Re: Support for SB 88 – Alaska Native Medical Center Housing

Dear Representatives Stoltze and Austerman:

The Alaska Native Elder Health Advisory Committee (ANEHAC) strongly supports passage of SB 88, which will bring construction of a 170 bed residential housing facility on the campus of the Alaska Native Medical Center.

When a patient's medical needs are beyond the capacity of the regional health organization, the patient is sent into Anchorage for specialty clinic appointments and hospitalization. With limited capacity at the current Quiana House and the challenge of placing people who travel into local hotels, dependent on taxi services, the ANEHAC strongly supports construction of the on-campus facility.

Campus housing for the tribal health system will ease the anxiety of elders who must travel into a large strange city, especially those for whom English is a second language. With kitchen facilities, extended family will be able to visit and share traditional foods.

For the high risk prenatal mother who can spend several weeks waiting to deliver her baby, campus housing will provide a closer community feel than a hotel, and they will have the added bonus of being close to the hospital when they deliver, supplemental prenatal education and supports.

Patients who can be discharged from the hospital but need follow-up care before returning to their home village will benefit from being on campus, close to the services they need. Our trauma patients receive outstanding care at ANMC, but trauma patients often need post-hospitalization rehabilitative services. Patient recovery times are faster when the patient receives the prescribed follow-up on the prescribed schedule.

If you have questions concerning the Alaska Native Elder Health Advisory Committee's position in support of this bill, please feel free to contact me at the number listed above.

Sincerely,
