Statutes: AS 14.56; AS 24.05.135; AS 40.21; AS 40.25.115(e); AS 44.27.020
Regulations: 4 AAC 59; 2 AAC 96.200(c)

Contribution to Department's Mission:

Provides access to information, trains school and public librarians, and preserves the history of the state.

Funding History:

- FY2014 Appropriation: \$9,232.7 (\$4,895.2 UGF; \$63.0 DGF; \$1,068.3 Other; \$3,206.2 Fed)
- FY2015 Appropriation: \$14,226.5 (\$9,889.8 UGF; \$63.0 DGF; \$1,068.3 Other; \$3,205.4 Fed)
- FY2016 Appropriation: \$9,713.1 (\$6,291.8 UGF; \$1,863.0 DGF; \$358.3 Other; \$1,200.0 Fed)
- FY2017 Appropriation: \$8,622.5 (\$4,183.9 UGF; \$2,780.3 DGF; \$358.3 Other; \$1,300.0 Fed)
- FY2018 Governor's Budget: \$9,555.9 (\$5,217.0 UGF; \$2,780.3 DGF; \$258.3 Other; \$1,300.3 Fed)
(budget is 0.59% of the department's FY2018 operating budget request)

FY2018 Budgeted Positions:

- 25 permanent full-time (PFT) and 1 non-perm

FY2018 Governor's Budget (changes from FY2017 Management Plan):

- \$29.0 (\$0.3 Fed; \$28.7 UGF) – salary and health insurance adjustments
- \$1,030.0 UGF – transfer in from State Facilities Rent for the operations and maintenance costs for the Father Andrew P. Kashevaroff (APK) Facility
- (\$100.0) Other reduction to statutory designated program receipt authorization
- Transfer 2 PFT positions to the Department of Administration for Shared Services of Alaska Implementation
- (\$25.6) UGF – decrement for savings from Shared Services of Alaska Implementation
- Delete 2 non-perm positions

Reduction History:

- FY2016 –
 - (\$66.3) UGF reduction and deleted 1 PFT position
 - (\$33.8) UGF reduction from reducing an inter-library loan assistant to half-time (\$1,400.0) total reduction ((\$3,200.0) UGF; \$1,800.0 DGF) to the School Broadband Access Grants
 - (\$273.8) UGF reduction and deleted 2 PFT positions

- FY2017 –
 - (\$503.3) UGF reduction
 - (\$672.7) total reduction ((\$1,590.0) UGF; \$917.3 DGF) to the School Broadband Access Grants

Fees:

Library Operations - Information Services

History

Territorial Department of Library Service was created in 1955 by the Legislature as a separate entity from the Territorial Historical Library and Museum Commission. With statehood, this territorial department became the State Library, part of the Department of Education & Early Development.

What We Do and Who We Serve

The Information Services section:

- provides library and reference service to state government, ensuring that state employees have the information they need to do the best work possible for the state and its citizens;
- serves as a depository for state and federal publications concerning Alaska, by collecting, providing access, and preserving these publications for future generations;
- offers consultant services to Alaskan libraries, archives and museums in areas of special expertise, such as cataloging, government information, copyright, and law;
- coordinates the Talking Book Center, which provides audiobook, large print, and Braille resources to Alaskans with visual or physical disabilities which prevent them from reading standard print books;
- ensures that the official election pamphlets are recorded for the benefit of Talking Book Center patrons, as mandated by AS 15.58.080; and
- takes a leadership role in statewide library projects, such as the Joint Library Catalog and the Alaska Digital Library.

SLED (Statewide Library Electronic Doorway), which was founded in 1994, has become an easy-to-use website that connects people to high quality Alaska information and provides cost-effective access to extensive licensed resources. SLED was developed by the Alaska State Library and UAF's Elmer Rasmuson Library and is currently managed and supported by Information Services, with technical assistance from the University of Alaska Anchorage/Alaska Pacific University (UAA/APU) Consortium Library.

FY2016 Information Services Statistics

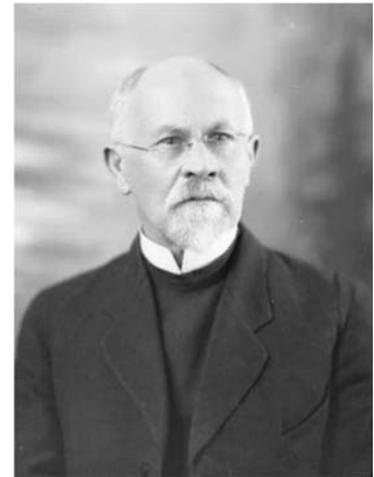

- Answered (with the Historical Collections) **16,919 reference questions** from state employees and **1,047 reference questions** from the public;
- Of these queries, a total of **3,167 questions (18%)** related specifically to Alaska;
- **928 Alaskans** with visual or physical disabilities checked out or downloaded **38,464 audiobooks, magazines, and music scores**, an average of 41.5 items per person;
- A total of **15,143 Alaskans** downloaded **358,963 audiobooks and e-books** from the Alaska Digital Library, an average of 23.7 items per person;

- On the SLED databases, Alaskans did **7,009,987 searches** for proprietary information and accessed over **738,276 full-text articles** concerning languages, science, social science, English, arts & music, health, engineering & technology, and math; and
- Participated in the move to the new Father Andrew P. Kashevaroff (APK) building.

Library Operations - Historical Collections

History

June 6, 1900 The U. S. Congress authorized the Alaska Historical Library and Museum, instructing the governor to collect laws, papers and periodicals of the district, as well as other related materials of historical interest. Russian Orthodox Priest Andrew P. Kashevaroff was recruited as the institution's first curator and librarian in 1919.

1940 The territory purchased Judge James Wickersham's Alaska collection, which significantly enriched and supplemented the Library's holdings.

1966 The Alaska Historical Library was separated from the Alaska State Museum and became a part of the new Division of State Libraries. At this time, all photographs, maps, and diaries were permanently transferred to the Library.

1975 The Alaska Legislature placed the Alaska State Library in charge of the distribution of state publications to libraries. Historical Collections receives the first copy of any state publication deposited under this program.

What We Do and Who We Serve

The Historical Collections includes:

- a growing body of over 100,000 Alaskan books and serials;
- a collection of microfilmed newspapers from 120 Alaska communities;
- more than 500,000 photographs, in different formats such as lantern-slides, 35mm slides, and original negatives, span every aspect of Alaskan geography, history, and culture;
- manuscripts collections comprised of personal papers, private diaries and correspondence of teachers, missionaries, Alaska Native leaders, politicians, military personnel and others; and
- business records of mining companies, store keepers, and canneries which hold a wealth of information on Alaskan resource development.

The Historical Collections has digitized 18,000 Alaskan photographs that are significant or have been requested by patrons. Sound recordings, videocassettes, and films from the Historical Collections, including critical Alaska Native Language materials, are increasingly accessible on Alaska's Digital Archives at: <http://vilda.alaska.edu/cdm/index> and on the library's YouTube channel.

The Historical Collections is currently participating in the Library of Congress' National Digital Newspaper Project, which will result in 100,000 pages of pre-1923 Alaskan newspapers being searchable and digitally accessible.

Students and educators, government employees, academic researchers, and individuals seeking knowledge about their family heritage in Alaska are heavy users of the materials and services available at the Historical Collections. Photographs from the unit are included in many print and electronic publications each year.

FY2016 Historical Collections Statistics

- Answered (with Information Services) **16,919 reference questions** from state employees and **1,047 reference questions** from the public;
- Added **1,000 Alaska State publications** to the collections;
- Filled over **500 requests for high quality photo images**;
- Created and added **1,050 digital images** to the Digital Archives; and
- Participated in the move to the new APK building.

Library Operations - Library Development

History

The Library Services and Technology Act (LSTA) State Block grant program from the Institute of Museum and Library Services requires that a state library agency be in place to receive LSTA funds. LSTA funds are used to aid in the expansion and development of library services. LSTA led to the creation of Library Development.

Federal Statutes Impacting Library Development

U.S.C. 20.9121 et. seq. Library Services and Technology Act – Revised in 1996, LSTA provides federal funding for the extension and improvement of library service and added a focus on helping libraries new information technologies.

What We Do and Who We Serve

Library Development provides consulting services to public and school libraries, assisting with their library management and operational needs and with the development of improved services and programs for patrons.

Library Development provides subject-specific assistance to libraries on grants and library statistics, technology and the Online With Libraries (OWL) program, the E-Rate program, and on early literacy. The grant-funded Alaska Library Network manages statewide consortial

purchases, such as the Alaska Digital Library, which provides e-books and audiobooks to 80% of Alaska's people.

Alaska does not have a library school, so the State Library's continuing education (CE) for library staff is a major component of improving local library services. CE includes: library boot camps; library site visits; library interns; CE grants to attend conferences; webinars, OWL videoconferences and in-person workshops; consulting over the phone; and providing library science books on requested topics.

Major grant-funded projects provide a wide range of library services to Alaskans, including books by mail (library service to people in towns without public libraries); talking book services (audiobooks to Alaskans with visual disabilities); SLED's statewide databases; Alaska Library Network (consortial purchases on behalf of libraries); and the Ready to Read Resource Center (tubs of early literacy books to libraries and day cares and a part time early literacy consultant.)

FY2016 Library Development Statistics

- Answered **4,855 reference questions**;
- Made **25 site visits** to libraries;
- Offered **119 training workshops**, seminars and webinars;
- **Trained 1,880 library staff** during these events; and
- Closed the Anchorage office of the State Library and moved operations to APK.

E-Rate – Library Operations

History

Universal service is the guiding value that all Americans will have the ability to access communication services. The Federal Communications Commission (FCC) was established with the *Communications Act of 1934* with universal service as a core mandate of that new law. **The Universal Service Fund** (USF) within the FCC is used to implement this American value and its companion statute.

The *Telecommunications Act of 1996* was the first major revision of the *Communications Act of 1934*. It expanded the value of Universal Service to include new communication technologies such as the internet. The Act directed the FCC to formalize methods of access to the fund and established four programs within the Universal Service Fund (USF) to implement the statute governing universal service. These four programs are:

Connect America	Formerly known as High-Cost Support which provides subsidies to qualifying providers that serve rural/high cost areas in order to keep rural consumer rates comparable to urban rates
Lifeline	Best known for subsidizing cell phones for low-income users
Rural Health Care	Supporting telemedicine by allowing health care providers to pay rates comparable to their urban counterparts
Schools and Libraries	Also known as the E-rate, the slang term for “education rate,” which allows for affordable telecommunications rates, internet access and internal connections

Funding for the USF does not come from federal tax dollars. Contributions to the USF are made through providers of telecommunications carriers, including wireless and wireline companies and cable companies that provide voice services. Carriers place a USF charge on the billings that are sent to customers, so funding ultimately comes from the public. This USF money is considered a fee, not a tax.

The Universal Service Administrative Company (USAC) is a not-for-profit company acting under the direction of the FCC that collects and distributes contributions from the USF.

Individual states, including the State of Alaska, also have their own state USF funds which are comprised of contributions through carriers from the public.

Who is Served by E-rate

To be eligible for discounts under the USF’s Schools and Libraries program, the school or library must meet the USF program definition of a school or a library. If eligible, a school or library will receive a discount ranging from 20 to 90 percent on the cost of their billing. Eligible services include monthly phone/voice services, Internet access, data lines, and basic infrastructure costs. The discounts received are determined by the poverty level of the local community and are based upon the local public school district eligibility data for the National School Lunch Program (NSLP) or acceptable alternative discount methods.

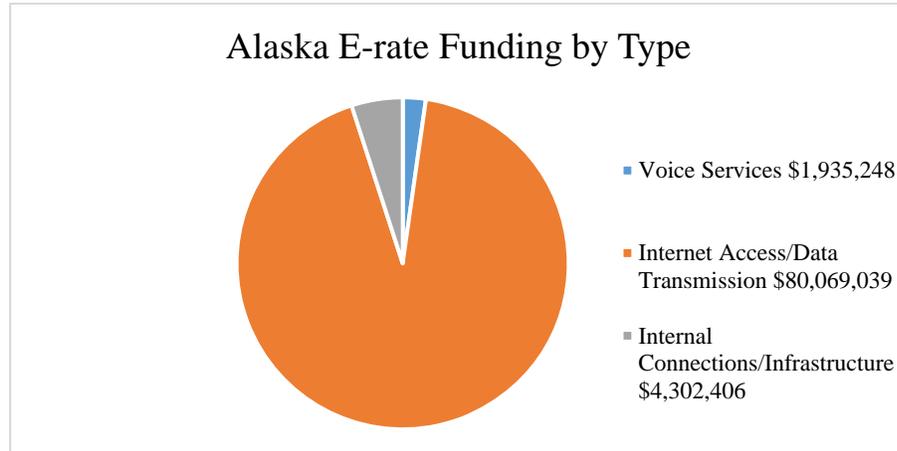

In Alaska, **all public school districts receive USF/E-rate funding**, as well as seven private schools and one state-run school. Two Education Service Agencies (ESAs) are served by USF funding as well. **Eighty-eight (88) public libraries in Alaska are recipients USF/E-rate funding.**

Funding flows directly from the USF fund to the applicant school or library, without being managed by the State of Alaska. The Division of Libraries, Archives and Museums has contracted an E-Rate consultant, who assists all E-rate applicants in Alaska with outreach, training, and assistance in applying for these funds.

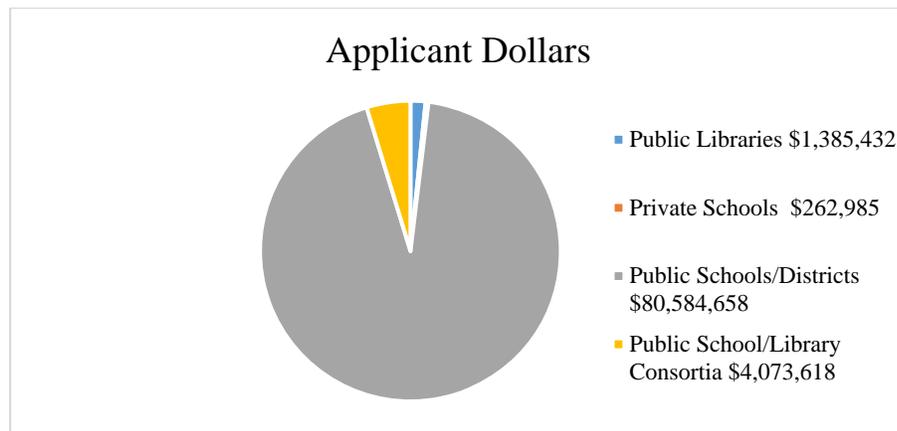

Statistics

In FY2016, the most recent complete E-rate funding year, Alaska's schools and libraries were awarded \$86,306,693 in E-rate funding. The breakdown in funding is as follows:

The breakdown between dollars awarded to different types of applicants are as follows:

A total of 34 public libraries in Alaska are combined school/public libraries, with these public libraries residing within a public school. These combined libraries are eligible for Alaska State Library support and have their own budgets, but serve both the school and the public. Districts that have combined school/public libraries and that share E-rate supported services apply for E-rate funding as a consortium.

School Broadband Assistance Grants (BAG) – Library Operations

History

The School Broadband Assistance Grant (School BAG) program is designed to bring every school in Alaska up to 10 mbps down in support of distance-delivered education and online student testing. This goal is accomplished by combining funds from Federal E-Rate, State School BAG, and the local school district to cover each eligible school's internet costs.

What We Do and Who We Serve

Library Development staff manages School BAG in cooperation with our E-Rate Coordinator. Library Development manages the grant application, award, and reporting processes, while the E-Rate Coordinator closely evaluates the grant applications submitted by the districts.

- In FY2015, School BAG awarded \$4,950,000 to 28 school districts. Awards prorated at 79%.
- In FY2016, School BAG awarded \$3,586,170 to 28 school districts. Awards 100% funded.
- In FY2017, School BAG awarded \$2,470,466 to 28 school districts. Awards 100% funded.

Archives Operations

Original telegram from Governor Bone to Dr. Welch requesting delivery of medicine to Nome in January 1925. Today this event is celebrated as the Iditarod. This is part of the State Archives collection.

History

The Alaska State Archives was established in 1970 to address the State's needs and expense in managing and preserving its legal, vital, necessary, and historically important records. The State's most important records were transferred to the custody of the Archives.

Senator Ted Stevens lobbied the National Archives to transfer custody of select historic and legal federal records to the State Archives. Court system records for the District (1884-1912) and Territory (1912-1959) and papers from the Office of the District and Territorial Governor were transferred to the State Archives.

The records management program was established to provide oversight and assistance on how State agencies should manage their records for legal and administrative purposes and to determine what records should be transferred to the Archives.

What We Do and Who We Serve

The State Archives contains the original records of:

- the Alaska Legislature from 1912 to the present day, including House and Senate floor recordings, committee subject files, and official copies of passed legislation;
- the Executive branch dating from 1884, including the Office of the Governor, Department of Law, Department of Fish & Game, and all other Executive departments; and
- the Judicial branch's records to Statehood. (The Archives assists the Alaska Court System in management of its post-Statehood records.)

Serving all three branches of Alaska's government is the State Archives' core service, with 40% of all service requests coming from the three branches of state government. The State Archives impacts and helps state government function. Two notable instances of support offered by the State Archives' records include the extensive resources used for civil litigation in *Amerada Hess* and the *Exxon Valdez Oil Spill*, which facilitated the return of more than a billion dollars of money into State and citizen coffers.

The public makes 60% of requests to the State Archives. Public access to state records satisfies the legal and public demand of citizen access to government records, a hallmark of government transparency and democracy. The Archives' services to the public empower and educate citizens about their rights and the role of government in history.

The records management program helps state agencies by ensuring that certain records are retained long enough to meet their legal and functional needs and by ensuring that certain records are destroyed after the appropriate time to reduce the expense associated with record storage and to protect the State from liability. The Archives' central microfilm and digitization saves government agencies money by filming records onto smaller media so that the originals can legally be destroyed.

Other services include:

- One million historic vital statistics records (birth, marriage, and death certificates) have been digitized and placed online to serve Alaskans with family history information;
- Oversight of Alaska's corporation incorporation index, which documents the creation of businesses and are needed when businesses seek to establish or revive private businesses;
- Management of the Alaska State Historic Records Advisory Board, which administers federal National Historical Publications & Records Commission (NHPRC) grant funds to municipal and tribal libraries, archives, and museums;
- Microfilming of Alaska's daily newspapers for long term preservation and providing copies of these newspapers to Alaskan libraries; and
- Consultation and training to municipal and tribal governments about records management.

FY 2016 Archives Statistics

- The State Archives holds 25,000 cubic feet of material, the largest and most valuable collection of legal and government records in Alaska;
- Answered **342 reference** questions;
- **Trained 42 government employees** on archival processes;
- **Added 1,600 cubic foot boxes** of permanent state agency documents to the Archives; and
- Participated in the move to the new APK building.

Alaska State Libraries, Archives and Museums
Museum Operations

Statutes: AS 14.57

Regulations: 4 AAC 58

Contribution to Department’s Mission:

Provides access to information, preserves the history of the state, and promotes the development of museums statewide.

Funding History:

MUSEUM OPERATIONS

History

The Alaska State Museum (ASM) was established on June 6, 1900. Since then, the Museum's collections have grown from 5,500 to 38,000 objects. The ASM was accredited by the American Association of Museums in 1975 and was re-accredited in 1987 and 2015.

The Sheldon Jackson Museum (SJM) was founded in 1888 to house an exceptional collection of Alaska Native ethnographic material, most of which had been gathered by Presbyterian missionary and General Agent of Education for Alaska, the Reverend Dr. Sheldon Jackson. In 1985, the State purchased the SJM and now administers its collection of 6,000 objects. In 1972, SJM's unique building, the first concrete structure built in Alaska, was added to the National Register of Historic Places.

What We Do and Who We Serve

The State Museums identify, collect, preserve, and exhibit Alaska's historical and natural history and provide public access to services and collections of the Museums. Public services include museum visits, docents, publications, lectures, and other events related to the exhibitions. The ASM has a longstanding ceremonial use program, in which objects of cultural patrimony such as clan hats and sacred robes are checked out to tribally identified caretakers for use in cultural ceremonies and events such as clan house dedications and memorial services.

Additional public services under this goal include:

- The **Hands-On Loan Program** at SJM loans materials to schools for curriculum support;
- SJM offers **Teacher's Online Resources**, which are cultural programs on-site and in the classroom to engage students with the Native cultures in Alaska;
- ASM solicits Alaskan artists to submit their portfolios for **solo exhibitions**, including the biennial schedule for *Alaska Positive*, a statewide juried photographic exhibition now in its 46th year;
- During SJM's **Native Artist Residency Program** each summer, artists representing cultures across Alaska come to Sitka to demonstrate their art for residents and tourists;
- SJM selects an **Artifact of the Month** to display in the museum and to post online;
- ASM manages a **rotating exhibition schedule** with 6-8 temporary exhibitions annually, including traveling exhibitions from other museums, exhibitions curated from the State Museum's collection, solo artist's exhibitions, and *Alaska Positive*; and
- The public can search the Museums' **Collection Database**, which provide access 38,000 objects at ASM and 6,000 objects at SJM.

The State Museums assist and advise in the growth and development of other museums within Alaska through the following services:

- ASM awards **grants-in-aid** to Alaska museums, historical societies or support groups for projects that improve the quality of museum services and operations within the state;

- Curators make **on-site assessment visits** to consult on aspects of museum operations, including exhibits, conservation, collection management, and building and storage conditions and can assess individual objects and make conservation treatment recommendations;
- ASM publishes a **quarterly bulletin** and maintains a **list serve** for use by Alaska's museum professionals;
- ASM **loans objects** from its collection to museums that meet required standards for their exhibits;
- Both Museums develop and ship small **Traveling Exhibits** for use by museums statewide;
- Curators hold monthly **Museum Chats Online** for those involved with museums who want to ask questions or discuss topics of interest; and
- Curators hold **training workshops** in various aspects of museum practices independently or in conjunction with the Museums Alaska annual conferences.

FY2016 Museum Statistics

- Answered 3,089 reference questions;
- Held 900 adult and youth activity programs;
- Hosted 19,975 museum visitors;
- Trained 512 on museums management and services; and
- Participated in the move to the APK facility.

Alaska State Libraries, Archives and Museums
Online With Libraries (OWL)

Statutes: n/a

Regulations: n/a

Contribution to Department's Mission:

OWL builds capacity for Alaska's public libraries together with E-rate and local contribution, by funding basic broadband internet and supplying videoconferencing capability, training and content for Alaskans.

Funding History:

- FY2014 Appropriation: \$761.8 UGF
- FY2015 Appropriation: \$761.8 UGF
- FY2016 Appropriation: \$761.8 DGF
- FY2017 Appropriation: \$661.8 UGF
- FY2018 Governor's Budget: \$661.8 UGF
(budget is 0.04% of the department's FY2018 operating budget request)

FY2018 Budgeted Positions:

- 1 permanent full-time (PFT)

FY2018 Governor's Budget (changes from FY2017 Management Plan):

- No changes

Reduction History:

- FY2017 – (\$100.0) UGF reduction

Online With Libraries (OWL)

History

The Alaska Online With Libraries (OWL) Program began in 2011 as the OWL Project with federal funds provided through the American Recovery and Reinvestment Act of 2009 and administered through the Broadband Technology Opportunities Program (BTOP) of the U.S. Department of Commerce. In 2013, the State funded the OWL Project, which was renamed the Online With Libraries (OWL) Program.

What We Do and Who We Serve

Since FY2013, the Alaska OWL Program has carried out two primary activities. OWL subsidizes rural library bandwidth for a number of rural communities. OWL contracts with University of Alaska Video Services to operate a videoconference network that connects 95 public libraries and allows public and agency use of the network for meetings and trainings.

For FY2017, in response to budget cuts and legislative intent for libraries to pay more of their local internet costs, minimum contribution levels were established for libraries to be eligible for OWL funding. These minimum internet contributions were based on library size (\$50/month for small libraries, \$200/month for medium libraries, \$500/month for libraries in larger communities). As a result of this tightening of eligibility, the number of libraries receiving OWL internet subsidies was reduced from 44 to 25.

OWL's videoconference network connects 95 public libraries to each other and the world. Videoconferences have supported job interviews, presentations by government agencies, university classes, author visits, STEM programming, and more. Videoconferencing services staff at the University provide scheduling, testing, monitoring and troubleshooting of video connections. Selected videoconferences are recorded and archived on the OWL web page for later viewing, provided the presenter has given permission.

The OWL Program Manager maintains a guide of digital literacy resources at <http://lam.alaska.gov/digitalliteracy> and provides distance digital literacy training.

OWL serves patrons of the 25 public libraries that receive the OWL internet subsidy. The audience for OWL's videoconference network consists of 95 public libraries, their patrons and the government agencies, colleges, schools, non-profits and others who use OWL to provide convenient training in local communities and to reduce travel costs.

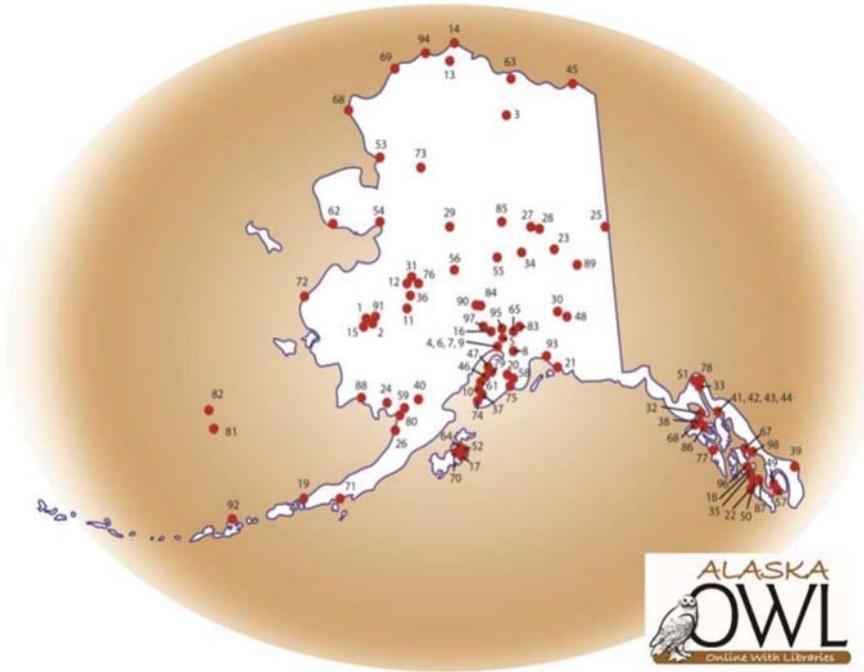

Table of libraries subsidized by OWL in FY2017

Location	Speed (Mbps)	Vendor	Annual Cost of Internet	E-Rate Portion	OWL Portion	Library Portion
Aniak	1.0 x 1.0	GCI	\$38,604	\$34,744	\$3,260	\$600

FY2016 and FY2017 OWL Statistics

- In FY2016, OWL subsidized 44 libraries for a total of \$292,632. Total internet costs were \$1,433,695, with E-Rate paying \$1,096,017 and the libraries paying \$45,045.
- In FY2017, OWL subsidized 25 libraries for a total of \$153,044. Total internet costs were \$1,128,970, with E-Rate paying \$899,082 and the libraries paying \$76,844.
- In FY2016, 631 videoconferences were facilitated by University of Alaska (UA) Video Services staff.
- For FY2017, through January 2017, 412 videoconferences have been facilitated by UA Video Services. We expect to exceed the number of videoconferences delivered in FY2016.

Map of OWL Videoconference Locations

For community names see http://library.alaska.gov/pdf/libdev/owl/AKOWL_libraryMap.pdf

Since this map was created, Chiniak, Koyuk, and Lake Minchumina have left the video conference network.

Live Homework Help

Statutes: n/a

Regulations: n/a

Contribution to Department's Mission:

Live Homework Help provides online tutoring services with accomplished, vetted, and monitored tutors for grades four through early college. These tutors assist Alaskan students to do well in courses, participate in statewide initiatives such as the Alaska Performance Scholarship Awards, meet goals, and prepare for post-secondary success.

Funding History:

- FY2014 Appropriation: \$138.2 UGF
- FY2015 Appropriation: \$138.2 UGF
- FY2016 Appropriation: \$138.2 DGF
- FY2017 Appropriation: \$138.2 DGF
- FY2018 Governor's Budget: \$138.2 DGF
(budget is 0.01% of the department's FY2018 operating budget request)

FY2018 Budgeted Positions:

- None

FY2018 Governor's Budget (changes from FY2017 Management Plan):

- No changes

Students Served:

Fiscal Year	# Students Served
2008	5,073
2009	8,384
2010	8,571
2011	12,018
2012	18,428
2013	18,868
2014	25,046
2015	31,376
2016	22,704

Live Homework Help

History

Live Homework Help (LHH) started in 2004 as a grant-funded pilot project to assist librarians, who are frequently asked for help by students with their assignments. This program has been funded in recent years with \$138,200 from the Alaska Legislature, with the remainder paid primarily through State Library grant funds.

What Live Homework Help Does and Who It Serves

Students access LHH via the SLED web page <http://lam.alaska.gov/sled/homework> from noon to 2 am daily. The student indicates the grade he is in and the subject in which homework was assigned. LHH links him with a human tutor with credentials in that subject. Tutors spend an average of 20 minutes per session helping each student. They use online chat to discuss the homework, the student can upload homework documents for the tutor to review, and they use a whiteboard to go over math and science formulas. The student fills out an evaluation form before leaving LHH.

Each tutoring session is charged at \$7.50, which is a good deal when compared to other services like LHH. The Legislature's \$138,200 pays for 18,427 sessions annually. State Library LSTA (Library Services and Technology Act) grant funds cover the remainder.

Our quandary: the basic problem with the per session cost structure of LHH is that, if we pay to advertise LHH with grant funds, then we end up paying even more money from grant funds as LHH usage climbs. LHH will not negotiate a flat annual subscription rate for unlimited usage.

FY2016 Statistics

Father Andrew P. Kashevaroff (APK) Building

History

Construction began when dignitaries broke ground in January 2013. APK opened to the public on June 6, 2016, the 116th anniversary of the creation of the Historical Library and Museum.

What APK Does

- Houses irreplaceable collections in an extremely secure and atmosphere controlled repository;
- Provides for public access to collections in warm and inviting spaces;
- Students, researchers and tourists receive more convenient one-stop service at APK, as opposed to visiting separate locations of the State Library, Museum and Archives;
- Makes atrium, classroom and lecture hall available for free public programs and private rentals;
- Provides an OWL videoconference room to staff, agencies and public for statewide meetings;
- Provides display cases on mezzanine level for public;
- Houses two concessions, café and gift store, to serve visitors;
- Houses a museum conservation laboratory and a paper laboratory (the only such laboratory in Alaska) to stabilize and conserve museum materials of all types; and
- Has a wired connection to KTOO so programs in lecture hall can be filmed and broadcast on a statewide basis.

Financial Benefits Accrued through Consolidation and New Services

- Saved **\$155,000** annually by contracting talking book services to Utah State Library and closing Anchorage office of the State Library;
- Saved **\$226,800** annual rent by closing Anchorage office and moving Library Development to APK;
- Saved **\$551,892** in annual rent (FY2016 amount) by vacating State Office Building 7th and 8th floors;
- Saved **\$183,245** by vacating off-site storage for Archives and moving materials to APK;
- Will save **\$60,000** more when museum vault expansion is complete in fall 2017 and we vacate museum off-site storage in FY2018;
- Expects to earn **\$16,968** in annual lease income from APK Café;
- Expects to earn **\$15,000** in projected lease income from APK gift store;
- On target to earn **\$29,564** in rental fees for classroom, lecture hall and atrium; and
- On target to earn **\$168,435** in museum admission fees and annual passes (increase over FY2014).

Total \$1,406,904 in savings and revenues

FY2017 (July – December) Statistics

- 2,770 Alaskans attended 18 rental events
- 4,610 Alaskans attended 29 free public programs
