Members of the Senate Finance Committee,

I have rarely observed such shameful behaviour from people elected to protect and faithfully represent the People. In case you have forgotten you are our elected Servants.

Statistics have proven out that Alaska has six times the national average rate of sexual assault among children. I bet you even know some of these families or at the very least represent some of the families of these children. Perhaps even some of the 783 reports of sexual assault in the first three months of 2015 have occurred among your constituents. The odds of that are pretty darned good.

You appear to be far more interested in advancing your personal political careers on the backs of children and families. You disgust me.

I once lost a job in defense of a child molested by a whaling captain. It turned out this son of a bitch had molested a number of boys and girls including his own daughters. These same daughters later committed suicide.

Get off your asses and do what is right for our children. Forget your personal and political ambitions and put the needs of our children ahead of your own. I dare you!!! The alternative is a concerted movement to remove you from your position. And you bet we will get rid of you regardless of party affiliation.

Pass a clean original HB 44 and get over yourselves!!!
