

**COMMITTEE:** House Fisheries

**BILL:** HJR 28

**SPONSER:** Rep. Tarr

**DATE & TIME:** 02/04/2016 @ 10AM

Good morning Madam Chair;

My name is DENNY KAY WEATHERS, I live on Hawkins Island in Prince William Sound. I am sending this written testimony in **support** of HJR 28 and strongly urge your committee as well all the State Legislators in Juneau to support HJR 28 as written.

My husband and I come from Salmon Fishery backgrounds in Alaska, are children were raised on salmon fisheries and now support their families on salmon fisheries. These "Genetically Engineered/Modified" (GM) salmon are a danger to Alaska's seafood industry as well as our livelihoods. I hope your committee understands how important this Resolution is to Alaska's future.

It would be a disaster for Alaska if these GM salmon mix with our wild or hatchery stocks. Labeling is another big issue...consumers need to know what they are buying. Juneau needs to protect Alaska's renewable resources, please support HJR 28. Thank for your time.

DENNY KAY WEATHERS
