FISCAL NOTE ANALYSIS

STATE OF ALASKA
2015 LEGISLATIVE SESSION

BILL NO. SB071

Analysis

This bill will give certified pharmacists authority to immunize Alaska adults and children without having to collaborate with an overseeing physician.

This bill does not require an operating appropriation but will require one-time capital funds of \$50.0. This will be 50% federal reimbursement. This bill would not be expected to result in increased costs due to additional vaccine utilization, because many pharmacies already have the ability to provide immunization services and receive reimbursement through a collaborative practice agreement.

However, the Medicaid program would be expected to incur costs resulting from changes needed to the claims processing system to accommodate the elimination of the collaborative practice agreements. Modifying the claims processing system to enroll these providers would result in a one-time development cost. Changes in federal Medicaid program rules resulting from the Affordable Care Act [42 CFR 455.410(b)] require all ordering, rendering, and referring providers to be enrolled with the Medicaid program. Currently pharmacists are not individually enrolled by Alaska Medicaid, the pharmacy is enrolled. Due to challenges with the claims processing system and upcoming federal mandates (e.g. ICD-10) it is not anticipated that the claims processing system would be able to accommodate enrolling pharmacists before 7/1/2016.

Regulations [7 AAC 120.110 (d)] would need to be changed to allow for the payment of vaccines independently prescribed and administered by an enrolled pharmacist. The current regulation restricts payment to vaccines administered by a pharmacist for whom the Board of Pharmacy has approved a collaborative practice agreement.
