I has come to my attention that ARCS is on the chopping block.If there is anything that should not be cut iis ARCS,as they provide educational programs for the young and old....critical weather information has assisted in search amd rescue,also State wide emergency services such as earthquakes,tsunamis ,fire this is a fine State program that pays dividends in that it keeps its constituents safe knowledgable of State ans National news,not to mention locally.with all due respect,I hope you all reconsider and save this worth while media service. Thank you very much
