The University of Alaska has an older student population in comparison with students attending higher education nationally. The median age at the UA System was 25 in fall 2014. Almost 50 percent of students were less than 25 years old. Nationally, 60 percent of students were under 25, and 25 percent of students were over 30 in fall 2011 (NCES 2013, https://nces.ed.gov/programs/digest/d13/tables/dt13_303.55.asp).

Note: Student age is calculated as of October 1. Ages that are not reported are excluded from the median age calculations. Reporting level headcount is unduplicated. Academic Organization (AO) headcount totals may add up to more than university/system totals. This occurs because students often concurrently enroll at multiple AOs and/or universities in the same semester. Therefore, some students would be double counted if headcounts were summed across campuses and universities. Headcount includes students who audit credit courses.
