

HB129: OIL & GAS EXPLORATION/DEVELOPMENT AREAS

BRIEFING PAPER

FOR THE HOUSE FINANCE COMMITTEE • MARCH 19, 2013

HB129 will consolidate the Department of Natural Resources' exploration and development approvals, while still protecting the environment and providing for public participation. The right to explore and develop oil and gas is granted through a lease that has been through an extensive public disposal process. A lease is subject to mitigation measures, multiple agency permits, and plans of operations approval. Exploration and development approvals are made in conjunction with individual plans of operations for a lease or project and include a separate public notice for each approval. Many approvals are repetitive, subject to the same mitigation measures, and within the same geographical area.

HB129 will allow the department to comprehensively evaluate oil and gas exploration and development in a geographical area, without regard to lease boundaries, and define the criteria by which specific projects are evaluated and approved. The initial comprehensive review of a geographical area gives the public, government agencies and industry an opportunity to participate and identify exploration and development considerations for all subsequent projects. Projects may then move forward within the defined parameters and subject to the lease mitigation measures without additional public review following the geographical area approval process, saving time and resources for both the state and lessee when approving subsequent plans of operations.

Approvals covering a broader area would both create efficiencies in the exploration and development review process and provide for the department to look at the overall effects of exploration and development across multiple leases. This bill will still protect the public interest by requiring public notice and an opportunity to comment under AS 38.05.945. Further, it provides certainty to the oil and gas industry that exploration and development projects may proceed within defined parameters.

This bill will:

- Create efficiencies by streamlining the oil and gas exploration and development approval processes;
- Protect the public interests by requiring public notice and the opportunity to comment during the approval process for a geographical area;
- Enable a review of the effects of exploration and development across multiple leases;
- Allow exploration or development approvals to be consolidated into a comprehensive decision at the beginning of the process; and,
- Provide certainty to oil and gas operators, industry and the public when approval is granted.
