

As a resident of Cordova I want to go on record as opposing the passage of SB42. As a resident of Cordova and commercial fisherman since the mid 1970's I am opposed to the passage of the proposed Personal Use Priority Bill SB42. I truly believe that this bill undermines the existing State's already recognized Substance Priority regulation.

- Most Alaskans access fishing resources through commercial harvest.
- All harvesters need to be EQUALLY responsible for the health of Alaska's fishing resources, this includes sharing the burden of conservation.
- **This action pits Alaskans against Alaskans at the expense of our fishing resources.**
- Most personal use harvesters currently have their needs met and PU opportunity, harvest and participation has greatly increased in recent years.

I am a personal user as well as a substance harvester.
