

Component: Oil, Gas and Mining

Contribution to Department's Mission

The Oil, Gas and Mining section provides legal advice and representation to state departments, boards, and commissions to insure that the state receives the maximum benefit from development of its oil, gas, and mining resources.

Core Services

- The Oil, Gas, and Mining section provides legal advice and assistance to the state on oil, gas, and mining-related disputes. The section also advises state agencies on oil and gas royalty, net profit shares, and tax issues and on development of state oil, gas, and mining resources. The section monitors and protests tariffs charged for pipeline transportation, and provides legal advice to state agencies concerning the development of state oil, gas, and mineral resources.
- The section provides legal services to ensure the integrity of the state's fiscal system, including issues related to Alaska North Slope crude oil destination values, allowable transportation costs, net profit shares, property taxes, production taxes, and corporate income taxes. Most of the state's operating revenues are derived from oil and gas corporate, property, and production taxes and royalties on Alaska North Slope crude oil.
- The section provides legal services related to other oil and gas development issues including tariff monitoring and disputes with the owners of the TransAlaska Pipeline System (TAPS) and other oil pipelines in Alaska, assessment and collection of unpaid royalties from oil and gas producers, development of a gas pipeline, and participation in federal litigation that affects development in the National Petroleum Reserve of Alaska or Alaska's Outer Continental Shelf.
- The section contracts with outside counsel and expert consultants on large or complex oil and gas cases as well as legal services related to lease sales, drafting and interpreting oil and gas statutes and regulations, pipeline right-of-way issues, and oil and gas conservation, development issues, and reservoir engineering.

Major Component Accomplishments in 2012

- Point Thomson. The section represented the Department of Natural Resources (DNR) in a large number of proceedings related to DNR's decision to terminate the Point Thomson Unit (PTU) due to lessees' failure to commit to production, notwithstanding massive hydrocarbon reserves that had been known for decades. The section successfully achieved a resolution of the PTU disputes with the execution of a settlement agreement in March 2012. The lessees are moving forward with development of the PTU including their commitment to spending billions of dollars on development of an initial production system (IPS), and production in the Unit by the winter season of 2015-2016. The IPS will produce approximately 10,000 barrels per day of condensate, which will ship to TAPS in a new common carrier pipeline to be built by the PTU lessees. The dry gas produced will be re-injected into the reservoir.
- Royalty Cases. The section advised DNR in audits of BP over its net profit share lease payment obligations in the Milne Point Unit and also in the Duck Island Unit for 2006 and 2007.
- The section spent a significant amount of time helping DNR evaluate a major dispute over production allocation worth tens of millions of dollars. The section participated in a one-week hearing involving the dispute and is waiting for a decision from the DNR hearing officer.
- The section assisted DNR in developing a methodology for implementing the field or area royalty valuation provisions of new form leases. The section is also assisting DNR with drafting proposed royalty modification regulations.
- Production Taxes. The section assisted the Department of Revenue (DOR) at informal conference and before the Office of Administrative Hearings in complex litigation against major oil and gas producers regarding the department's decision to aggregate properties for calculating the taxpayers' production tax.

- Corporate Income Taxes. The section represented the DOR in negotiating settlement of a number of corporate income tax disputes, which resulted in a total of about \$900,000 in additional taxes, penalties, and interest in FY2012, and has assisted DOR in collecting \$3.5 million in taxes so far in FY2013. The section successfully defended the DOR's assessment of an additional \$13 million in corporate income taxes, interest, and penalties against Tesoro Corporation for tax years 1994-1998 before the Alaska Superior Court. Tesoro appealed the superior court's decision to the Alaska Supreme Court, and oral argument took place September 16, 2012. A decision is pending.
- The section represented the DOR in administrative proceedings that resulted in a favorable decision by the Office of Administrative Hearings that Schlumberger Technology Corporation owed more than \$1 million in additional taxes for tax years 1998 – 2000, which was upheld by the superior court. Schlumberger appealed that decision to the Alaska Supreme Court and briefs will be filed in the fall of 2012.
- Property Taxes. The section successfully defended the DOR's 2011 TAPS property tax valuation methodology before the State Assessment Review Board in May 2011. The section also represented the DOR in litigation over the TAPS 2006 through 2010 property tax assessments. The state has received tens of millions of dollars in additional property taxes as a result of the superior court decisions in the 2006-2009 tax appeals.
- Outer Continental Shelf (OCS). Oil development on the OCS is another instance where the section plays an increasingly significant role. Attorneys from the section intervened in the case of *Native Village of Point Hope et al v. Salazar et al.* and *Alaska Eskimo Whaling Commission, et al. v. Salazar et al.* The plaintiffs challenged Exploratory Plans for drilling in the Beaufort and Chukchi Seas in summer 2010. The state filed briefs in support of the environmental review and approval of the Exploration Plans by the Bureau of Ocean Energy Management, Regulation, and Enforcement (BOEMRE), and appeared before the court at hearing. The Ninth Circuit Court of Appeals denied the plaintiffs' petition. A request for en banc review by a larger panel of the Ninth Circuit was denied.
- The section continued to represent the state as an intervenor in *Native Village of Point Hope, et al. v. Salazar, et al.* in U.S. District Court for the District of Alaska in which plaintiffs challenged Lease Sale 193 in the Chukchi Sea. The state supported parties' requests for a timely decision by BOEMRE on remand. The state also supported lessee's request to continue allowing seismic testing pending BOEMRE's decision. Success in allowing such activities in the OCS impacts the state by creating hundreds of jobs for the immediate seismic testing and exploratory drilling work and potentially tens of thousands of jobs from eventual production. Success will also increase property tax revenues for the state and local communities. In addition, oil discovered in the OCS off Alaska's North Slope in the Beaufort and Chukchi Seas, will go to market through the TAPS. An increase in throughput in TAPS—or in any other pipeline built to ship OCS oil—will lower the unit cost for all Alaskan oil, which results in more state royalties and production taxes from oil developed on state lands. The monetary impact for the state, while very speculative at this stage, is nonetheless likely to be in the tens, if not hundreds of millions of dollars during production.
- Gas Storage. The section assisted the DNR with leasing and other actions necessary for the Cook Inlet Natural Gas Storage Alaska (CINGSA) project, the first third-party gas storage facility proposed for Cook Inlet. The section is representing DNR in a case relating to ownership of the pore space used to store gas in a situation in which the surface estate is owned by a municipality, but the subsurface is owned by the state.
- Mining Regulation. The section has intervened on the state's behalf in federal litigation concerning federal mining claim rules that will affect the mining industry in Alaska.
- Mining Appeal. The section is advising DNR on several matters involving coal leases.
- Regulations. The section provided substantial legal assistance to the DOR related to implementation of regulations establishing reasonable transportation cost deductions and to the development of new regulations to address significant issues of data that must be submitted for forecasting and determination of what types of activities -exploration, development or production – are receiving production tax credits. The section is also advising DNR with respect to royalty modification regulations for oil and gas leases.

- 2012 Legislative Session. The section assisted the DOR in drafting major oil and gas production tax legislation introduced by the governor to provide an alternate lower tax rate for production from previously undeveloped properties and an incremental progressivity tax rate for all production to increase the development of oil and gas resources. The section also assisted the DOR in responding to amendments to the governor's bill and to bills introduced by legislators, including legislation designed to encourage new production and continued development of current fields. The section also assisted with a major in-state gasline bill.
- Alaska Gasline Inducement Act (AGIA). The Department of Law continued to assist in the state's implementation of the AGIA license for a gas pipeline project from the North Slope to markets. The AGIA licensee, TransCanada Alaska, is evaluating the viability of a large-diameter liquefied natural gas (LNG) pipeline to tidewater in Alaska that would allow for natural gas exports to the Pacific Rim and gas for in-state use. The section advises DOR and DNR concerning the AGIA licensee's participation, along with the North Slope gas producers, in the LNG option study.

Key Component Challenges

- TransAlaska Pipeline System (TAPS). The Oil, Gas, and Mining section expends substantial efforts to monitor the TAPS tariffs and to monitor and participate, where appropriate, in state and federal regulatory oversight of the tariffs of all common carrier oil and gas pipelines operating in the state. This vigilance can earn the state millions of dollars in royalties and production taxes each year. Further, as production of oil and gas from current developments declines in Alaska, the state's participation in tariff regulation is becoming more important in encouraging additional producers to invest in exploration of new areas in the state, by ensuring fair transportation rates and access to existing pipeline infrastructure for production from new fields.
- The section will continue working on cases involving disputes between TAPS shippers, TAPS carriers, and the state over the valuation of crude oil under the TAPS Quality Bank, which is a system for adjusting crude oil values to account for the different qualities of crude oil and refinery return streams that are commingled in the TAPS common stream. These cases concern decisions of the FERC and RCA and the section currently awaits action by FERC on remand from a decision of the United States Court of Appeals for the DC Circuit.
- The section provides legal support for and represents the Pipeline System Integrity Office (PSIO), which oversees the maintenance of facilities, equipment, and infrastructure for the sustained production and transportation of oil and natural gas resources in Alaska, in cooperation with other state and federal agencies.
- The section provides legal support for and represents the State Pipeline Coordinator's Office (SPCO), which monitors and facilitates the development and sound operation of pipelines on state land.
- North Slope Gas Pipeline-Related Issues. The section continues to provide legal support to assist in arrangements to construct a gas line to transport Alaska North Slope gas to markets in and out of Alaska. The known gas resource on Alaska's North Slope is huge. The potential gas resource on unexplored lands on the North Slope is much larger. Developing this resource is one of the most promising opportunities to strengthen and support Alaska's economic future. The section also continues to work closely with the Governor's Office and the Departments of Natural Resources (DNR) and Revenue (DOR) to provide legal assistance in implementation of the Alaska Gasline Inducement Act (AGIA) license, including due diligence on the AGIA license implementation: costs, reimbursements, compliance, proposed commercial and financial arrangements, matters related to fiscal certainty, confidentiality issues and analysis on constitutional and other state law issues and federal permit and licensing issues.
- Tax Cases. The section is pursuing hundreds of millions of dollars in past-due taxes, interest, and penalties that are owed by oil and gas producers and other corporate taxpayers to the state. At this time, the section is representing the DOR in an appeal to the Alaska Supreme Court by Tesoro Corporation of a superior court decision resulting in additional tax liabilities, interest, and penalties of about \$13 million. The section is also representing the DOR in an appeal to the Alaska Supreme Court by Schlumberger Technology Corporation of superior court decision in the department's favor worth over \$1 million in additional tax and interest. A major production tax case, which is before the Office of Administrative Hearings, is an appeal of the DOR's decision

to aggregate properties within the Prudhoe Bay Unit for purposes of determining the Economic Limit Factor (ELF). The ELF appeal stems from a January 2005 decision by the DOR to aggregate satellite producing areas with the Prudhoe Bay producing areas for purposes of calculating the ELF. The section is also representing the DOR in a number of confidential tax disputes at the administrative level.

- The section provides support and represents the DOR in appeals from annual oil and gas property tax assessments, including assessments based on valuation of TAPS for 2006-2009. The appeal of the 2010 superior court decision relating to the 2006 TAPS property tax assessment, in which Judge Gleason affirmed DOR's assessment methodology, will be argued in the Alaska Supreme Court in December 2012. On December 30, 2011, Judge Gleason issued a decision that affirmed the DOR's 2007-2009 assessment methodology for TAPS and, based on new cost and North Slope oil reserves studies presented at trial, significantly increased the TAPS value to \$8.94 billion for tax year 2007, \$9.64 billion for 2008, and \$9.25 billion for 2009. Both the Municipalities and the TAPS Owners appealed Judge Gleason's decision to the Alaska Supreme Court.
- The section will continue to provide legal assistance to the DOR to develop regulations requiring detailed reporting of expenditures related to production tax credits designed to further encourage the development of oil and gas reserves. The section will also assist the DOR as it reviews the current Mineral Licensing Tax and the current mining license regulations to determine if changes are needed to address new technologies for resource extraction techniques.
- Royalty Cases. The section represents the DNR in royalty disputes and works with DNR in royalty negotiations to ensure that the state receives its fair share of royalties and net profit share from production of Alaska oil and gas resources. This work also includes handling related development and production sharing disputes. Much of the work is transactional in nature and concerns negotiating modifications to existing Royalty Settlement Agreements, audits, and claims. But the section must litigate or arbitrate some claims in order to recover the amount due to the state and to defend against unreasonable claims. Litigation and arbitration inevitably involve developing expert opinions, which require a long lead time. The section also manages expert witnesses that analyze transportation costs, allowances for return on capital, sales data, and royalty settlements, markets, destination values, development issues, and reservoir modeling.
- In addition to dispute resolution, legal advice is provided to DNR on a variety of issues that are related to royalty and net profit share, such as confidentiality requirements, contract construction, whether payments meet legal requirements, and implementation of lease valuation provisions. The state has Royalty Settlement Agreements with all the major producers that cover most of the Alaska North Slope DL-1 leases in production as of the early 1990s. These Royalty Settlement Agreements all contain formulas for determining the state's royalty share. These formulas may be modified through an arbitration proceeding called a reopener. Typically there are several reopeners a year. Currently, the section is working on a major production allocation dispute that began in 2009. In addition, a marine transportation cost reopener will be initiated in FY2013. The Royalty Settlement Agreements also provide for arbitration proceedings to resolve disputes about whether past payments were consistent with the then existing applicable agreement.
- Unitization, Participating Areas and Lease Development. The section assists the DNR in its efforts to develop and produce from state oil and gas leases. This involves a number of different issues associated with unitization, participating area formation, farm-out agreements, and lease and tract operations. This work often requires negotiations and may result in appeals. One matter in this category is the North Slope Point Thomson Unit (PTU) litigation. In 2005, DNR defaulted the PTU for failure to commit to production, notwithstanding massive hydrocarbon reserves that had been known for decades, and terminated the unit. The PTU matter involved a number of superior court and administrative proceedings, all of which were stayed pending final decision in the consolidated appeals from the unit termination. The proceedings included a separate Supreme Court appeal on damages, eight Appellate Rule 602 appeals to the superior court, and one administrative proceeding before the Department of Administration, all regarding unit termination. There were also proceedings in the superior court regarding permits and Alaska Oil and Gas Conservation Commission compulsory unitization. The section successfully achieved a resolution of the PTU disputes in a settlement agreement executed in March 2012, and the PTU operator and other lessees are working on development of the unit.

- Leasing. The section assists the DNR in a variety of leasing issues every year from lease sales and protests to drafting and negotiating lease terms. The section also assists DNR with natural gas storage leasing.
- LNG Export License Extension. The section assists the DNR and the Governor's Office in responding to requests to export LNG from the Kenai LNG facility to foreign markets.
- Mining. The section assists the DNR in litigation regarding mineral royalties, mining rights, and rights regarding surface occupancy of mining claims. The section also assists the DNR in complying with federal statutes regulating surface mining, including legal review for the use of reclamation funds, and drafting agreements with operators to insure compliance with state and federal reclamation requirements. Additionally, the section advises and assists the Division of Mining in drafting bonding agreements, permits, leases, best interest findings, proposed legislation, and regulations.
- Alaska Oil and Gas Conservation Commission. The section advises and represents the Alaska Oil and Gas Conservation Commission (AOGCC) with respect to all aspects of the Commission's oversight of oil and gas drilling, development, production, and metering and reservoir depletion. The oversight is intended to prevent waste, maximize ultimate recovery, protect correlative rights, and protect underground freshwater. The section will continue to work with AOGCC on matters involving proposed statutory and regulatory amendments, the issuance of orders and decisions, and the conduct of hearings and enforcement actions. The section will also continue to represent AOGCC in judicial challenges to AOGCC actions.

Significant Changes in Results to be Delivered in FY2014

No changes are anticipated.

1004 Gen Fund												0

Transfer vacant Micro/Network Specialist II (PCN 03-0177) from Juneau to Anchorage. The department currently has two vacant IT positions in Juneau, and the last two recruitments in Juneau have been unsuccessful. Having additional IT staff in Anchorage will allow the division to provide a more efficient support for recently deployed systems in Anchorage (E-Discovery and Revenue Results). There is no budgetary impact as a result of this transfer.

A corresponding location transfer of an Attorney IV position (03-0367) from Anchorage to Juneau will occur simultaneously to allow for a promotion. The department recruited for a vacant attorney position in the Opinion,, Appeals and Ethics section, currently located in Anchorage and the best candidate for the position is an existing attorney stationed in Juneau. There is no budgetary impact as a result of this transfer.

These two position location changes together do not change the department's overall position count, nor do they change the total number of positions located in Anchorage and Juneau.

1004 Gen Fund		-5,000.0								0.0	0	0

Reverse one-time appropriation in FY2013 for oil and gas outside counsel.

In FY2011, the Oil, Gas and Mining Section collected \$110.0 million in additional taxes and royalties. It achieved its success by using both Department personnel and outside counsel. The funding requested for FY2013 will enable the Oil, Gas and Mining Section to enter into contracts with outside counsel and consultants having expertise in specialized oil, gas and mining issues. The areas to be funded include Tariff Proceedings (\$2,570.0M); Taxes (\$1,475.0M); Royalty Reopeners (\$1,600.0M); Point Thomson litigation/settlement (\$505.0M). The amount requested compares favorably to prior years (\$6,870.0 was appropriated in FY2011 for outside counsel; additional outside counsel costs of \$1,047.6 were covered by funds available under the FY2011 allocation for the Gasline).

Reverse Gas Pipeline Outside Counsel and Experts	OTI	-2,000.0	0.0	0.0	-2,000.0	0.0	0.0	0.0	0.0	0.0	0	0
1004 Gen Fund		-2,000.0										

This reverses one-time authority for gas pipeline outside counsel and experts.

Continue the efforts required by the Alaska Gasline Inducement Act (AGIA), including analysis of Federal Energy Regulatory (FERC) issues, monitoring of the FERC process, review of precedent agreements stemming from the Alaska Pipeline Project open season filing to assure compliance with AGIA, transportation agreements, FERC filings relating to a certificate of public convenience and necessity, filings and evaluations relating to the Canadian regulatory process, commercial issues relating to pipeline development, and shipper-related fiscal issues.

The Department of Law's Oil, Gas and Mining section continues to play a major role in the state's top priority project related to the construction of a gas pipeline and bringing natural gas to market. A number of contracts with outside counsel and experts are underway and will continue as needed. Funding will assist the department in the preparation of legislation and implementation of a comprehensive plan to commercialize North Slope gas.

		2,000.0										
The Department of Law, Oil, Gas & Mining section and specialized contract counsel assisted the State of Alaska with legal issues in the Alaska Gasline Inducement Act (AGIA) legislation and legislative approval to grant an AGIA license to Trans-Canada (TC). Attorneys assisted the Departments of Natural Resources and Revenue and the Gas Pipeline Project Office in implementing the AGIA license, advising on legal issues related to an Alaska gas pipeline, including TC Alaska's joint venture with ExxonMobil, the Federal Energy Regulatory Commission (FERC) application, and certification process and related aspects under state and federal law. Attorneys also advised on due diligence in AGIA license implementation, including licensee compliance and reporting, reimbursements and audits. The attorneys will continue to assist the Administration on legal issues associated with an Alaska gas pipeline or liquefied natural gas project.
