## Senior and Disabilities Services Medicaid Reform Initiatives

The Centers for Medicare and Medicaid (CMS) requires States who seek to implement a Community First Choice (CFC) Option [1915(k)] to establish a council whose members reflect those individuals who are impacted by the CFC program. To meet this requirement the Division has formed the Inclusive Community Choices (ICC) Council. The members of this development and implementation Council for the reform initiative represent recipients and caregivers impacted by the reform.

#### **Home & Community Based Services (HCBS) Medicaid Reform efforts:**

Senior and Disabilities Services (SDS) contracted with Health Management Associates (HMA) to analyze our programs, funding structures and service utilization data to develop Medicaid reform recommendations. Those recommendations are:

- 1915 (k) Implement a State Plan Option for Home and Community Based Services called the Community First Choice option or 1915(k) for individuals who meet institutional level of care. The service package for the Community First Choice will include personal care services, emergency response and education and training for the beneficiary on how to hire; fire and train a personal care attendant. For these individuals, SDS can receive an additional 6% Federal match on the services expenditures.
- 1915 (i) -The cost analysis by Health Management Associates, recommended against use of 1915 (i). The 1915 (i) is a state plan option (not a waiver). This option creates a Medicaid entitlement for the groups targeted. The costs of adding specific target groups (people with intellectual disabilities (IDD), Alzheimer's disease and related dementia (ADRD), traumatic and acquired brain injury (TABI), and serious mental illness (SMI)) to the Medicaid program was expected to be far greater than the savings recouped through refinancing of General Fund grant programs.
  - HMA recommended creating a "Limited Supports" Waiver under 1915(c) authority for Individuals with Intellectual and Developmental Disabilities who are currently service through the Community and Developmental Disabilities Grant
  - HMA recommended creating a State Plan Targeted Case Management Services for individuals with Traumatic and Acquired Brain Injury
  - Continuing to work with the Stakeholders and Providers, with support from the Trust, to develop options to serve the ADRD population.
    - Work to date has the state reconsidering the 1915 (i) option for our ADRD population
    - Identifying common behavioral challenges and specific demonstrated interventions to address those challenges
