed on December 12, 2011 and approved by the USCG. Sea trials were conducted on December 13 and the *Golden Seas* subsequently departed Dutch Harbor at 9:45 AM that morning. Photographs, video and other incident information are available for viewing at:

http://dec.alaska.gov/spar/perp/response/sum_fy11/101203201/101203201_index.htm

FY11 Response Fund Expenditures: \$ 44,472.44
FY11 Cost Recovery: \$ 23,077.36

FY12 Actions:

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$25,236.18	

FY13 Projected Actions and Expenditure Amounts:

Estimated FY13 Costs:	\$	0.00
-----------------------	----	------

Project/Site Name: **Manokotak School**

Location: Manokotak

Project Manager: Melinda Brunner

Site ID Number: 2197

Telephone: (907) 451-5174

Ledger Code: 14818860

Situation:

The former Manokotak School Site operated as a school from 1959 to 2002, and is currently owned by Southwest Regional School District (SWRSD). It consists of four constructed buildings, two aboveground storage tanks (ASTs), a day tank, a generator modular enclosure, a cellular phone tower and associated modular enclosure for equipment, debris, fencing, and other miscellaneous items. The Site is currently vacant and unused with the exceptions of minimal storage occurring on site and occupancy of the single quarters building SWRSD began renting out in December 2010. The Manokotak Village Council expressed the desire to construct a new multi-use facility at the Site, and a *Manokotak Multi-use Facility Business Plan* has been developed with funding provided by the Bristol Bay Economic Development Corporation (AM, 2009). They requested a DEC Brownfield Assessment through the Reuse & Redevelopment Program, who in turn coordinated with the Department of Education and the Southwest Regional School District.

Numerous historical spills are believed to have occurred at the school associated with the storage and management of fuel, with the most recent spill occurring in December 1994 when approximately 125 gallons of diesel fuel spilled with approximately 110 gallons recovered. DEC conducted a limited site assessment in 1998, but did not find any soil concentrations above cleanup levels. Asbestos is also considered to be a concern in the structures.

In 2001 a new school was constructed approximately 3.5 miles south of the old school site and the above-ground bulk fuel storage tank farm was cleared of all but two tanks. The 6,500 gallon tank was slated for removal, while the 4,000 gallon tank was to be used as fuel storage for the emergency generator.

FY11 Actions:

A Property Assessment and Cleanup Plan was completed. The findings indicate that the site is in need of solid waste removal, sampling and abatement of asbestos, demolition of structures and tanks, and excavation and removal of petroleum contaminated soil.

FY11 Response Fund Expenditures: \$37,229.60

FY11 Cost Recovery: State Owned – No Cost Recovery

FY12 Actions:

No action taken.

FY12 Response Fund Expenditures: \$ 0.00

FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **McGahan Utilities**

Location: Nikiski

Project Manager: Alyce Hughey

Site ID Number: 478

Telephone: (907) 262-3409

Ledger Code: 14955670

Situation:

Tetrachloroethylene (PCE), a chlorinated solvent, was identified in the McGahan Public Water System in 1988. The source was determined to be the site of a former laundromat/dry cleaning facility. The legislature appropriated funds to install carbon treatment on the McGahan Utilities water system. Contaminant concentrations in the McGahan wells remained steady for years. The site was closed in 2005 and a long term groundwater monitoring program was established.

FY11 Actions:

Monitoring wells were sampled. PCE concentrations were still above cleanup levels.

FY11 Response Fund Expenditures: \$14,332.50

FY11 Cost Recovery: \$ 0.00

FY12 Actions:

All but one of the remaining groundwater monitoring wells were decommissioned.

FY12 Response Fund Expenditures: \$ 0.00

FY12 Cost Recovery: \$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated in FY13.

Estimated FY13 Costs: \$ 0.00

Project/Site Name: **Peters Creek – Tesoro – State Lead**
Location: Chugiak
Project Manager: Robert Weimer
Site ID Number: 23374
Telephone: (907) 269-7578
Ledger Code: 14107560/
 14972661

Situation:

In early 1986, several residential wells were contaminated with gasoline. The Tesoro station at the Northeast Corner of Voyles Road and Old Glenn Highway was found to be the source of contamination. Initial cleanup action consisted on drilling three on-site recovery wells and extracting approximately 250 gallons of gasoline over a period of three months. A soil vapor extraction system was installed and operated from May 17, 1989 through January 16, 1990. The tanks and petroleum contaminated soil were removed in 1993. These residences have since been connected to a municipal water system. A 1994 risk assessment prepared for the area concluded that the hazards and/or risks posed by the contamination were relatively low and did not warrant further remedial action. Legal Location in Lots 9 & 10, Block 2, Earl Ray Subdivision. Former LC for the initial spill was 14972670.

FY12 Actions:

No activity in FY12 as projected

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Proposed Scope of Work:

Conduct groundwater monitoring. Follow-up monitoring, depending on results, is anticipated in FY18.

Estimated FY13 Costs:	\$40,000.00
-----------------------	-------------

Project/Site Name: **Prescott Equipment – Rampart Drive – State Lead**
Location: Anchorage
Project Manager: Todd Blessing Telephone: (907) 269-7699
Site ID Number: 3752 Ledger Code: 14896860

Situation:

The property is located at 2774 Rampart Drive, Anchorage, Alaska and consists of approximately 1.88 acres. In October 2001, DEC received notice from the Law Offices of James H. McCollum, LLC provided on behalf of Prescott Equipment, Inc., that trichloroethene (TCE) in groundwater was discovered in excess of DEC cleanup levels.

In the Fall of 2002, the Municipality of Anchorage (MOA) performed a groundwater investigation on the adjacent MOA property. That investigation found that TCE was detected in the groundwater in two of the three monitoring wells. In the Spring of 2003, Prescott Equipment performed a soil vapor investigation on the Prescott Equipment and MOA properties. The investigation was inconclusive since TCE was detected in some areas along the property line between the MOA property and the property immediately west of the MOA property using field screening devices. In the Spring of 2003, Prescott Equipment, MOA and the former tenants of the MOA property, ie., the Alaska Army National Guard (AKARNG), were requested to pursue further investigation of the groundwater contamination. The parties declined to perform any further investigation.

In 2003, DEC determined that further work was necessary to define the source(s) of the TCE groundwater contamination at the Prescott Equipment Pipeyard and began to plan for budget funds and assume State lead. On the findings of the State lead investigation and other information known, DEC determined that the TCE levels were above DEC cleanup level, but the plume was not migrating and did not pose an imminent risk since the groundwater is not used as a drinking water source in this area. DEC issued a No Further Remedial Action Planned (NFRAP) with an institutional control in the form of a deed notice for the Prescott Pipeyard-Rampart Drive Lot on July 15, 2004. Periodic groundwater monitoring continues to ensure that the plume is degrading through natural attenuation.

FY12 Actions

No activity in FY12 as projected

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Proposed Scope of Work:

Continue with groundwater monitoring periodically through FY22.

Estimated FY13 Costs:	\$ 50,000.00
-----------------------	--------------

Project/Site Name: **Red Dog Mine**

Location: Kivalina

Project Manager: Tamara Cardona-Marek

Site ID Number: 1423

Telephone: (907) 269-7578

Ledger Code: 14864860

Situation:

Red Dog Mine is located about 20 miles south of Kivalina and is one of the world's largest zinc and lead mines. The port and mine sites are operated by Teck and owned by NANA Corporation. In 2009, Teck Cominco changed the corporation to Teck Resources Limited. The road is owned by Alaska Industrial Development and Export Authority (AIDEA) which passes through the Cape Krusenstern National Monument, managed by the National Park Service. The mineral soil is processed at the mine, which is located about 50 miles from the ocean, and the concentrate ore is transported by covered truck to storage buildings at the port. During the open water period, the ore is moved by a conveyor belt system from the buildings to barges, and transported from the barges to 3.0 miles off shore and placed into larger vessels.

Fugitive dust from the transportation of the ore concentrate between the mine and the port has resulted in contaminating those areas and along the 52 mile connecting road for zinc, lead and cadmium above background levels. Petroleum contamination is also present at the powerhouse due to release of crankcase oil and fuel oil from sump beneath generators.

FY12 Actions:

No activity in FY12 as projected

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Proposed Scope of Work:

Additional review of reports and submission of comments to Teck Cominco's outstanding plans and reports (sediment, moss, etc).

Estimated FY13 Costs:	\$40,000.00
-----------------------	-------------

Project/Site Name: **Residence – 3573 Rosie Creek Road**
Location: Fairbanks
Project Manager: Tamara Cardona-Marek
Site ID Number: 25504
Telephone: (907) 451-2192
Ledger Code: 14285460

Situation:

In October 2008 two oil-burning stoves were stolen from the main residence and a detached guest house. The fuel lines were separated from the stoves and heating fuel from the aboveground storage tanks drained into the structures, saturating the floors and seeping into the crawlspace and underlying soil. During initial remediation, the guest house was razed and contaminated soil was removed from the footprint of the former structure and from the crawlspace of the main residence. Results from an October 2009 sample from the on-site drinking water well reported non-detect for petroleum constituents.

FY11 Actions and Expenditure Amounts:

Additional characterization and cleanup were conducted.

FY11 Response Fund Expenditures:	\$15,808.58
FY11 Cost Recovery:	\$ 0.00

FY12 Actions:

No work completed.

FY12 Response Fund Expenditures:	\$ 0.00
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

No work anticipated.

Estimated FY 13 Costs:	\$ 0.00
------------------------	---------

Project/Site Name: **River Terrace RV Park**
Location: Soldotna
Project Manager: Rich Sundet
Site ID Number: 1535

Telephone: (907) 269-7578
Ledger Codes: 14974360

Situation:

River Terrace RV Park (RVRVP) is a 10-ace parcel located adjacent to the Kenai River in Soldotna. A dry cleaner facility operated there from the 1960s through the 1980s. Currently the parcel is occupied by a trailer court, a recreational vehicle park and associated facilities, including a Laundromat.

In 1992, a complaint of leaking barrels was received by ADEC and 22 barrels of waste oil and other hazardous substances were identified on site. One of the 55 gallon drums was labeled “Perchloroethylene” which is also known as tetrachloroethylene or PCE. The owner was requested to have an environmental contractor remove the barrels and investigate the property based on its past use as a dry cleaning facility. The assessments identified soil contamination above DEC cleanup levels for petroleum hydrocarbons and PCE.

In 1997, DEC evaluated the information from the site investigation and established alternative cleanup levels (ACL) for the site. The groundwater monitoring results identified PCE above the ACL and the property owner developed a plan to address the problems. The owner excavated approximately 2,700 cubic yards of soil under the direction of EPA and treated it on-site using a soil vapor extraction system.

Following a settlement agreement with the property owner DEC assumed the lead role to investigate the site and performed a water quality and sediment investigation in the Kenai River adjacent to RTRVP. Furthermore, a Remedial Investigation/Feasibility Study (RI/FS) was prepared that further characterized the site and evaluated several remedial alternatives to treat the contamination.

An interim treatment system to treat storm water discharge prior to it entering the Kenai River was installed. A Record of Decision established cleanup levels at the site and specified Hydrogen Release Compound (HRC) as the method to treat the groundwater. The injections would occur in a phased approach. In fall 2000, 56 HRC injection points were installed in Phase I and in 2001, another 51 injection wells were installed under Phase II.

DEC continues to monitor the treatment at the site and evaluate trends in contamination in both the groundwater and the sediments in the Kenai River. In addition to cleanup activities, funding has been provided for legal advice on cleanup matters, litigation of the State’s cost recovery action, and litigation to retain access to the site for the assessment and cleanup work.

FY11 Actions:

DEC issued its second 5-year review of the Record of Decision. The review noted that monitoring has shown that the selected remedy Hydrogen Release Compound (HRC) has enhanced natural attenuation of PCE and its degradation products to treat groundwater. A DEC contractor continued semi-annual groundwater monitoring. DEC met with EPA for a site inspection and review of records for the State and Tribal Assistance Grant program.

In March 2011 the Attorney General's Office filed an Expedited Motion for Final Judgment for Payment of Money & Extension of Consent Decree and other motions/attachments before the Superior Court in Anchorage regarding the Consent Decree the State has with the owners.

FY11 Response Fund Expenditures:	\$173,090.44
FY11 Cost Recovery:	\$ 93,896.12

FY12 Actions:

Staff worked in coordination with the Attorney General's Office and the Department of Natural Resources on the issuance of equitable servitudes on the property regarding the remaining contamination on the large River Terrace parcel. DEC performed an annual groundwater monitoring event.

FY12 Response Fund Expenditures:	\$ 96,599.63
FY12 Cost Recovery:	\$ 0.00

FY13 Projected Actions and Expenditure Amounts:

Annual groundwater monitoring, and a pore water and sediment sampling event will occur in spring 2013.

FY13 Response Fund Expenditures:	\$400,000.00
----------------------------------	--------------

Project/Site Name: **Sand Lake Cleaners – State Lead**
Location: Anchorage
Project Manager: Robert Weimer
Site ID Number: 3319
Telephone: (907) 269-7525
Ledger Code: 14922460

Situation:

The site was operated as a dry cleaner from 1969 to 1999. In March 2000, two soil borings were drilled at the site that identified chlorinated solvent contamination (tetrachloroethylene (PCE), trichloroethylene (TCE), and 1, 2-dichloroethylene (DCE)) near the building of the former dry cleaner. In November 2000, more two soil borings were drilled that found solvent contamination had migrated to the adjacent property to the north. In May 2002 three soil borings were drilled that identified extensive solvent contamination on the dry cleaning property. In August 2004, two monitoring wells were installed that identified PCE and DCE groundwater contamination at the site. In March 2006, one additional monitoring well was installed that also found solvent contamination in the soil and groundwater. Depth to groundwater is approximately 60 to 76 feet below ground surface.

The extent of soil and groundwater contamination has not been defined. Modeling has identified potential risk of indoor and outdoor exposure to chlorinated solvent vapors. The adjacent property owner to the north (Alaska National Insurance) conducted indoor air sampling in the summer and winter and found no detectable indoor air contamination in their building. Besides the building to the north, an indoor vapor intrusion assessment or air sampling has not been conducted for the building on the dry cleaner property or other nearby buildings.

The dry cleaner property owner (Sage Properties) has refused to conduct any site work since November 2007 and was sued by the adjacent down gradient property owner to the north (Alaska National Insurance) for failure to comply with a settlement agreement between those two parties that requires Sage Properties to have completed site characterization and cleanup several years ago. The court issued a judgment on 5/11/2009 against the Sage Properties for \$228,000 to be paid to Alaska National Insurance. Department of Environmental Conservation's (DEC) understanding is that none of this money has been paid.

On August 20, 2010 DEC sent another letter to Sage Properties and their attorney requesting a work plan for conducting soil/gas investigation, indoor air vapor intrusion assessment, characterization of the extent of soil and groundwater contamination with additional soil borings and monitoring wells, groundwater monitoring, and conduct an indoor air survey of the on property building. The letter noted that if Sage Properties is unwilling or unable to conduct the requested actions in the time frame outlined in this letter, DEC will, under the authority of AS 46.09.020, begin the necessary assessment, cleanup and monitoring actions to address the remaining hazardous substance contamination. The letter also noted that if DEC performs this work, we are required under AS 46.08.070 to recover our expenses as well as those of our contractors from you and other persons liable under AS 46.03.822 and other law. To date Sage Properties has refused to conduct the requested site work.

On August 23, 2010 State of Alaska's Department of Law sent a letter to Sage Property and their attorney notifying them that the State of Alaska's Department of Law have initiated civil enforcement against his client for failure to pay cost recovery bills.

Since March 2011, the adjacent property owner to the north (Alaska National Insurance), Sage Properties, the mortgage holder (Pacific Trading), and GCI which operates a cell phone tower on

the dry cleaner property are currently trying to negotiate an agreement to set aside GCI lease payments to go toward site cleanup and assessment costs. To date no agreement has been provided to DEC.

FY12 Actions:

No activity in FY12 as projected

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Proposed Scope of Work:

Monitor groundwater and conduct site characterization to help define the extent of the soil, vapor, and groundwater contamination. DEC is in discussions with the property owner's attorney for site access and agreement on site work. Because the location of the source area(s) is unknown at this time, significant assessment and cleanup work will likely continue through FY15. Reduced monitoring is expected thereafter.

Estimated FY13 Costs:	\$125,000.00
-----------------------	--------------

Project/Site Name: **Six-Mile Richardson Highway Area-wide Treatment/Monitoring – State Lead**
Location: North Pole
Project Manager: Janice Wiegiers Telephone: (907) 451-2127
Site ID Number: 329 Ledger Code: 14621570

Situation:

In 1995/1996, an area-wide trichloroethylene (TCE) groundwater plume was discovered in the Six-Mile Richardson Highway area. The plume is over a mile in length, up to 1,200 feet wide, and up to 100 feet in depth. It extends in a northwesterly direction from south of the New Richardson Highway to the Six-Mile Village Subdivision area.

The plume impacted fifteen residential drinking water wells and the homeowners were provided financial assistance to install water treatment systems (e.g., carbon filters) to remove the TCE from their drinking water. In 1996, Department of Environmental Conservation's (DEC) initiated an annual long-term groundwater program that includes sampling from permanent monitoring wells and a selected number of residential wells. The data indicates a decreasing trend in contaminant concentrations over time.

Individual site investigations were conducted concurrently with the initial phases of the area wide groundwater investigation. Site investigations at the McCall, Holder, Walsky, and Six-Mile Truck Shop properties concluded that there are multiple source areas where TCE was discharged to the ground. The individual source areas are creating groundwater plumes that eventually merge together to form the area-wide plume. The primary source areas appear to be located on the Holder and Walsky properties. Potentially responsible parties have been notified of the contamination, but DEC has continued to lead investigation and treatment of the area-wide plume.

FY12 Actions :

Work will consist of sampling the minimal numbers of wells to verify plume stability and continue sampling and treatment system maintenance of residential water wells that are impacted. Vapor intrusion will also be evaluated for the first time.

FY12 Response Fund Expenditures: \$ 67,829.03
FY12 Cost Recovery: \$ 0.00

FY13 Proposed Scope of Work:

Monitoring plume stability and sampling and treatment system maintenance of impacted residential drinking water wells. The scope of monitoring is expected to decrease in subsequent fiscal years.

Estimated FY13 Costs: \$104,000.00

<u>Project/Site Name:</u>	Trailside General Store – State Lead		
<u>Location:</u>	Homer		
<u>Project Manager:</u>	Paul Horwath	<u>Telephone:</u>	(907) 262-3422
<u>Site ID Number:</u>	25046	<u>Ledger Code:</u>	14695880

Situation:

In the spring of 1999, gasoline emerged through fissures in the asphalt pavement around the Trailside General Store's underground fuel storage tank systems. Trailside's contractors initially responded to the release and initiated cleanup actions, eventually excavating approximately 5,000 cubic yards of contaminated soil. Trailside's contractor ceased all work on the project, claiming a lack of payment by Trailside in the spring/summer of 2000. The contractor left a deep open excavation at the site and high concentrations of fuel contamination remained in the soil. DEC then proceeded to continue the response work at the site; stabilizing the excavation site and completing additional excavation, and removal, of highly contaminated soils and completing backfilling in the cleanup excavation pit to ground level. A groundwater diversion system was installed to prevent contamination from migrating under the building on site. Excavated contaminated soils were transferred to the Homer Department of Transportation & Public Facilities (DOT&PF) Maintenance Facility. These soils were subsequently remediated and land spread at the Homer DOT&PF Maintenance Facility. Periodic groundwater and indoor air sampling has been performed at the site since 2001. Groundwater sampling was last conducted at this site in 2010. The building has been leased throughout this time period and continues to be used by private and/or public entities. The properties surrounding the site are commercial properties adjacent to the Sterling Highway, with commercial/residential properties located south of the property, away from the Sterling Highway.

FY 2010 work consisted of sampling several groundwater monitoring wells and the groundwater diversion system, and preparing a report to document current groundwater quality conditions. Field work was completed in FY 2010; however the final report was not received by the end of the fiscal year.

FY12 Actions:

No activity in FY12 as projected.

FY12 Response Fund Expenditures:	\$	0.00
FY12 Cost Recovery:	\$	0.00

FY13 Proposed scope of work:

Increased benzene concentrations document the need for continued groundwater monitoring for several year.

Estimated FY13 Costs:	\$35,000.00
-----------------------	-------------

Project/Site Name: **ZipMart Store – State Lead**

Location: Sterling

Project Manager: Linda Nuechterlein

Site ID Number: 23620

Telephone: (907) 269-7530

Ledger Code: 14662160

Situation:

The Sterling ZipMart gas station opened in 1985 with an underground storage tank (UST) system consisting of two 10,000 gallon steel USTs with a single wall pipe leading to a dispenser island. In August, 1995, a new 20,000 gallon tank with three compartments was installed to replace the original tank system. In December 2001, when the responsible party (RP) was closing the facility, additional assessment was performed and 13 inches of fuel was encountered in monitoring wells. The 2001 fieldwork (conducted initially by the RP under the DEC Financial Assistance Program) identified significant soil and groundwater contamination associated with the piping and fuel dispensers. The exact quantity of fuel spilled is unknown, but DEC has determined that the quantity exceeds 50,000 gallons, based on a review of fuel records. DEC assumed the lead role on the project when the RP was unable to continue. To characterize, remediate and monitor the fuel release, 75 groundwater monitoring wells, 17 product recovery wells, 7 well points and 7 soil gas points were installed on the former gas station property, as well as on properties adjacent to and down-gradient of Sterling ZipMart. The contamination migrated in a southeasterly direction and dissolved-phase fuel contamination in excess of DEC groundwater cleanup levels has been encountered in a plume approximately 3,000 feet long and up to 500 feet wide.

A free product recovery system was operated between 2002 and 2005, resulting in the recovery of over 18,000 gallons of product. Following the free-phase product recovery effort, a soil vapor extraction system (SVES) was installed and began operation in the spring of 2005. In 2007, the SVES was expanded to the east of the existing system which allowed for treatment and cleanup of the secondary source area on the Sterling Baptist Church property. During the spring of 2009, an Oxygen Releasing Compound Pilot Study was installed to evaluate the effectiveness of injecting an oxygen source into the aquifer to enhance bioremediation at the down gradient end of the contaminant plume. In May 2009, the existing 20,000 gallon Underground Storage Tank (UST), associated fuel dispensers, and piping were removed. Approximately 774 tons of petroleum impacted soil were excavated from the vicinity of the UST system and transported to Anchorage Soil Recycling for thermal treatment. A passive soil ventilation system was installed in the excavation backfill to facilitate removal of volatile compounds and enhance oxygen movement in the subsurface. During FY11, Zipmart received American Recovery and Reinvestment Act (ARRA) funding, and the existing remediation system in the source area was expanded to include air injection wells and additional vapor extraction wells. Injection of oxygen release compound (ORC) to enhance natural attenuation of the groundwater plume in the down-gradient plume front area was also funded by ARRA.

To date remedial efforts have included source removal; operation of a product recovery system and a soil vapor extraction system (SVES); expanded to include air injection wells and additional vapor extraction wells, as well as augmentation of the plume with oxygen release compound (ORC) to enhance natural attenuation. Operation of the existing remediation system is on-going; and DEC continues to monitor water quality in both groundwater and drinking water wells.

FY11 Actions and Expenditure Amounts:

Continued the following activities at the Zipmart site: monitored groundwater and drinking water wells in the area; operated, monitored and maintained the SVES; as well as treatment and monitoring of the down-gradient portion of the plume that has been augmented with ORC to enhance natural attenuation.

FY11 Response Fund Expenditures	\$ 10,355.14
FY11 Cost Recovery:	\$ 0.00

FY12 Actions and Expenditure Amounts:

FY12 activities included the following: (1) water quality monitoring program to monitor both groundwater and drinking water wells; (2) decommissioning and/or repair of select monitoring wells (MWs); (3) sampling of MWs in the free phase product plume for product thickness; (4) evaluation of natural attenuation, and effectiveness of ORC treatment; (5) continued operation, maintenance and monitoring of the Air Sparge /Soil Vapor Extraction remediation system and (6) reporting.

FY12 Response Fund Expenditures:	\$427,398.47
FY12 Cost Recovery:	\$ 0.00

FY13 Proposed Scope of Work:

(To be funded from LUST Trust Grant) Further expansion of the remediation system is planned which will involve installation of 14 additional air spar wells (sparge-curtain) down-gradient of the source, and possible in-situ treatment with chemical oxidation. The groundwater and drinking water wells in the area continue will be monitored to determine the risk to human health, and to define the extent of contamination. The remediation system will continue to operate throughout the year.

FY13 Response Fund Expenditures:	\$ 0.00
FY13 Cost Recovery:	\$ 0.00

OIL AND HAZARDOUS SUBSTANCE RELEASES

ALASKA STATUTES

Sec. 46.08.060. Report. (a) The commissioner shall make available a report to the legislature not later than the 10th day following the convening of each first regular session of the legislature. The commissioner shall notify the legislature that the report is available. The report may include information considered significant by the commissioner but must include:

- (1) the amount of money expended by the department under AS 46.08.040(a) during the preceding two fiscal years.
 - (2) the amount and source of money received and money recovered by or on behalf of the department during the preceding two fiscal years under
 - (A) AS 46.08.020; and
 - (B) AS 46.08.025;
 - (3) a summary of municipal participation in the department's responses that were paid for by the fund;
 - (4) a detailed summary of department activities in responses paid for by the fund during the preceding two fiscal years, including response descriptions and statements outlining the nature of the threat; in this paragraph, "detailed" includes information describing each personal services position and total compensation for that position, each contract in excess of \$10,000, and each purchase in excess of \$10,000; and
 - (5) the projected cost to the department for the next two fiscal years of monitoring, operating, and maintaining sites where response has been completed or is expected to be continued during the next two fiscal years.
- (b) As part of the department's on-going identification efforts associated with oil spill or hazardous substance release or waste sites, the commissioner shall include in the report under this section
- (1) the number of sites that are included in the department's contaminated sites data base, whether the site is active or closed; and
 - (2) a prioritized listing of those sites, both statewide and by community, based on the immediate and long-term threats to the public health or welfare or to the environment.
- (c) In addition to the department's report required under (a) of this section, the governor shall submit a report about use of the fund during the previous two fiscal years to the legislature not later than the 10th day following the convening of each first regular session of the legislature. In the report, the governor shall describe in detail the governor's use of money from the fund, with separate explanations, by agency, of the activities that were paid for under the authority of AS 46.08.045.
