Subject: Education Funding
Date: Monday, March 30, 2015 1:12:18 PM

Please take into consideration the importance of education to the future of Alaska. We we cannot provide an education to our citizens we cannot ensure an educated population. Our future citizens will not be able to compete for jobs in the work place here or anywhere, and Alaska will lose the ability to compete with other states for a stable sustainable economy. I am asking that the legislature make education a priority, even if this means finding additional revenue sources, such as the politically controversial income tax or permanent fund.
Kelly O'Connor Demko
