Office of Boards and Commissions
550 West 7th Ave. Suite 1700
Anchorage AK 99501
Attn: Karen Gillis

Governor Bill Walker,

I am writing to apply for a seat on the Alaska Board of Fish. Please see my attached resume.

My wife and I moved to Alaska in 1996, after having the opportunity to spend a summer in Sitka a few years earlier while still in college. However, my first exposure to Alaska fish was early in grade school when my Uncle Bob sent a couple unlabeled gold cans of homepack for me to share with my young classmates. It was a few years later that I was able to visit him and first experience salmon fishing from his troller. Later as a young adult I was fortunate to have a summer in Sitka where, like most of us who first experience spawning salmon in small streams, I watched in awe of what these creatures do at the end of their life cycle. Something that I now share with my own two daughters.

When the opportunity arose for us to move to Soldotna in 1996, we came here without any hesitation. I found myself a job as the first employee for a newly forming organization that wanted to work with all user groups, businesses and "stakeholders" to work together for the health of our rivers and streams. I helped found and grow the Kenai Watershed Forum from an idea into a multi-million dollar organization, maintaining support from all branches of local government and achieving results in unexpected ways with all user groups coming together for the betterment of the waters on the Kenai Peninsula. This collaborative approach to conservation work is a skill that I've honed and one that I will bring to the Board of Fish. I hold no illusions that my participation will reduce the user group conflicts, but having worked with many stakeholders for years, I do believe I am in a unique position to make a positive contribution to Alaska. I know how to work in this environment and reach solutions.

While the past few years my job has become increasingly managerial in nature, I am trained as a scientist with a good core mathematical and statistical background. When questions arise around data collection and confidence in datasets, I expect I will know what questions to ask and will seek to get the best scientific information on the table to help inform my decisions. To the extent possible I will always draw on the best science to make those tough votes.

Board members have a tremendous responsibility to the public and make decisions that can have serious economic, social and cultural implications. I understand this responsibility and can assure everyone considering my application that I will take this job seriously and above all else I will be fair and transparent in deliberations and in my role as a decision maker.

My promise to the governor and legislature is that I will listen to the public and I will work my tail off to make sure that I am making decisions in the best interest of Alaskans.

Sincerely,

A handwritten signature in black ink, consisting of a large, stylized 'R' followed by a horizontal line extending to the right.

Robert Ruffner

Robert Ruffner

Current Employer - Kenai Watershed Forum

Professional Work Experience

- 1996 – Present: Kenai Watershed Forum, Executive Director
 - Managed up to \$3M budget and supervised 14 employees
- 1994 – 1996: University of Minnesota, Research and Teaching Assistant
- 1990 – 1994: University of Minnesota, Limnology Lab technician

Education

- B.S. University of MN Geology 1994
- Post graduate course work, 2 years University of MN Geology/ Civil Engineering
- Specific course work in Geomorphology, Engineering, Numerical Modeling including finite element, finite difference, cellular automata methods
- Developed methods for modeling complex sediment transport for Hibbing Taconite Inc. and the Colorado River through Grand Canyon National Park
