FISCAL NOTE ANALYSIS

STATE OF ALASKA
2013 LEGISLATIVE SESSION

BILL NO. HB096

Analysis

This bill requires the Department of Environmental Conservation to work with the Department of Health and Social Services to establish a list of chemicals of high concern found in children's products that are: (1) carcinogenic, a reproductive or developmental toxicant, or an endocrine disruptor; (2) persistent, bioaccumulative, and toxic; or (3) very persistent and very bioaccumulative.

The Department of Environmental Conservation would seek consultation from the Department of Health and Social Services in four situations when: (1) creating an initial list of chemicals of high concern, under Section 18.31.610; (2) adding or removing a chemical to or from the list during periodic review of this list, under Section 18.31.620; (3) designating a chemical of high concern as a "priority chemical," under Section 18.31.630; and (4) designating additional chemicals as "priority chemicals" if that determination is made during a review conducted at least every three years, under Section 18.31.640.

This environmental health consultation will require a total appropriation of \$34.6 GF. This will not require a new position, as the work will be done by an existing position that is only partially funded. Personal services for 0.25 FTE of a Health Program Manager III will be \$31.6. The additional cost is \$0.5 for office supplies and \$2.5 for office space, phones, and other contractual costs. No travel or equipment costs are expected. It is anticipated this project will require 0.25 FTE of a Health Program Manager for the first two years to develop the initial list of chemicals of high concern and to identify priority chemicals. Subsequent periodic reviews of these lists would be covered with existing resources.
