FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

BILL NO. SB 6

Analysis

This legislation amends the controlled substances laws under AS 11.71.090 by adding a new paragraph defining "industrial hemp" and by adding a new section to provide an affirmative defense to a prosecution charging the manufacture, delivery, or possession of a schedule VIA controlled substance if the material is industrial hemp.

The Scientific Crime Detection Laboratory (crime lab) provides analysis of suspected controlled substances, issues reports, and provides expert testimony for the State of Alaska.

Under this legislation, industrial hemp is defined as the plant *Cannabis sativa* L. containing not more than 0.3 percent tetrahydrocannabinol (THC). The threshold amount of THC listed is very likely below the crime lab's detection limits, meaning the crime lab would need to do a threshold study to demonstrate their testing would not inadvertently identify something as marijuana that was actually industrial hemp. This threshold study can be accomplished within the lab's existing budget.

Passage of this legislation is not expected to result in a significant increase in the crime lab's controlled substance analysis workload. Therefore, no fiscal impact to the crime lab is anticipated.
