---

Please consider funding early childhood education. As a parent, I do try my best to educate my children at home. However, with my full-time job and being so busy, I don't always have the time or energy to do school type work with my kids when I get off of work. I do try to do some educational activities with my kids on a regular basis, but early headstart here in Nome, AK has been a great help with my daughter's shyness and she also has learned so much more than what I can probably give her. Thanks for your consideration.
