Committee

Public Radio is very important to my town of Petersburg(KFSK) and the region. This is our local and state news and weather information source. I understand things are tight but cutting 100% of the funding, which in turn will make the the station lose Federal funding, is not the answer. I'm very sure the price of oil will raise to higher levels within a year or so what is needed is a bridge of money till then. The state has a saving account lets use it!
