FISCAL NOTE ANALYSIS

STATE OF ALASKA 2013 LEGISLATIVE SESSION

BILL NO. SB002

Analysis

This bill would authorize Alaska to join and participate in the Interstate Mining Compact Commission (IMCC). This fiscal note has two components: annual membership and travel.

Membership Dues:

Membership in the commission requires annual dues paid by each party state. The amount of dues to be paid by each party state is covered under Article VII of the Compact and Bylaws. There are currently 19 member states; Alaska's addition would bring that total to 20.

Specifically, each party state is required to pay one half of the commission's annual budget, in equal shares. With Alaska as a member, Alaska's portion would be 1/20th of half the annual budget. If additional states become full members of the IMCC, Alaska's portion would change accordingly. The other half of the annual budget is also paid by the member states but is paid in proportion to the value of the minerals, ores and other solid matter mined in each member state.

DNR estimates that Alaska's share for dues in the first membership-year will be approximately \$40.0. This amount will fluctuate in future years based on the amount of the commission's annual budget and the value of the minerals, ores and other solid matter mined in Alaska annually. This value is based on national valuation reports prepared by the United States Geological Survey (USGS) for non-coal minerals and the federal Energy Information Administration (EIA) for coal to ensure impartial uniformity assessment of mining data. If the annual dues are significantly higher than \$40.0, DNR may request supplemental funding in that year.

Travel costs:

Full membership in the IMCC entails greater participation by member states. Membership and participation in the Interstate Mining Compact Commission will require two or more trips per year by the Commissioner, department staff, and possibly other representatives of the Governor's office. The department estimates \$20.0 per year for this expense.
