\*Counts in this table come from information provided by the National Student Clearinghouse, a national repository of postsecondary enrollment data. NSC data was matched to high school graduates' and APS recipients' data to determine enrollment patterns. Not all APS-eligible students attending an in-state institution received the scholarship. This most often occurred when the student enrolled in a degree program but was only eligible for a career or vocational certificate award. Otherwise-eligible students might not receive funds based on less than half-time enrollment, because they had no unmet costs of attendance after receiving other aid or failed to complete the Free Application for Federal Student Aid (FAFSA), which is the annual APS application.
